Note: page numbers in *italics* refer to figures, tables

- abortive medications 140–141
- abscess, intracranial 45, 48
- acetaminophen
  - episodic tension-type headache 81
  - medication overuse headache 202
- acetazolamide
  - hemiplegic migraine 71
  - idiopathic intracranial hypertension 188
- acetylsalicylic acid
  - episodic tension-type headache 81
  - see also* aspirin
- acute headache 3–5
  - hypertensive 20–25
  - patient evaluation 3–4
  - see also named conditions*
- amitriptyline
  - chronic tension-type headache 147
  - episodic tension-type headache 81
  - post-traumatic headache 216
- analgesics
  - basilar-type migraine 76
  - brain tumors 195
  - chronic tension-type headache 147
  - hemiplegic migraine 70
  - medication overuse headache 202
  - migraine 60–61
  - post-traumatic headache 216
  - see also named drugs*
- angiography
  - cerebral venous sinus thrombosis 172
  - cervical artery dissection 16
  - primary thunderclap headache 40, 43
  - sexual activity-associated headache 121
  - subarachnoid haemorrhage 10
- anticoagulant therapy
  - cerebral venous sinus thrombosis 173
  - cervical artery dissection 17–18
- anticonvulsants
  - basilar-type migraine 72, 77
  - migraine prophylaxis 140
  - SUNCT syndrome 95, 97
  - trigeminal neuralgia 109
  - see also named anticonvulsant drugs*
- antidepressants
  - chronic tension-type headache 147
