| Preface | xi | 4. Vegetative growth | 60 |
| 1. Overview: | | 4.1. Emergence | 61 |
| perspectives on grassland systems | 1 | 4.1.1. <i>Seedling type</i> | 62 |
| 1.1. The social construction of grassland systems | 2 | 4.1.2. <i>Seed size and genotype</i> | 62 |
| 1.2. Grassland issues or problems | 4 | 4.1.3. <i>Seed bed</i> | 63 |
| 1.3. Systems thinking | 8 | 4.2. Establishment | 63 |
| 1.4. Representing grassland systems | 9 | 4.3. Forms of development | 65 |
| 1.4.1. <i>Modelling</i> | 10 | 4.3.1. <i>Apex position</i> | 65 |
| 1.5. Purposes of grassland systems | 15 | 4.3.2. <i>Leaves</i> | 65 |
| 1.6. Further reading | 17 | 4.3.3. <i>Branches or tillers</i> | 67 |
| 2. The emergence of grassland systems | 18 | 4.3.4. <i>Roots</i> | 68 |
| 2.1. Biological and ecological models that give rise to grassland systems | 20 | 4.4. Growth | 69 |
| 2.1.1. <i>Clementsian succession</i> | 20 | 4.4.1. <i>Interception of radiation</i> | 70 |
| 2.1.2. <i>'New' thinking</i> | 21 | 4.4.2. <i>Utilization of radiation</i> | 71 |
| 2.1.3. <i>The origins of 'range science'</i> | 23 | 4.4.3. <i>Carbon balance</i> | 71 |
| 2.1.4. <i>Traditional or 'mainstream' approaches to grassland system development</i> | 23 | 4.4.4. <i>Efficiency of net primary productivity</i> | 72 |
| 2.2. Technologies that reveal and conceal – a case study | 24 | 4.5. Regrowth | 73 |
| 2.2.1. <i>Increasing productivity</i> | 25 | 4.6. Environmental effects on growth | 74 |
| 2.2.2. <i>Thirty to fifty years later</i> | 27 | 4.6.1. <i>Water availability</i> | 74 |
| 2.2.3. <i>Stepping outside our traditions</i> | 27 | 4.6.2. <i>Temperature</i> | 75 |
| 2.2.4. <i>Responsibility in technology design</i> | 28 | 4.6.3. <i>Nutrition</i> | 75 |
| 2.3. Present grassland systems | 28 | 4.6.4. <i>Fire</i> | 75 |
| 2.3.1. <i>Global distribution of grassland systems</i> | 28 | 4.7. Competition | 76 |
| 2.3.2. <i>Animal industries</i> | 30 | 4.7.1. <i>Thinning</i> | 76 |
| 2.3.3. <i>Grassland plant domestication</i> | 33 | 4.7.2. <i>Competitiveness and growth rate</i> | 76 |
| 2.4. The agronomic manipulation of grassland systems | 35 | 4.7.3. <i>Weeds</i> | 77 |
| 2.5. Further reading | 36 | 4.7.4. <i>Trees</i> | 77 |
| 3. Generation | 37 | 4.8. Grazing effects on growth and development | 78 |
| 3.1. Sources of seed | 37 | 4.9. Long-term changes in species composition | 80 |
| 3.2. Sown seed | 42 | 4.10. Modelling plant growth | 80 |
| 3.2.1. <i>Time, rate and depth of sowing</i> | 43 | 4.11. Further reading | 82 |
| 3.2.2. <i>Method of cultivation and sowing</i> | 44 | 5. Flowering and seed production | 83 |
| 3.2.3. <i>Nutrition and seed treatment</i> | 45 | 5.1. Juvenility | 83 |
| 3.2.4. <i>Grazing</i> | 46 | 5.2. Morphological changes at flowering | 84 |
| 3.2.5. <i>Herbicides</i> | 47 | 5.3. Flowering | 85 |
| 3.2.6. <i>Burning</i> | 47 | 5.3.1. <i>Environmental controls of flowering</i> | 85 |
| 3.3. Dynamics of the seed bank | 48 | 5.3.2. <i>Autonomous flowering</i> | 88 |
| 3.3.1. <i>Seasonality of seed banks</i> | 48 | 5.3.3. <i>Development of the inflorescence</i> | 88 |
| 3.3.2. <i>Dormant and active seed</i> | 49 | 5.4. Fertilization and seed formation | 89 |
| 3.4. Germination | 53 | 5.4.1. <i>Breeding systems</i> | 89 |
| 3.5. Vegetative generation | 55 | 5.4.2. <i>Anthesis and fertilization</i> | 91 |
| 3.6. Systems modelling | 56 | 5.4.3. <i>Seed production</i> | 92 |
| 3.7. Further reading | 59 | 5.5. Implications for grassland growth and management | 94 |
| | | 5.5.1. <i>Flowering and growth rate</i> | 94 |
| | | 5.5.2. <i>Flowering and quality</i> | 95 |
| | | 5.5.3. <i>Selection of cultivars</i> | 95 |
| | | 5.5.4. <i>Sowing time</i> | 96 |

