 assumptions in project of, 55–61  
 causes of failure to accomplish purpose, 127–9  
 changes in British NHS, 243–6  
 changes in Swedish health care system, 247  
 complier-centered strategy for, 78–87  
 conscious and intentional, 210–13  
 criteria for, 37–43  
 economic theory of, 256  
 in Germany and post-Communist Eastern European countries, 211–13, 216–19  
 institutional reshaping, 121–22  
 morality in, 141–52  
 for noncompliant, self-interested individual, 71–8  
 potentially relevant cases, 59–60  
 principles of, 39–43  
 publicity principle as proposition of, 156–7  
 rational, 70–87  
 for redesign, 209  
 for relatively nonegocentric individual, 78–9  
 sanctions to avoid, 83  
 trends in, 249–50  
 designer capitalism paradox, 215–16

## SUBJECT INDEX

283

- design logic, formal  
 argument against regulation, 111–12  
 of institutions, 105, 110  
 design logic, informal  
 critique as approach to institutional design, 118–20  
 institutions, 106, 110  
 design theory  
 optimal designs, 30–7  
 uses for, 55–60  
 deterrence paradox, 163  
 deviant-centered strategy  
 problems of, 87  
 in rational institutional design, 72–8  
 difference principle (Rawls), 218  
 discourses  
 associated with incentive and regulatory instruments, 110–11  
 defined, 103–4, 109  
 of democracy in United States, 115–19  
 effect of formal designs on, 112  
 elements of politically interesting, 109–10  
 explicated by critique, 118  
 in formal institutional design logic, 105  
 hegemony of dominant, 113–18  
 on origins of institutions, 214–15  
 relation to institutions, 103–4  
 discretion  
 of actors in market and nonmarket operations, 260  
 in deal making, 229–30, 238–9  
 dynamic systems, 97–101  
 East Central Europe, 15  
 design of new institutions, 212–13  
 institutional imitation, 216–17  
 political culture, 211–12  
 economic gain, 64–5  
 economics  
 anti-institutional neoclassical, 8  
 incentive schemes, 108–11  
 institutional, 7–11  
 institutions in, 22  
 mechanism design in, 32  
 economic theory  
 of institutional design, 256  
 of politics, 256  
 education institutions, 22  
 effectiveness, institutional, 200–1  
 electoral process, 260–2  
 endowments of agents in deal making, 228  
 enforcement  
 in deals, 238–9  
 institutional stability-enforcing mechanisms, 208–9  
 of institutions, 204–5  
 equality, 218–19  
 European Community (EC), 15, 26  
 evolution, institutional, 26–7  
 exchange theory, 61  
 extensive form game  
 deal-making technology as, 228  
 government formation process as, 236–7  
 factor analysis, Q sorts, 114  
 fallacy of continuity, 94  
 fallacy of stretchability, 94  
 family, 3, 6, 22  
 Federalist theory, 260–2  
 first best benchmark, 92–3  
 forecasting (in deal making), 230  
 game theory  
 in analysis of politics, 14  
 extensive form game, 228, 236–7  
 Prisoner's Dilemma, 14, 71  
 goodness of fit criterion, 37–9  
 goods, 64  
 health care system, United Kingdom, 242–5  
 hedonism paradox, 165  
 hegemony  
 of dominant discourses, 113–18  
 of successful institutions, 200  
 history, 2–4, 10–11, 18, 19  
 hyperrationality, 217  
 hypocrisy in politics, 164–65  
 imitation  
 in design of new East European institutions, 213  
 as device of institutional innovation, 213–14  
 in East European choices of institutions, 216–17  
 incentives  
 as assumption in institutional design, 56  
 in economic theory of institutional design, 256  
 instruments to alter, 57  
 in internal market system, 248–9  
 perverse, 173–4

