

Index

- action at a distance 68
 Albert, D. xvi, 164, 170, 176, 209, 219, 221–2, 237
 Aspect, A. 69
 atom in a Boolean algebra 18, 20

 Bacciagaluppi, G. x, xii, xvi, 175–7
 Ballentine, L.E. 70
 bare theory 219–26
 Barrett, J. xvi, 219, 222
 basis in Hilbert space 249
 Bauer, L. xiv, 258
 ‘beable’ 31–2, 117, 131, 134, 163, 170–2, 190–1
 beam splitter experiment 188–90
 ‘being-thus’ 4, 41, 43, 45, 58, 69, 172
 Belinfante xiv
 Bell, J.L. 82
 Bell, J.S. xiv, xvi, 2, 5–6, 8, 31, 41, 45–7, 52, 57, 59, 64, 68, 70, 73, 75–9, 124, 126, 131, 134, 136–7, 139–40, 149, 158, 163–4, 170–1, 180, 207, 219, 234, 238
 Beller, M. 193
 Bell’s inequality 52, 59, 68, 70
 Bell’s (locality) theorem 41, 46–7, 57, 64, 76, 78–9
 Bell’s ‘other’ theorem 46–7
 Bell–Vink dynamics, Bell–Vink equations of motion 134, 140, 180, 234
 Berndl, K. 140
 Beth, E. 82
 biorthogonal (Schmidt) decomposition theorem 267
 Bohm, D. x, xiii–xv, 2–3, 6, 44–6, 118, 124, 126, 134, 136–8, 140–1, 158, 163–5, 167–73, 175, 179–80, 188, 190, 196, 224, 234–9
 Bohm–Bub hidden variable theory xiv, 2
 Bohmian mechanics x, xvi, 140–1, 163–73, 175, 179–80, 188, 190, 237
 Bohm’s causal interpretation 3, 6, 118, 126, 134, 158, 163, 170, 224, 234
 Bohm’s (1952) hidden variable theory xiii–xv, 3, 6, 45–6, 141, 168, 170, 172–5, 240, 242, 244
 Bohr, N. xi, xv xvi, 3–4, 6, 8, 11–12, 38, 118, 126, 171–2, 184–6, 190–9, 207, 218
 Bond, J. 54, 56–8
 Boolean algebra (lattice) 15, 18, 20
 Boolean homomorphism 30
 Borel (sub)set 15

 Born, M. 10–11, 31, 41, 45, 71, 126, 140–1, 184, 238, 247, 252
 Born rule 252
 Brown, H. xvi, 34, 46–7, 232
 Bub, J. xiv–xvi, 1, 2, 76, 115, 118, 124, 128, 159, 173, 181, 221
 Butterfield, J. xvi, 47

 Cabello, A. 101, 119
 causality condition (van Fraassen) 66, 68
 characteristic function 15
 classical state 13, 17, 22
 classical tautology 5, 80–2, 84, 87, 89, 102–4, 109–14
 classical world 5, 120, 171, 184, 236
 Clauser, J.F. 47, 52, 57
 Clauser–Horne inequalities 52, 57, 69
 Clavadetscher–Seeberger, E. 83
 Clifton, R. x, xii, xv, xvi, 1, 47, 68–9, 83, 87, 98, 100–1, 115, 119, 128, 136, 159, 165, 174–5, 177–81, 221, 238
 closed linear manifold 243
 coarse-grained history 230
 colouring problem 71–82, 101
 commeasureable observables 75
 common cause 52, 55–8, 61, 64–6, 68–70
 commutant 122
 commutation relation 258
 commutator 23
 commuting operators 252
 compatible observables 252
 complement
 in a Boolean algebra 17, 20
 in a lattice 19
 complementarity xvi, 3, 6, 118, 126, 190–9
 complete orthonormal set of vectors 242, 245
 completeness condition (Jarrett) 65–6, 68–9
 completeness of Hilbert space 246
 completeness theorem for classical sentential logic 21
 completion of quantum mechanics 4, 45–6, 58, 172, 235
 composite systems in quantum mechanics 263–7
 conditional statistical independence 52, 55, 57, 59, 64, 66, 68
 see also factorizability
 configuration space 3