Contents

| | | | |
|--|-----|---|-----|
| 5.5.5. <i>Management by defoliation</i> | 96 | 7.6. Implications for management | 134 |
| 5.5.6. <i>Fertilizer application</i> | 97 | 7.6.1. <i>Production systems</i> | 134 |
| 5.5.7. <i>Diseases and pests associated with flowering</i> | 97 | 7.6.2. <i>Research and development towards managing nutritive value</i> | 138 |
| 5.6. Systems modelling | 97 | 7.7. Systems approaches | 139 |
| 5.7. Further reading | 98 | 7.8. Further reading | 139 |
| 6. Mineral nutrition | 99 | 8. Grassland – animal interactions and management | 140 |
| 6.1. The nutrient network | 99 | 8.1. Animal effects on grassland | 140 |
| 6.2. Soil fauna and flora | 102 | 8.1.1. <i>Selective grazing</i> | 140 |
| 6.2.1. <i>Rhizosphere organisms</i> | 102 | 8.1.2. <i>Pulling</i> | 141 |
| 6.3. Uptake by plants | 105 | 8.1.3. <i>Treading and poaching</i> | 142 |
| 6.3.1. <i>Uptake of inorganic nutrients</i> | 105 | 8.1.4. <i>Fouling</i> | 142 |
| 6.3.2. <i>Cation anion balance</i> | 105 | 8.2. Grazing management systems | 143 |
| 6.3.3. <i>Soil acidification by legume pastures</i> | 106 | 8.2.1. <i>Production per animal and per area</i> | 143 |
| 6.4. Distribution of nutrients within the plant | 107 | 8.2.2. <i>Herd experience, composition and timing of operations</i> | 145 |
| 6.5. Senescence and element release from dead material | 107 | 8.2.3. <i>Grazing interval: set stocking and block grazing</i> | 146 |
| 6.5.1. <i>Herbage death</i> | 108 | 8.2.4. <i>Regional grazing systems</i> | 148 |
| 6.5.2. <i>Dung and urine</i> | 108 | 8.3. Conservation and supplementation | 149 |
| 6.5.3. <i>Decomposition</i> | 108 | 8.3.1. <i>Carryover feed</i> | 149 |
| 6.6. Animal intake | 110 | 8.3.2. <i>Hay and silage</i> | 150 |
| 6.7. Losses from the system | 110 | 8.3.3. <i>Crop residues and by-products</i> | 152 |
| 6.8. Element deficiency and fertilizer needs | 111 | 8.3.4. <i>Fodder crops</i> | 153 |
| 6.9. Implications for grassland growth and management | 112 | 8.3.5. <i>Supplements</i> | 154 |
| 6.9.1. <i>Pesticides and herbicides</i> | 112 | 8.4. 'Feed year' planning | 155 |
| 6.9.2. <i>Types of N, P, K, S fertilizer</i> | 113 | 8.5. Efficiency of livestock production | 157 |
| 6.9.3. <i>Efficiency of utilization of fertilizer</i> | 114 | 8.5.1. <i>Energy budgeting</i> | 157 |
| 6.9.4. <i>Amount of fertilizer required</i> | 114 | 8.5.2. <i>Legume versus nitrogen-fertilized grass systems</i> | 159 |
| 6.9.5. <i>Timing of fertilizing</i> | 116 | 8.5.3. <i>Efficiency of use of support energy</i> | 159 |
| 6.9.6. <i>Type and method of application of fertilizer</i> | 116 | 8.6. Systems perspectives | 159 |
| 6.9.7. <i>Grassland maintenance and restoration</i> | 116 | 8.7. Further reading | 160 |
| 6.10. Models for nutrient management | 117 | 9. Grassland systems design | 161 |
| 6.11. Further reading | 118 | 9.1. Grasslands in farming systems | 161 |
| 7. Herbage quality and animal intake | 119 | 9.1.1. <i>Farming systems perspective</i> | 161 |
| 7.1. The basis of herbage quality | 119 | 9.1.2. <i>Integration of grasslands and cropping</i> | 162 |
| 7.1.1. <i>Chemical composition</i> | 120 | 9.1.3. <i>Economic analysis</i> | 166 |
| 7.1.2. <i>Cell structure</i> | 121 | 9.1.4. <i>Gender and culture</i> | 169 |
| 7.1.3. <i>Variation among species</i> | 122 | 9.1.5. <i>Farm technology</i> | 170 |
| 7.1.4. <i>Ageing</i> | 124 | 9.2. Grasslands and other forms of human activity | 171 |
| 7.1.5. <i>Environment</i> | 125 | 9.2.1. <i>Agro-industrial systems for using grassland plants</i> | 172 |
| 7.1.6. <i>Palatability and edibility</i> | 126 | 9.2.2. <i>Grasslands in aesthetics and conservation</i> | 174 |
| 7.2. Injurious substances | 126 | 9.3. Design of future grassland systems | 174 |
| 7.3. Sward structure | 129 | 9.3.1. <i>Participation in designing</i> | 175 |
| 7.4. Herbage availability: grazing pressure | 130 | 9.3.2. <i>Future scenarios</i> | 177 |
| 7.5. Animal type and productivity | 132 | 9.4. Regional design | 177 |
| 7.5.1. <i>Animal type</i> | 132 | 9.5. National issues | 180 |
| 7.5.2. <i>Utilization of energy</i> | 133 | | |
| 7.5.3. <i>Intake and productivity</i> | 133 | | |

Contents

| | |
|---|-----|
| <i>9.5.1. National purposes for grassland systems</i> | 180 |
| <i>9.5.2. Grassland research</i> | 182 |
| 9.6. Global design | 183 |
| <i>9.6.1. Human health and food supply</i> | 183 |
| <i>9.6.2. Biodiversity</i> | 185 |
| <i>9.6.3. Sustaining organic matter and nutrients</i> | 185 |
| <i>9.6.4. Responding to climate change</i> | 186 |
| 9.7. Conclusion | 186 |
| 9.8. Further reading | 187 |