- incentives (*cont.*)  
 for pollution control, 108–12  
 theories of representative democracy, 260–2
- incentive structures  
 for agents to operate in public interest, 258–9  
 superior to regulatory systems, 107–8
- incompatibility, 172–6
- institutionalism, 22
- institutionalism, new  
 in economics, 7–11, 23  
 in history, 2–4  
 in political science, 11–16, 23  
 propositions consolidated, 19–20  
 in social theory, 16–19  
 in sociology, 4–7
- institutionalization, 147–8
- institutional reform, Britain, 240–53
- institutions  
 causes in failure to accomplish purpose, 127–9  
 characteristics of formal and informal design logic, 105–6  
 as constraints in agents and groups, 11, 19–20  
 constraints on reshaping of, 116–23  
 criteria of existence and viability, 200–1  
 cultural, 22  
 differences from organizations, 203  
 emergence and change, 24–37  
 functions of, 202–7  
 Humean method to analyse, 260  
 moral theory, 152  
 principle of design for, 39–43  
 purposes of, 136–41  
 relationship with social norms, 199–200  
 role of, 23  
 second best theories related to, 101  
 social activities included in, 22  
 transformation in East Central Europe, 211–12  
 value of, 142
- institutions, nonmarket  
 market operation in, 259  
 reliance on virtue in, 259–60
- institutions, social  
 definition of, 21–4  
 design principles for, 37–43  
 forms and functions, 20–4  
 rise and change of, 24–37
- intentionality  
*See also* selection device
- in design of institutions, 27–30  
 in institutional design, 28–30  
 in social change, 24–30
- intervention  
 in complier-centered, rational-institution strategy, 79–87  
 in deviant-centered, rational-institution strategy, 72–8  
 in institutional design, 55  
 shaping of discourse through, 103, 105
- judicial decision making, Yale argument, 157–62
- judicial process  
 Platonic view, 160–1  
 publicity principle argument for candor, 159  
 publicity test (Posner) related to candor, 159
- jury nullification, 183–4
- justice  
 importance in relation to order, 160–1  
 public justice argument (Kant), 179–80
- knaves  
 in complier-centered, rational-institution strategy, 85–7  
 in deviant-centered, rational-institution strategy, 72–8
- knowledge  
 effect of mutual knowledge on institutional functions, 205–6  
 general, 169–79  
 mutual knowledge as publicity, 170, 181
- law  
 difference from other institutions, 141  
 enforcement of legal rules, 134–5  
 Kant's philosophy of, 181  
 morality of, 129  
 publicity principle test of moral wrongness, 171, 181–2  
 purposes of, 136–41  
 transcendental formula of public (Kant), 155–6  
 use of moral rules in, 135–6  
 legal system transparency, 159–60
- liberalism  
 described, 18  
 as discourse of democracy, 116–17

## SUBJECT INDEX

285

- markets  
*See also* mimic markets  
 academic, 262–73  
 idealized free market, 256  
 managed, 252–3  
 mechanism in welfare economics, 259  
 need for trust in, 260  
 in pollution control, 108–10  
 second-best problems of, 93–4
- maxims  
 circumstances for publicizing as test of morality, 191–2  
 as general rules of action (Kant), 168–9  
 incompatibility with publicity, 172–6  
 necessary and general opposition to public policy (Kant), 174, 176  
 politically suicidal if publicized, 175–6  
 publicity principle as test of, 171  
 self-frustrating public policy (Kant), 172–4, 176, 191–2  
 testing second-order, 189  
 test of categorical imperative (Kant), 181  
 unpopular if publicized, 174–6
- mechanism design (economics and politics), 32–3
- mimic markets  
 in British educational system, 248–9  
 within British National Health Service, 243–6  
 defined, 241  
 as managed markets, 252–3
- moral autonomy, 119–20
- morality  
*See also* rules, moral  
 built into institution, 128  
 in design criteria, 37–9  
 institutional teaching of, 150  
 Kant's categorical imperative, 181  
 of the law, 129, 134–6  
 of officeholders in an institution, 127  
 public, 167  
 publicity principle as test for, 191–2
- morality, individual  
 in institutional setting, 141–52  
 publicity principle as proposition of, 156
- morality, institutional  
 individual morality within, 141–52  
 internal, 129, 151–2  
 problems of, 127  
 purpose and effects of, 126–7  
 rules governing actions, 143  
 violation of understanding of, 151
- morality, political  
 hypocrisy, 164–5  
 publicity principle as proposition of, 156
- moral theory of institutions, 152
- National Health Service, United Kingdom, 243–6
- neoclassical economics, 7–10
- nuclear weapons  
 Clausewitzian theory argument, 162–3  
 pure deterrence theory argument, 162–3
- opportunities  
 of agents in deal making, 228  
 as assumption in institutional design, 56  
 in deals for reneging, 238  
 in extensive form game of government formation, 236–7  
 instruments to alter, 57
- optimality  
 of design criteria, 37–9  
 Pareto, 32–3, 92
- order  
 established by institutions, 204  
 importance in relation to justice, 160–1
- Organisation for Economic Cooperation and Development (OECD), 250
- organizations  
 for achievement of purposes, 142  
 capacity to transcend individual capacity, 151  
 differences from institutions, 203  
 moral and legal rules for problem handling, 143  
 purposes of, 137–41  
 rules for handling problems, 143
- Pareto optimality, 32–3, 92
- passive virtues theory, 158, 173
- path dependency, 208
- penalties as form of sanctions, 57
- performance  
 employer monitoring of employee, 273  
 institutional design relation to, 54–61  
 pattern of reward currency according to academic, 263–5, 272–3
- personalism, 147–8
- pluralism as normative theory, 117
- political culture, East European, 211–12
- political philosophy, 17–19

