New Zealand Ministry of Defence 6
optimal control 130–87

Phillips, A.W.H., biography
academic career xiii, 4, 304
awarded Hutchinson Medal 10
awarded MBE 5
birth xii, 3, 90
builds secret radio in POW camp 7, 8
Chinese studies xiii, 4, 11, 20
controversy with Ted Hannan 422
corresponds with Holt 308–10
creates spirit of a university in POW camp 5–6, 9
crocodile hunter 3, 90
curiosity: about monetary economics 31; about social sciences 9, 20
daughter, Anna Phillips xvii
death xiii, 4, 89
Economica Editorial Board 335–8
family 3, 6, 7, 14
Festschrift 26–8
joins RAF 4
LSE 90–7
LSE Staff Seminar on Methodology, Measurement and Testing (1957–63) 232, 310
mechanical ability xiv, 4, 18, 23
moves to Australian National University xiii, 4, 100, 265
PhD 10, 18
poor examination results xiii
prisoner-of-war 5, 7, 9, 20, 90
relationship with James Meade xiii,
xx. 17, 18–9, 36–7, 39, 48, 52, 54, 65, 86, 115–17, 165, 167, 182, 190, 206, 336, 355
returns to New Zealand 4
school 3
seeks to return to Cambridge University 18
sister, Carol Ibbotsen Somervell xvii, 6, 14
stroke 13, 100, 305
student at LSE xii–xiii
studies sociology xii
teacher 354–5
tobacco addiction xii–xiii, 13
training as an engineer 4, 9, 90
travels to Britain 3, 90
visits: Nuffield College, Oxford (1962) 446, 450
Walras Bowley Lecture (1966) 24, 356, 420–2
wife, Valda Phillips xvii, 8, 13, 14, 16, 17, 91, 100
works with UNCTAD xvi–xvii
Phillips’ contribution to econometrics continuous time modelling 342
Cowles Commission framework 343, 422
cybernetics and economic systems regulation 385–94
error correction mechanisms 343, 358
estimation of continuous time models 446–50
estimation of parameters 395–407
estimation of systems of difference equations 423–44
estimation of time-forms 370–84
interdependent dynamic systems 408–17
legacy 353–63, 365–8
method of indirect inference 350
models for control of economic fluctuations 468–78
published papers 348–444
research contribution 311–13
unpublished papers 446–78
VARMA models 345–6, 446–8
Walras Bowley paper 420–2
Phillips curve, the 13, 24–5, 217–8
1958 article 232–42, 335–8
List of Subjects

cost-push interpretations 237–8
development of Harrod rather than
neoclassical growth model 191
empirical Phillips curve 231–338:
American 222; as a disequilibrium
phenomenon 238–9; and
Keynesian-monetarist controversy
241, 304–7
dynamic stabilisation policy
296–303
empirical roots 234–5
error correction mechanism 132
and exchange rate regimes 12,
221–3
expectations augmented curve
240–1
feedback rules 166
frequency response method (Nyquist
stability criterion) 184–5
later interpretations 238–9
in macroeconomics and
econometrics 288–95
‘Melbourne paper’ 263–8
and modern econometrics 315–33
and monetary policy 157, 216:
Australian 261–81;
cointegration analysis 318–333;
Lipsey’s development 235–6;
Phillips’ conversation with Phelps
Brown 234–5; Phillips’ labour
market model 243–5
and natural rate models 310
optimal and classical control
130–3
similarity with the NAIRO 132
stabilisation policy 282–7
synthesis of real and monetary
phenomena 190–4, 195–206
theoretical Phillips curve: diagram
151; as dynamic macroeconomic
model 130–3
theoretical roots 233–4
tradeoff 21, 55
unemployment and money wage
rates 243–59
wage changes and unemployment,
Australia 269–80
wage inflation 261–2
Phillips’ dissatisfaction with the kinked
AS curve 233–4
Phillips on inflation 9
adaptive expectations formula for
Milton Friedman 22
analysis of inflationary expectations
17, 149–156, 190
Phillips and the Lucas Critique 11, 26,
132, 346–7, 410–17, 460–5,
479–86
1967 conference on mathematical
model building 460
Phillips Machine, the (or Moniac)
built the machine in a Croyden
garage 10, 34
consumption curve 73–5
as contribution to development of
economic analysis 32, 108–9
and control theory 52–4, 308–9
demonstrated: at American
Economic Association meeting
(1950); at Robbins’ seminar 36, 39, 91–2,
116
as an economic device 100–4
as either a Keynesian or a Classical
model 33–4
and ENIAC 107, 126
examples of use 59–65
explanatory device 118–19
history 89–112
and history of computing 120–5
hydraulic model 20–1, 68–86
increasing the quantity of money
47–9
inflationary expectations: Metzler’s
coefficient of expectation 73, 87
inspiration from Boulding 32, 69
internal and external balance 55–7
international and policy coordination:
Meade combines two machines
57, 116
List of Subjects

Phillips Machine, the (or Moniac) cont’d
and Keynes and Robertson 66
and the Keynesian multiplier 43–7, 77–80
lagged accelerator 80–1
loanable funds versus liquidity preference 33–4
LSE machine 94–7
mechanics 104–6
as open economy IS/LM model
(Mundell-Fleming model) 34, 45–8, 56–7
operating instructions 58–65
as part of cybernetics movement 122–3
PID (proportional integral and derivative) stabilisation proposals
52, 131, 138–48, 169–83
as progressive model 39–40
purchasers: Birmingham University 106; Cambridge University 23, 106, 118; Harvard University 106; Leeds University xiii; Melbourne University 106; Oxford University 106; Roosevelt College, Chicago 106; The Central Bank of Guatemala 106; The Ford Motor Company 106
reactions 115–17; Chancellor of the Exchequer 37; Cooper, R. 109; Court, A.T. 108, 288–9; Governor of the Bank of England 116–17; Hansen, A. 116–17; Lerner, A. 116–17; Polak, J. 107; Punch 104–7; Robertson, D.H. 116; Robbins, L. 116
renovation: Harry Johnson’s initiative 110; Imperial College initiative 111; New Zealand Institute of Economic Research 120; on permanent display at the Science Museum 110, 120–6; STICERD initiative 111;
unveiling of the restored Machine 111, 119
as representation of the macroeconomy 32
and Robertsonian analysis 45, 75, 84, 108–9
significance 108–9
stocks and flows 50–2
and treatment of prices 70–1, 76
Phillips and Richard Tizard (National Physical Laboratory) on control theory 169, 182, 309
quantity theory of money 47–9

Radcliffe Committee 216
rate of interest 33–4, 81–3
rational spectral density functions 451–7

Science Museum, London 37
Solow growth model 52, 191
stabilisation policy
closed economy 134–65
derivative correction 144–6
diagrammatic representation 148–9
flexible prices and interest rates 149–65
inherent prices and interest rates 153–6
integral stabilisation policy 140–3
lagged responses 169–82
optimal control 131–2
proportional stabilisation policy 138–40
proportional and integral stabilisation policy 143–4
stabilisation of a multi-accelerator model 146–8
and system dynamics 131
Tinbergen approach 131
stocks and flows of money 23–4, 42–5, 50–2
