<i>List of figures</i>	xi
<i>List of tables</i>	xiii
<i>Preface</i>	xiv
<b>1 Introduction</b>	1
1.1 Innovations in tunnelling technology	4
1.2 Source materials	6
1.3 Units of dimensions and technical terminology	10
1.4 The modern tunnelling industry	11
1.5 Some general remarks on technical innovation	15
1.6 Ancient tunnelling	18
<i>Notes and references for Chapter 1</i>	24
<b>2 Compressed air rock drilling machines</b>	28
2.1 The need for hard rock tunnels	28
2.2 The traditional method of hard rock tunnelling	31
2.3 The Hoosac Tunnel	34
2.4 The Mont Cenis Tunnel	37
2.5 Rock drilling machines at the Hoosac Tunnel	40
2.6 Rock drilling machines at the Mont Cenis Tunnel	45
2.7 Summary	52
<i>Notes and references for Chapter 2</i>	53
<b>3 Nitroglycerine explosive</b>	55
3.1 Discovery of nitroglycerine	56
3.2 Manufacture of nitroglycerine	57
3.3 Nitroglycerine at the Hoosac Tunnel	59
3.4 Dynamite	62
3.5 Summary	66
<i>Notes and references for Chapter 3</i>	67

viii	Contents	
<b>4 Tungsten carbide drill bits</b>		70
4.1 Discovery of tungsten carbide		71
4.2 Sintered tungsten carbide		73
4.3 Development of sintered tungsten carbide drill bits		74
4.4 Use of sintered tungsten carbide drill bits		75
4.5 Sharpening tungsten carbide		78
4.6 Summary		80
	<i>Notes and references for Chapter 4</i>	80
<b>5 Hydraulic rock drilling machines</b>		82
5.1 The Brandt hydraulic rock drill		85
5.2 Modern hydraulic rock drills		89
5.3 Atlas Copco hydraulic rock drill		91
5.4 Wyresdale and Megget Tunnels		93
5.5 Summary		94
	<i>Notes and references for Chapter 5</i>	95
<b>6 Tunnelling shields</b>		97
6.1 The need for soft ground tunnels		97
6.2 The traditional method of soft ground tunnelling		103
6.3 Early attempts to tunnel beneath the Thames		104
6.4 The Thames Tunnel		107
6.5 Brunel's tunnelling shield		110
6.6 Brunel's patent		115
6.7 The Tower Subway		116
6.8 The Barlow–Greathead shield		118
6.9 Barlow's patents		121
6.10 The St Clair River Tunnel shield		123
6.11 Summary		125
	<i>Notes and references for Chapter 6</i>	126
<b>7 Compressed air tunnelling</b>		129
7.1 Cochrane's patent		131
7.2 The Kattendyk Tunnel, Antwerp		136
7.3 The first Hudson River Tunnel		137
7.4 The St Clair River Tunnel		138
7.5 The City and South London Railway		139
7.6 Disadvantages of compressed air tunnelling		143
7.7 The diving bell		149
7.8 Summary		150
	<i>Notes and references for Chapter 7</i>	151

Cambridge University Press

0521673356 - Innovation and the Rise of the Tunnelling Industry

Graham West

Table of Contents

[More information](#)

Contents	ix
<b>8 Prefabricated tunnel linings</b>	153
8.1 The Metropolitan Railway and the problem of subsistence	154
8.2 Lining used on the City and South London Railway	156
8.3 Greathead's grout pan	158
8.4 Colliery shaft lining	160
8.5 The McAlpine lining	161
8.6 Precast concrete lining used on the Ilford tube	163
8.7 The wedge-block lining	166
8.8 Summary	172
<i>Notes and references for Chapter 8</i>	173
<b>9 Pressurised face tunnelling shields</b>	175
9.1 The hydraulic shield	176
9.2 Shields with compressed air in the face	179
9.3 The Universal soft ground tunnelling machine	181
9.4 The bentonite tunnelling machine	183
9.5 The Hydrosshield	188
9.6 The earth pressure balanced shield	191
9.7 Japanese pressurised face tunnelling shields	195
9.8 Summary	199
<i>Notes and references for Chapter 9</i>	200
<b>10 Immersed tube tunnels</b>	202
10.1 Trevithick's idea for a subaqueous cut-and-cover tunnel	202
10.2 Wyatt and Hawkins' immersed tube tunnel	204
10.3 Waterloo and Whitehall Pneumatic Railway	209
10.4 The Detroit River Tunnel	209
10.5 Subsequent development	213
10.6 Immersed tube tunnel for Hong Kong railway	217
10.7 A use for hydrostatic pressure	218
10.8 Unburied immersed tube tunnels	220
10.9 Summary	222
<i>Notes and references for Chapter 10</i>	223
<b>11 Hard rock tunnelling machines</b>	226
11.1 Mont Cenis and Hoosac tunnelling machines	227
11.2 The Channel Tunnel	232
11.3 Brunton and Trier's stone dressing machine	236
11.4 Brunton's tunnelling machine	239
11.5 The Beaumont-English tunnelling machine	243
11.6 Whitaker's tunnelling machine	249

x	Contents	
11.7	The Oahe Dam tunnelling machines	254
11.8	Later developments	258
11.9	Roadheaders	260
11.10	The Selby Tunnels	263
11.11	Summary	266
	<i>Notes and references for Chapter 11</i>	267
<b>12</b>	<b>Soft ground tunnelling machines</b>	<b>271</b>
12.1	The Thomson excavator	273
12.2	The Price rotary tunnelling machine	276
12.3	The Kinnear Moodie drum digger	281
12.4	The Victoria Line	282
12.5	Later developments	286
12.6	The Mini Tunnel	288
12.7	Summary	291
	<i>Notes and references for Chapter 12</i>	292
<b>13</b>	<b>Other developments</b>	<b>294</b>
13.1	Pipe jacking	294
13.2	The Unitunnel	297
13.3	The laser	302
13.4	Extruded linings	304
13.5	New primary lining methods	307
13.6	Composite tunnelling machines	309
13.7	Innovation in tunnelling in modern Japan	313
	<i>Notes and references for Chapter 13</i>	318
<b>14</b>	<b>Conclusion</b>	<b>323</b>
14.1	General observations on technical innovation	323
14.2	Origins of the innovations	333
14.3	The classification system and its uses	337
	<i>Notes and references for Chapter 14</i>	343
	<b>Glossary</b>	<b>346</b>
	<i>Tunnelling terms</i>	346
	<i>Geological terms</i>	348
	<i>Acknowledgment of sources of figures</i>	350
	<i>Index</i>	351