- political science  
 behavior related to institutions, 12–15  
 importance of institutions, 15–16  
 public choice theory in, 11–12
- politics  
 deal-making in, 238  
 economic theory of, 256  
 institutions in, 22  
 mechanism design in, 32–3  
 rational-actor analysis of, 14  
 pollution control design, 107–12  
 populism, disaffected, 115–18  
 power, 15–16, 20  
 preferences  
*See also* revealed preference theory  
 of academics for different forms of income, 268–72  
 of agents in deal making, 228  
 in extensive form game of government formation, 236–7  
 self-interested, 63–4  
 Prisoner's Dilemma, 14, 71  
 public choice theory  
 economics and political science in, 11–12  
 incentives and selection processes according to, 260–2  
 to interpret regulatory choices, 111–12  
 rational choice theory in, 61  
 publicity  
 in attempted repair of socialist institutions, 221–3  
 in categorical imperative (Kant), 181–2  
 effect on self-frustrating policy or maxim, 172–4  
 as general knowledge, 169–70  
 as mutual knowledge, 170, 171–2  
 political significance in critical debate, 170–1  
 publicity principle  
 applied to views of legal decision making, 159–62  
 argument against judicial subterfuge, 159  
 defense of, 188–96  
 hypocrisy of politicians inconsistent with, 165  
 of institutional design, 41–2  
 in Kant's transcendental formula of law, 155–7  
 mercy argument against, 183–4  
 moral law as categorical imperative, 180–2  
 as principle of rational skepticism, 195  
 public justice argument (Kant), 179–80  
 public law argument (Kant), 177–8  
 pure deterrence theory survival with, 164  
 restricted to maxims (Kant), 168–9  
 rule of law argument (Kant), 178–9  
 shielding the righteous argument against, 186–7  
 sunseting argument against, 185  
 as test of maxims (Kant), 171–6, 181–2  
 as tool for moral criticism of public policy, 157  
 Victorian compromise as argument against, 186  
 publicity test, 159  
 public policy  
 ability to withstand publicity, 157  
 application of publicity principle to, 172–6, 192–6  
 design of, 31–2  
 mimic or quasi-markets in, 241, 243–6, 248–9, 252–3  
 publicity principle as test of (Kant), 171–2  
 publicity principle as tool to criticize, 157  
 pure deterrence theory in nuclear weapons policy, 163–4  
 when incompatible with publicity, 172–6  
 pure deterrence theory, 162–4
- Q methodology  
 described, 113  
 with discourse analysis, 113–18
- rational choice theory  
 in academic markets, 262–73  
 alternate interpretation of, 66–70  
 central postulates (Harsanyi formula), 62–5  
 described, 61–2  
 deviant-centered strategy in context of, 72–3  
 explanation of noncompliant behavior, 71  
 interpretation in market and nonmarket contexts, 69  
 logic of collective action, 132
- rationality  
 distinct from rational choice theory, 61–2

