### SUBJECT INDEX

**equivalence relations, in animal intelligence**, 312–13  
**Eriksonian approach to wisdom**, 839  
**Erlangen school**, 635  
**ERPs (event-related potentials)**, 14, 91, 385–6  
**essays, analytical**  
**ethnicity**, 71  
**ethical mind**, 71  
**etiology of intellectual disabilities**  
**differentiated versus undifferentiated approaches**, 105  
**profiles related to**, 107–200, 203–4  
**etiology of intelligence**, 85, 100–872. See also biological basis of intelligence; environment; genetics  
**biological causes**, 867–9  
**differentiating heritability estimates**, 89–90  
**dissecting intelligence into componential processes**, 90–4  
**cognitive processes**, 92–4  
**electrophysiological measures**, 90–1  
**overview**, 90  
**speed of information processing**, 91–2  
**environmental causes**  
**overview**, 870  
**physical environment**, 871  
**social environment**, 871–2  
**genome and intelligence**, 88–9  
**information processing**, 869–70  
**overview**, 85, 86  
**search for specific genes involved**  
**genome-wide scans**, 94–5  
**research on specific genes**, 95–100  
**vocabulary related to**, 86–8  
**ETS (Educational Testing Service)**, 739  
**eugenics**, 22  
**Europe, measurements of intelligence in**, 633–5  
**European Psychologist**, 540  
**event-related potentials (ERPs)**, 14, 91, 385–6  
**everyday mathematics**, 553–4  
**Everyday Situational Judgment Inventory**, 516  
**evidence**  
**converging**, 807  
**differentiating from theory**, 807  
**evolution of intelligence**, 328–43  
**biological explanations for**, 339–40  
**Baldwin effect**, 340  
**group selection**, 339  
**intelligence as evolutionary spandrel**, 339  
**overview**, 339  
**sexual selection**, 339–40  
**cultural explanations**, 340–1  
**early humans**, 331–4  
**Homo erectus**, 332–4  
**Homo habilis**, 331–2  
**million years of stasis**, 334  
**overview**, 331  
**second increase in brain size**, 334  
**great apes**, 330–1  
**general discussion**, 330–1  
**implications of research for human intelligence**, 331  
**key issues**  
**assessing intelligence**, 229  
**human versus nonhuman intelligence**, 329–30  
**overview**, 328–9  
**Mating Intelligence**, 603–6, 607–8  
**modern humans**  
**cognitive fluidity, connected modules, and cross-domain thinking**, 336–7  
**contextual focus**, 337–8  
**overview**, 335–6, 338  
**syntactic language and symbolic reasoning**, 336  
**synthesizing accounts of evolution**, 338  
**overview**, 328  
**recent breakthroughs**, 338–9  
**sex differences in intelligence**, 258–9  
**examiners, and multicultural perspectives of intelligence**, 277  
**exceptional cases, MI theory**, 571  
**exclusionary definitions of practical intelligence**, 277  
**executive function**  
**heritability estimates**, 92–3  
**in MI theory**, 493  
**Executive Management, in Systems Set**, 542  
**executive function**  
**heritability estimates**, 92–3  
**in MI theory**, 493  
**Executive Management, in Systems Set**, 542, 543  
**executive metacomponents, triarchic theory of intelligence**, 568  
**executive processes**, 506  
**exercise**  
**and adult cognitive development**, 184–5  
**in cognitive epidemiology**, 698  
**ex-Gaussian distribution**, 380  
**existential intelligence**, 70, 488  
**exogenous ERPs**, 91  
**expectancies of self-efficacy**, 574

### SUBJECT INDEX

**intellectual disabilities (cont.)**
- teaching children with intellectual disabilities, 202
- mental retardation versus, 197
- overview, 195–4
- PET studies of, 355
- sex differences in intelligence, 255
- theoretical issues, 197–202
- etiology-related profiles, 197–200
- IQ versus adaptive functioning, 200–1
- overview, 197
- relation of adaptive behavior to adverse life outcomes, 201–2
- intellectual engagement, 75, 722–3
- intellectual functioning, causes of disordered, 197–8

