

Contents

<i>Participants</i>	vii
<i>Preface</i>	xi
Emission Lines: Past and Future	
<i>L. Woltjer</i>	1
Atomic Data for the Analysis of Emission Lines	
<i>A. Pradhan and J. Peng</i>	8
Radiative Transfer	
<i>D. Hummer</i>	35
Emission Lines from Winds	
<i>J. Drew</i>	49
Photoionizing Shocks	
<i>M. Dopita</i>	65
The Lexington Benchmarks for Numerical Simulations of Nebulae	
<i>G. Ferland et al.</i>	83
Emission Line Diagnostics	
<i>H. Netzer</i>	97
Ultraviolet Spectroscopy	
<i>R. Dufour</i>	107
Infrared Emission Lines as Probes of Gaseous Nebulae	
<i>H. Dinerstein</i>	134
Molecular Emission Line Diagnostics in Astrophysical Environments	
<i>A. Dalgarno</i>	158
Abundance Determinations	
<i>M. Peimbert</i>	165
Astrophysical Gamma Ray Emission Lines	
<i>R. Ramaty and R. Lingenfelter</i>	180
Summary Remarks	
<i>V. Trimble</i>	214