## SUBJECT INDEX

287

- Humean interpretation, 62–3  
 relation of full autonomy concept to  
 communicative, 120  
 rational skepticism principle, 195  
 regulatory systems, 107–8  
 republicanism, contented, 115–18  
 reputational models (deal-making),  
 229–30  
 responsibility  
 as causal notion, 130  
 individual, 138–41  
 institutional, 126  
 legal model of, 134  
 rules for assignment of, 133–6  
 responsibility, collective  
 in collective action, 131–4  
 individual responsibility in, 135–6  
 in institution, 128–31  
 revealed preference theory, 63–4  
 revisability, 40  
 reward currency  
 academic, 263–73  
 generalizations, 273–4  
 rewards  
 academic piece rate system of,  
 263–7  
 currency of reward in academic  
 selection process, 263, 265–70  
 differences in academic institutions'  
 currency of, 272–3  
 in institutional design, 57  
 rigidity, institutional, 206–7  
 R methodology, 113  
 robustness, 40–1  
 rules  
 for assignment of responsibility,  
 133–6  
 changes in initial, 94  
 for changing institutional rules,  
 209  
 deference to legal, 160  
 maxims as general (Kant), 168–9  
 nested rules in institutional  
 hierarchy, 23  
 rule of law argument (Kant), 178–9  
 second best theory with changes in,  
 94–101  
 triadic nature of institutional, 203–4  
 rules, legal  
 enforcement of, 134–5  
 for handling problems of  
 organizations, 143  
 rules, moral  
 enforcement of, 135  
 for handling problems of  
 organizations, 143  
 sanctions  
 absence of, 82  
 in complier-centered, rational-  
 institution strategy, 78–87  
 in deviant-centered, rational-  
 institution strategy, 72–8  
 forms and operation of, 57–8  
 imposed in escalating hierarchy,  
 86  
 screening to avoid, 79–81  
 screening device  
 operation in institutional design, 58–  
 9, 258  
 sanctions in addition to, 82  
 for self-interest in institutional  
 design, 79–81  
 second best theory  
 effect on institutions, 91  
 effect on output with changes in  
 initial conditions, 95–8  
 effect on output with changes in  
 rules, 98–101  
 implications of, 93–4  
 selection device  
 currency of reward as, 263–73  
 to detect virtue, 260  
 Humean methods to analyse, 258,  
 260  
 in idealized market, 259  
 in institutional design, 28–34  
 in social change, 25–7  
 theories of representative democracy,  
 260–2  
 selection process  
 of academics by university, 264  
 based on performance, 273  
 currency of reward in academic, 263,  
 265–70  
 model of academic, 265–7  
 optimal tax argument, 270  
 self-esteem, 64  
 self-interest  
 in alternate interpretation of rational  
 choice theory, 66–70  
 behavior related to, 64–5  
 circumstances for agents', 68–9  
 in complier-centered, rational-  
 institution strategy, 78–87  
 in deviant-centered, rational-  
 institution strategy, 72–8  
 in economic gain and social  
 acceptance, 64–5  
 influence in market and nonmarket  
 contexts, 69  
 influence on noncompliant behavior,  
 71

- self-interest (*cont.*)  
 preferences, 63–4  
 in rational choice theory, 62–5, 71  
 self-inventing institutions, 240–1, 245–6, 248–9, 252–3  
 sensitivity to motivational complexity, 41  
 signaling effect  
 in complier-centered, rational-institution strategy, 83  
 in deviant-centered, rational-institution strategy, 76  
 skepticism  
*See also* rational skepticism principle  
 in design of institutions, 214  
 social acceptance  
 economic gain for, 65  
 self-interest in desire for, 64–5  
 social change, 24–5  
 social choice  
 comparability in, 232–3  
 social ordering (Arrow), 232  
 socialist institutions, 221–2  
 socialization  
 effect of institutional, 208–9  
 as institutional function, 5–7, 17, 199–201  
 social norms, 199–200  
 social theory, 16–19  
 sociology, 4–7  
 stability (of institutions), 21–2, 207–10  
 stretchability, 94–5  
*See also* fallacy of stretchability  
 structure, 1–7, 9, 16–17  
*See also* incentive structures  
 structure-induced equilibrium concept, 233–8  
 survival strategies, institutional, 220–1  
 system design, 33–4  
 system integration, 222
- Thatcher administration, Britain  
 changes in educational system, 248–9  
 introduction of market system in National Health Service, 243–6
- triadic, or embedded nature (of institutions), 203–4  
 trust, 260
- U.K. Secretary of State for Health, 243, 249  
 universalizability  
 of categorical imperative (Kant), 181  
 moral demand and moral equality concepts (Kant), 182  
 universal law (Kant), 181–2  
 utilitarianism  
 antiutilitarian argument (Rawls), 167  
 conspiratorial (Sidgwick), 166–7  
 Government House utilitarianism, 165–6  
 inconsistent with publicity principle, 167  
 moral theory of, 165–6
- variability (in institutional design), 42–3  
 Victorian compromise, 186  
 virtue  
 in nonmarket institutions, 259–60  
 selecting for, 260  
 virtue realism  
 in agents' pursuit of public interest, 257–9  
 reliance in nonmarket institutions on, 259  
 virtue theory, 127  
 voting  
 outcomes with changes in initial rules, 95–6  
 outcomes with dynamic system changes, 98–101  
 theories related to selection and incentives, 260–2
- welfare economics  
 internal market system, 240–8  
 market mechanism in, 259  
 in neoclassical economics, 8  
 second best problems in markets, 93–4
