While the advice and information in this publication is believed to be true and accurate, neither the authors nor the publisher can accept responsibility or liability for any loss or damage arising from actions or decisions based in this publication. The ultimate responsibility for treatment of patients and the interpretation lies with the medical practitioner. The opinions expressed are those of the author and the inclusion in the publication of information relating to a particular product, method or technique does not amount to an endorsement of its value or quality, or of the claims made of it by its manufacturers. Every effort has been made to check drug dosages; however, it is still possible that errors have occurred. Furthermore, dosage schedules are constantly being revised and new side effects recognised. For these reasons, the medical practitioners are strongly urged to consult the drug companies’ printed instructions before administering any of the drugs mentioned in this publication.
