microbiology, 248
operative factors
draping, 255–256
duration of operation, 255
skin disinfection, 254
staff movement, 255
surgical hand scrub, 252, 253
surgical technique, 253
theatre wear, 254–255
wound drains, 255
pre-operative factors
risk factors, 248
postoperative factors
antibiotic prophylaxis, 251
pre-operative shaving, 251
pre-operative showers, 248
wound dressing, 256
surveillance of SSI, 245
wound classification, 249
Surveillance
advantages and disadvantages, 31
methods, 29, 31
Syphilis, 111

T

Tacky mats, 256
Terminal cleaning of room, 75
Tetanus, 112
Theatre
See operating theatre
Theatre wear, 253
Thermometers, 88
Threadworms, 112
Toilet seats, 88
Toxicara, 112
Toxoplasmosis, 112
Toys, 88
Tooth mugs, 88
Transplant patients
infection in, 98, 114
Transient microorganisms, 229–230
Transmission
mode of
airborne transmission, 5, 96
contact transmission, 5, 97
droplet transmission, 5, 97
Trichomoniasis, 112
Trichuriasis, 112
Trichosan, 62, 65, 125
Trolleys, 89
Tuberculosis, 112
atypical mycobacteria, isolation, 141
clinical manifestations, 137
contact tracing, 144–145
duration of isolation, 140
incubation period, 139
infection control precautions, 140–142
mode of transmission, 138
multi-drug resistant tuberculosis, 143
negative pressure isolation room, 21
pre-employment screening, 213–215
risk factors, 139
treatment, 139
Tubing, anaesthetic/ventilator, 89
Two-by-two contingency table, 44
Typhoid and paratyphoid fever, 112

U

Ultrasound equipment, 89
Urinals, 89
Urinary catheterization
antibiotic, prophylactic and treatment, 279
bladder irrigation, 278
catheter material, 274
catheter size, 274
drainage bag, 274
emptying the drainage bag, 276
incidence of, 27
meatal care, 274
policy and staff training, 279
prevention of bacterial colonization, 277
procedure for urinary catheterization, 275
removal of catheter, 278
specimen collection, 278
use of antimicrobial agents, 278–279

V
Vancomycin resistant enterococci (VRE)
infected control measures, 130–131
mode of transmission, 130
risk factors, 130
screening of patients, 132
source of infection, 130
Varicella/varicella zoster
clinical features, 165
infection control measures, 166
neonates, 167
period of infectivity, 165
pregnant women, 167
pregnant staff, 217–218
susceptible patients, 166–167
transmission, 165
Varicella zoster immunoglobulin (VZIG), 166–167
Ventilation and air conditioning, 23
Ventilators, 89, 289
Vibrio cholerae, 157
Vibrio parahaemolyticus, 157
Vincent’s angina, 112
Viral haemorrhagic fevers, 175
clinical manifestations, 175
diagnosis, 175
incubation period, 176
infection control precautions, 177
laboratory investigation, 177
management, 177
mode of transmission, 177
notification, 175–176
risk categories, 176
source of infection, 176
Viral hepatitis
See Hepatitis

W
Walls and ceilings, 18
Ward kitchen, 295
Wash basin/sink, 89
Waste disposal
See Clinical waste
Wheel chairs, 89
Whippleworm, 112
Whooping cough, 112
Wound infection
See surgical site infection

X
X-ray equipment, 89

Y
Yellow fever, 112, 118
Yersinia enterocolitica, 115

Z
Z score, 49
Ziehl-Nielsen Stain, 139
