

INDEX

- accelerated stochastic approximation, 28
- adaptive control, 57–63
- adaptive plan, 69–72
- asymptotic distribution, 5, 6
- asymptotic loss, 58
- asymptotic normality, 72, 95–116, 155, 165
- asymptotically regular process, 19–27
- Beckenbach, 195
- Bellman, 195
- Bertram, 195
- bioassay, 6, 8, 72–5
- Block, 195
- Blum, 13, 29, 36, 76, 80, 88, 174, 195
- Borel-Cantelli, 158
- Box, 57, 195
- Brauer fixed point theorem, 27
- Brownlee, 142, 195
- Burkholder, 19, 29, 32, 47–50, 95, 114, 159, 161, 162, 178, 179, 182, 195
- Cameron, 131, 195
- Cauchy, 157
- characteristic function method, 6, 101–110, 164–7
- Chebyshev's inequality, 46, 50
- chemical processes, 62–3
- Chung, 36, 40, 95, 175, 178, 180, 181, 195
- Cochran, 28, 195
- Comer, 19–21, 21–3, 58, 195
- competitive antagonism, 63–4
- conditional expectation, 167–73
- confidence interval, 6, 95, 110–11
- continuous random process, 6, 76, 117–34
- continuously convergent, 96, 159, 160
- control problem, 6, 57, 122
- convergence of sequences, 155–64
- Davenport, 196
- Davis, 28, 75, 195, 196
- Derman, 13, 35, 143, 147, 183, 184, 196
- Dixon, 135, 136, 138, 196
- Doob, 26, 155, 174, 196
- dose, estimation, 74
- Driml, 117, 119, 122, 196
- Dubin, 196
- Dupač, 29, 34, 36, 41, 53, 117, 125, 196
- Dvoretzky, 8, 13–15, 15–19, 74, 83, 87, 88, 196
- Egorov's theorem, 108
- Ehrenfest Model, 139
- Epling, 63, 114, 196
- estimate of error, 153
- estimation of dose, 74–5
- Fabian, 29, 95, 106, 107, 116, 194, 196
- Farrell, 5, 197
- Feller, 109, 139, 197
- filter, 6, 131, 132
- fixed point, 27, 152
- Freedman, 196
- Friedman, 34, 35, 197
- Gaddum, 72, 197
- Gardner, 122, 197
- Gaswirth, 67, 112, 199
- general process, 61
- Gray, 91, 197
- Guttman, 75, 197
- Hans, 196, 197
- Hodges, 95, 142, 195, 197
- Hotelling, 1, 197
- Hunter, 197
- inequalities, 175–94; Chebyshev, 46, 50; Kolmogorov, 167–70; Ljapunov, 105
- infection point, 6, 36, 48
- information, 68
- inspection plan, 68, 69–72
- iteration techniques, 1, 4, 6, 150–4
- Jenkins, 57, 195
- Kakutani, 27
- Kallianpur, 13, 197

- Kesten, 29, 31, 75, 197
 Kiefer, 6, 36–56, 88–91, 117, 125–30, 197
 kinetic model, 6, 63, 80
 Kolmogorov, 127, 197; inequality, 167–70
 Krasulina, 198
 Kronecker's lemma, 39, 53, 171, 172
 Kullback, 198
 Kushner, 5, 54, 198

 least squares method, 5
 Lebesgue theorem, 130
 Lehmann, 95, 197
 Lévy, 163
 Lipschitz condition, 4, 152; constant, 153
 Loeve, 95, 155, 198
 Lyapounov's inequality, 105

 Martin, 131, 195
 maximization of information, 68
 maximum likelihood, 73, 137, 138
 maximum of regression function, location of, 3, 6, 36–40
 mean square error, 52
 median, 74
 Minkowski's inequality, 18
 moment method, 6, 95–101
 Mood, 135, 136, 138, 196

 Narayana, 139, 149, 198
 Nedoma, 117, 119, 122, 196
 Newton, 150
 Newton–Raphson method, 4, 150, 151–2
 non-Markov stochastic process, 5
 non-parametric, 5
 non-parametric up-and-down method, 6, 143–7
 numerical analysis, 1, 4; iteration techniques of, 150–4

 Odell, 29, 33, 198
 one-dimensional stochastic approximation, 13–19, 66, 80
 optimum choice, 40–7
 Ostrowski, 150, 151, 198

 Perrin, 63, 198
 pharmacology, 6, 57, 63, 80
 pre-Newton–Raphson method, 150–1
 probit analysis, 4
 process control, 57–8
 proportional control procedures, 59–61

 quantal response, 57, 72–5, 112, 142

 random circuits, 91
 Rankits, 6, 139–42
 recursion, relation, 52
 regression function, 3, 5, 63–6, 77, 119
 reliability, 6, 57, 67–72
 response-no-response analysis, 5, 8–13, 74
 Robbins, 163
 Robbins–Munro method, 5, 8–35, 57, 63, 64, 66, 74, 75, 76–80, 198
 Root, 196
 Rosenblatt, 142, 195

 Sacks, 13, 35, 95, 101, 155, 164, 183, 184, 187, 188, 189, 193, 196, 198
 Sakrison, 126, 131, 132, 134, 198
 Savage, 1, 197
 Schalkwijk, 95, 198
 Schmetterer, 198
 sequential stopping rules, 5
 small sample theory, 6, 8, 27–8; up-and-down method, 142–3
 stochastic matrix, 139

 Traub, 150, 198
 two-stage method, 28

 uniformly bounded, 15, 39, 160
 uniformly convergent, 15
 up-and-down method, 1, 3, 6, 135–49

 Venter, 30, 55, 56, 67, 73, 92, 94, 112, 174, 185, 193, 194, 199

 Wasan, 199
 Wetherill, 57, 75, 199
 Wilson, 195
 Wolfowitz, 6, 13, 36–56, 88–91, 117, 125–30, 199
