1.1 Before you read the text, answer these questions.

1. Do you prefer to study
   A at school or college  
   B in a library  
   C at home?

2. Do you study best
   A early in the morning  
   B during the day  
   C at night?

3. Do you prefer to work
   A with friends  
   B with background music  
   C in silence?

1.2 Now complete the text with the correct form of the verbs in the box. There may be more than one possible answer so try to use each verb once only.

concentrate   do   learn   overcome   organise   study   take   teach   review   revise

Even the most studious among you will probably have difficulty studying at some stage in your academic career. If or when this happens, the only way to (1)......................... this problem is to go back to basics. First, make sure you have a comfortable environment to (2)......................... in. Some students need to have a quiet space to themselves and can’t (3)......................... if there are too many distractions. Others need some sort of background noise, such as music or the company of friends. Whatever your personal preference is, you need to (4)......................... this first of all. Next, make sure you have all of the equipment or tools that you need. For example, if you are (5)........................ a geography course and you have to (6)......................... about countries and their capital cities then you will need to have your atlas to hand. If you’re (7)......................... your maths homework then be sure to fi  nd your calculator, ruler, protractor and compass before you start. Perhaps you’re not preparing a homework assignment or project, but are trying to (8)......................... for an exam. If so, you need to know exactly what is on your curriculum. You should also (9)......................... your notes and make sure that you have a clear understanding of what your lecturers have (10)......................... you. Of course, people with a learning disorder such as dyslexia may need to work harder than others at their studies as they often struggle to read even relatively simple texts.

1.3 Now read the text again and fi  nd a word or phrase to match these defi nitions.

1 describes someone who studies a lot  
2 things that stop you from working  
3 a sound you can hear, but do not actively listen to  
4 two different types of homework or school task  
5 to study for an exam  
6 another word for syllabus  
7 to check your work  
8 to do something with great diffi  culty
1.4 Underline the correct words in each sentence.

1. I would really like to **learn about** / **study about** the ancient Egyptians.

2. We need to **find out** / **know** where to buy the tickets for the concert.

3. I got into trouble at school because I didn’t **know** / **find out** my multiplication tables.

4. I did well in the test because I had **known** / **learned** how to spell all of the words on the list.

5. Excuse me, do you **find out** / **know** where the nearest post office is?

6. It was **difficult** for me to **learn** / **study** at home, because we didn’t have a lot of space.

7. I want to **learn how** / **study how** to drive a car.

8. I think you can only really **learn from** / **learn with** experience.

---

**Error warning**

Know = already have the information; find out = get the information.

Study = learn about a subject through books / a course: I’m studying law; I’m studying for my exams.

We don’t use any other prepositions after study. NOT I am studying about law.

Learn = get new knowledge or skills: I’m learning English; I’m learning to knit. Note that we say you are taking a course, NOT learning a course.

NB Prepositions after learn: learn about, learn from, learn to: I learned a lot from this course. NOT Learned a lot with this course.

**Education**

2.1 Replace the words in italics below with ONE word.

Then listen to the recording and check your answers.

**Teacher** Can you tell me about your early education?

**Student** Well, I went to a school for very young children from the age of four and I remember that I didn’t enjoy it very much at all. My parents couldn’t have afforded to send me to a **free** school so it was a really great opportunity for me. It was a **free** school, so there were no boys. I’m glad I didn’t go to a school for boys and girls school because I think there are fewer distractions so everyone can just concentrate on their studies.

General Training Reading Section 2

Work experience and internship programs

Through our student work experience program, the education authority provides over 9,000 work experience placements for young people each year. Our program is designed to offer employment opportunities for students that will enrich their academic studies and help them gain valuable work-related skills thereby improving their chances of finding a good job after graduation. A placement does not need to be related to a particular field of study and so participants may even discover areas of work they have never considered before.

All secondary and post-secondary school students in full-time education are eligible to apply for the program. Individual case managers will determine the minimum level of academic achievement required for each job. During an academic term, a student may work part-time. During the summer holidays a student may work full-time or part-time. The education authority is responsible for the recruitment of all students under the work experience program. Applicants apply in person to our office and we refer candidates to the appropriate department.

Our internship program is designed specifically for post-secondary students, whether part-time or full-time. Students on the internship program are given an assignment related to their research area offering them the chance to use their academic knowledge in an actual work setting. The academic institution plays an important role in the placement of students under this program and they will determine the duration of a work assignment. These traditionally last four months but internship assignments may vary from 4 to 18 months. Students in this program normally work full-time.

Linguistics

3.1 Read the text and then answer the questions.

**Signs of success**

Deaf people are making a profound contribution to the study of language

Just as biologists rarely see a new species arise, linguists rarely get to discover an unknown dialect or even better, to see a new language being born. But the past few decades have seen an exception. Academics have been able to follow the formation of a new language in Nicaragua. The catch is that it is not a spoken language but, rather, a sign language which arose spontaneously in deaf children.

The thing that makes language different from other means of communication is that it is made of units that can be combined in different ways to create different meanings. In a spoken language these units are words; in a sign language these units are gestures. Ann Senghas, of Columbia University, in New York, is one of the linguists who have been studying the way these have gradually evolved in Nicaraguan Sign Language (NSL).
The language emerged in the late 1970s, at a new school for deaf children. Initially, the children were instructed by teachers who could hear. No one taught them how to sign; they simply worked it out for themselves. By conducting experiments on people who attended the school at various points in its history, Dr Senghas has shown how NSL has become more sophisticated over time. For example, concepts that an older signer uses a single sign for, such as rolling and falling, have been unpacked into separate signs by youngsters. Early users, too, did not develop a way of distinguishing left from right. Dr Senghas showed this by asking signers of different ages to converse about a set of photographs that each could see. One signer had to pick a photograph and describe it. The other had to guess which photograph he was referring to.

When all the photographs contained the same elements, merely arranged differently, older people, who had learned the early form of the language, could neither signal which photo they meant, nor understand the signals of their younger partners. Nor could their younger partners teach them the signs that indicate left and right. The older people clearly understood the concept of left and right, they just could not express it. What intrigues the linguists is that, for a sign language to emerge spontaneously, deaf children must have some inherent tendency to link gestures to meaning.

3.2 Say whether the following statements are true or false. Give an explanation for each answer using words from the text. Then use your dictionary to check the meaning of any words in bold that you do not know.

1. Ann Senghas studies languages.
   True – she’s a linguist.

2. Teachers taught the Nicaraguan deaf children how to use sign language.

3. The earliest form of the sign language was very basic.

4. The older signers were able to show the difference between left and right.

5. Linguists believe that deaf children are born with the ability to link gestures to meaning.

4.1 Think about your answers to these questions.

1. What do you need to do to be a good language learner?
2. What do you think makes a good language teacher?
3. What problems do people experience when they learn your language?

4.2 Look at these answers to the questions in 4.1 and complete them with a suitable word from this unit. Listen to the recording to check your answers.

1. Well, you need to be able to put down your textbooks from time to time and forget about (1).................................................... That’s the only way to become more (2)....................................................... in a language. You also need to (3)....................................................... to (4)....................................................... speakers of the language as much as you can.

2. I think the best language teachers are those who can (5)....................................................... another language themselves. They also need to be able to (6)....................................................... things clearly and in a way that is easy to (7)....................................................... .

3. My (8)....................................................... language is very difficult to learn because of the (9)....................................................... . The individual sounds are very strange to other nationalities and difficult for them to (10)....................................................... .
