## Contents

<i>Preface</i>	<i>page</i>	vii
1 Introduction		1
1.1 Pattern recognition		2
1.2 Correlation		4
1.3 Organization		9
2 Mathematical background		13
2.1 Matrix–vector notation and basic definitions		14
2.2 Basic matrix–vector operations		15
2.3 Eigenvalues and eigenvectors		21
2.4 Quadratic criterion optimization		25
2.5 Probability and random variables		28
2.6 Chapter summary		46
3 Linear systems and filtering theory		48
3.1 Basic systems		48
3.2 Signal representation		50
3.3 Linear shift-invariant systems		55
3.4 Continuous-time Fourier analysis		61
3.5 Sampling theory		74
3.6 Fourier transform of DT signals		82
3.7 Random signal processing		95
3.8 Chapter summary		106
4 Detection and estimation		108
4.1 Binary hypothesis testing		108
4.2 Multiple hypotheses testing		118
4.3 Estimation theory		122
4.4 Chapter summary		128
5 Correlation filter basics		130
5.1 Matched filter		131
5.2 Correlation implementation		139

Table of Contents

[More information](#)

vi	<i>Contents</i>	
	5.3 Correlation performance measures	148
	5.4 Correlation filter variants	155
	5.5 Minimum Euclidean distance optimal filter	184
	5.6 Non-overlapping noise	186
	5.7 Chapter summary	192
6	Advanced correlation filters	196
	6.1 In-plane distortion invariance	198
	6.2 Composite correlation filters	205
	6.3 Distance classifier correlation filters	225
	6.4 Polynomial correlation filters	231
	6.5 Basic performance prediction techniques	235
	6.6 Advanced pattern recognition criteria	239
	6.7 Chapter summary	241
7	Optical considerations	244
	7.1 Introduction	244
	7.2 Some basic electromagnetics	246
	7.3 Light modulation	278
	7.4 Calibration of SLMs and their drive circuitry	280
	7.5 Analytic signal	291
8	Limited-modulation filters	295
	8.1 Introduction	295
	8.2 History, formulas, and philosophy	300
	8.3 Physical view of the OCPR process	308
	8.4 Model, including circular Gaussian noise	315
	8.5 Metrics and metric potential	320
	8.6 Gradient concepts	325
	8.7 Optimization of the metrics	328
	8.8 SLMs and their limited range	332
	8.9 Algorithm for optical correlation filter design	340
	8.10 Some practical points	342
	8.11 Some heuristic filters	349
	8.12 Chapter summary	355
9	Application of correlation filters	357
	9.1 Recognition of targets in SAR imagery	357
	9.2 Face verification using correlation filters	377
	9.3 Chapter summary	382
	<i>References</i>	383
	<i>Index</i>	388