- consistent histories 6, 207, 227–31
 constrained locality 69
 continuity equation 134–5
 continuous spectrum 247
 convergent sequence of vectors 246
 convex set 248
 Conway, J. 83, 92, 95, 101, 119
 Copenhagen interpretation 3–4, 6, 9, 10, 12,
 184–99, 207, 218, 231
 criterion of reality (EPR) 42, 47–8, 51–2, 58
 critical configuration 101
 Cushing, J. 164
 cyclical invariance of the trace 249
- Daneri, A. 2
 Daneri–Loinger–Prosperi quantum ergodic theory
 of macrosystems 2
 de Broglie, L. xi
 decoherence 2, 6, 154, 207–18
 decoherence functional 229
 decoherent histories, decohering histories 6, 229
 definite operator 249
 degenerate eigenvalue 245
 degenerate observable, degenerate operator 245
 delta function 255
 Demopoulos, W. xv
 density operator 257
 d’Espagnat, B. 196, 214
 detached observer 11–12, 186
 determinate sublattice 5, 6, 120–5, 131, 140, 164,
 171–2, 174, 180, 233
 determinism 4, 11, 59
 deterministic hidden variables 58–64
 Deutsch, D. 219

Stern–Gerlach measurement 32, 144–5, 152–3, 157, 163, 166–7, 169, 211
stochastic dynamical 'collapse' theory 3
stochastic hidden variables 52–8
Stone, M.H. 21
Stone's representation theorem 21
Stone space 21, 233
strong locality 55, 64
subspace 243
superluminal signalling 68
superposition 245, 256, 263
superselection rule 212
Suppes, P. 66
support of a quantum state 136
supremum 16
surface probabilities 65
Svozil, K. 83
Swift, A.R. 166
synchronic 13, 17, 22, 28
tensor product 263
Tiomno, J. 164
Tkadlec, J. 83
trace 249
 partial 264
tracing out 154, 226
transition matrix 136
triangle inequality 241
tridecompositional theorem 151–5, 159–62, 216
triorthogonal decompositional theorem 151–5, 159–62, 215
triplet state 267
truth and probability condition (TP) 127
2-valued homomorphism 20, 22
ultrafilter 20, 21
umbrella 123
uncertainty principle 3, 8, 184, 186
uniqueness theorem xv, xvi, 1, 5–6, 126–36, 170, 172, 179–81, 234
unitary evolution, unitary transformation 254
unitary operator 254
unsharp observable 149
Valentini, A. 140, 238
value state 14, 173
van Fraassen, B. xv, xvi, 3, 14, 65–6, 68, 118, 173, 177, 238
vector in Hilbert space 239–43
Vermaas, P. 173–5, 238
Vigier, J.-P. 164
Vink, J. 6, 126, 134–5, 137, 180, 234, 238
von Neumann, J. xi, xv, 1–6, 23, 28–9, 32, 34, 36–8, 41–2, 46–7, 51, 57–8, 75, 115, 117–18, 132, 188, 197–9, 216, 218, 221, 235, 250, 257–8, 266
von Neumann's 'process 1' 34, 35–6
von Neumann's 'process 2' 34, 35–6
von Neumann's solution to the measurement problem 34–8
wave function 256
wave–particle duality 8, 232
weak separability 172
Weber, T. 2, 118
Wheeler, J.A. 9, 12, 185–6
Whitehead, A.N. xv
Whiteman, J.H.M. xiii
Whitrow, G.J. xiii
Wiener, N. xiv
Wiener–Siegel 'differential space' theory xiv
Wigner, E. 185–6, 217, 221
Wigner's friend argument 221
Wright, R. 166
Zanghi, N. 140, 164
Zanotti, M. 66
Zeh, H.D. 207, 213
Zeilinger, A. 47–52, 57–8, 78, 95
Zimba, J. x, 94, 101, 119
Zurek, W. 9, 126, 152–5, 207, 211–13, 216–18, 220