**intellectual giftedness, 235–49**
- American contributions to research on, 241–4
- application of MI to gifted contributors, 243
- genetic studies of genius, 241
- overview, 241
- three ring conception of giftedness, 241–3
- triarchic theory applied to cognitive giftedness, 243–4
- case studies, 236–7
  - Dwayne, 236
  - Kendra, 237
  - Lily, 236–7
  - Patrick, 237
- common themes related to, 237–41
  - culture, gender, and environment, influence of, 240
  - developmental nature of, 238–9
  - diverse patterns, 240
  - multidimensional aspects, 239–40
  - non-cognitive aspects, 240–1
  - overview, 237–8
- current state of, 246–9
  - characteristics of gifted individuals, 247–8
  - federal definition, 247
  - interventions and programs, 248–9
  - overview, 246–7
- interesting directions in research on, 244–6
  - contributions and “10,000 hour” threshold, 244
  - fixed versus malleable traits, 246
  - multiplier effects, 246
  - talent development in young people, 244–6
  - overview, 235–6
- intellectual growth, and beliefs about intelligence, 753–4
- intellectual performance, and beliefs about intelligence, 751–3
- intellectual stimulation, and retention of cognitive function, 114, 184–5
- intelligence, basic processes of, 371–87, 389
- defining intelligence, 375–6
- future directions, 388–9
- inspection time
  - correlation between IQ and, 382–3
  - as lead marker for unfavourable ageing, 383–4
  - nature of, 384–5
  - overview, 381–2
  - overview, 371
- reaction time
  - Jensen’s studies of, 377–9
  - variability of individual, 379–83
  - speeded tasks, recent interest in, 371–5
  - speed of information processing and ECTs, 376–7
- intelligence quotient. See IQ; secular changes in intelligence
- intelligences, multiple. See multiple intelligences theory
- intelligent agents, 475, 478
- intelligent testing system, 32, 33
- intentional (directed) forgetting, 314–15
- intentional reasoning processes, 422
- interactive games, in AI, 479
- intercept, 434
- intercultural dyads, 596, 597
- intercultural effectiveness, 588–9
- interference hypothesis, 777
- intergenic, defined, 95
- intermixing, racial, 294
- internal-validity studies, of theory of successful intelligence, 513–16
- international experience, and cultural intelligence, 590–1
- international perspectives on intelligence. See society and intelligence; worldwide perspective, intelligence in International Society of Intelligence Researchers (ISIR), 358
- interpersonal intelligence, 70, 243, 488, 571
- Interpretation of Cultures, The, 273–4
- interrelating the self, 840
- interventions. See also instruction, developing intelligence through early childhood education and SES, 300
- for intellectually disabled children, 202–3
- inclusive schooling, 202
- optimizing teaching for all children, 202–3
- overview, 202
- possibilities and limitations of, 204–5
- teaching children with intellectual disabilities, 202
for intellectually gifted individuals, 248–9

### Mating Intelligence (cont.)

- Intelligence and mental-fitness indicators, 608–11
- Mating-relevant cognitive mechanisms, 611–13
- Summary of model of, 603–6
- Criticisms of, 606
- Overview, 603–6

### Matrices subtest, Test of g: Culture Fair, Level II
- Measuring EI with, 537
- Overview, 538
- Scoring, 539
- Cohesiveness of tasks, 539
- Overview, 538
- Scoring, 538
- Universality of, 544

### Means-ends thinking, in Down syndrome
- 198

### Mean social interactions, developmental web for
- 162, 163–5

### Measurement error, and predictive validity, 551

### Measurement of intelligence, 3–16. See also tests of intelligence of AIS, 478–9

### Binet
- 5–6
- Breaching the 30 barrier, 15–16
- Overview, 15–16
- Working memory, 16

### Cattell
- 4–5
- Cultural, with CQS
  - Overview, 586–8
  - Predictive validity, 588–9
- Current and future state of
  - Overview, 863–4
- Present psychometric models, 864–7
- Divorce between theory and practice, 8–9
- Emotional, 536–9
  - Early work, 536–7
  - Integrative models, 537–8
  - Mixed models, 538–9
  - Overview, 536
  - Specific-ability models, 537
- Explanation of g, 13–15
- Cognitive psychology, 14–15
- Inspection time and reaction time, 13–14
- Overview, 13
- Factor analysis, 9–11
- G: validity of, 11–12
- Galton, 3–4
- Multicultural perspectives of intelligence, 277–83
- Alternative assessment practices, 280–2

### Cultural loading, 279
- G factor, 278
- Outcome implications, 282
- Overview, 277–8
- Test bias, 278–9
- Test fairness, 279–80
- Tests as gatekeepers, 282–3
- Overview, 3
- Versus personality measurement, 715, 716

### Secular changes in intelligence
- 657–60

### Social
- 564–7
- Convergent and discriminant validity, 567
- George Washington Social Intelligence Test, 565
- Guilford’s Structure of Intellect model, 565–7
- Overview, 564–5

### Spearman and theory of general intelligence
- 6–8

Tests of intelligence as, 24–6
- Working memory, 16
- Worldwide, 630–40
- Africa, 636–7
- Asia, 637–40

worldwide popularity of, 632
weight gain, in cognitive epidemiology, 697
wellbeing, societal measures of
direction of causality, 672–4
overview, 671–2
Western (analytic) mode of wisdom, 832
Western scrub jays
episodic memory, 315
planning by, 314
West of Scotland Twenty-07 Study, 693–4
White Americans, test scores of, 283
Whitehall II Study, 698–9
white matter
and basic processes of intelligence, 387–8
effect of experience on, 111
genetic/imaging studies, 362–3
MRI studies, 357
sex differences in intelligence, 260
whole-genome scans, 94–6
WICS (wisdom, intelligence, and creativity
synthesized) model, 69
wide-span memory, 61
Wiesel, Elie, 582
Williams syndrome, 198–200, 204
window task, in CISYC, 638
win-stay-lose-shift strategy, 312
WISC. See Wechsler Intelligence Scale for
Children
WISC-III (Wechsler Intelligence Scale for
Children-Third Edition), 286–7, 669
WISC-IV (Wechsler Intelligence Scale for
Children-Fourth Edition), 34
WISC-IV Integrated (Wechsler Intelligence Scale
for Children-Fourth Edition
Integrated), 35
WISC-R (Wechsler Intelligence Scale for
Children-Revised), 32, 656, 669
Subject Index

wisdom, 827–42
  explicit theories and assessment of, 832–42
  distinction between general and personal
  wisdom, 833–5
  general wisdom, psychological conceptions of, 835–8
  overview, 832–3
  personal wisdom, psychological conceptions of, 838–42
  future directions, 842
  historical background, 827–8
  implicit (subjective) theories of, 829–32
  overview, 745–8
  psychological approaches to definition of, 825–9

wisdom, intelligence, and creativity synthesized
