UNIT 1
Receiving the patient

LEARNING OUTCOMES
At the end of this unit, you will be able to:
- greet patients and put them at ease
- introduce yourself and your role
- ask the opening question and set the agenda for the interview

Lead in
As a group, share your thoughts on this quotation from a celebrated 19th-century physician:

The kindly word, the cheerful greeting, the sympathetic look – these the patient understands.
William Osler (1849–1919)

Putting yourself in the patient’s shoes
1 Prior to a consultation, some patients experience strong feelings of anxiety. Discuss reasons for this in small groups. Why might patients be even more anxious when visiting a hospital as opposed to a doctor’s surgery?

2a Think back to the last time you were a patient and do this questionnaire.

Patient questionnaire
1 How do you feel when you enter a hospital as a patient?
   (Circle the best answer.)
   - Relaxed
   - Unconcerned
   - Relieved
   - Mildly concerned
   - Apprehensive
   - Anxious
   - Scared
   - Other ____________

2 What generally lessens any concerns you may have on entering a hospital?
   (Place in order of importance, 1 = most important)
   - Administrative staff
   - Nursing staff
   - Doctor
   - Surroundings
   - Other ____________

3 Have you ever left a consultation more confused/frustrated than when you arrived? YES / NO

4 If YES, why?

5 What qualities do you appreciate in a doctor?

b In small groups, compare your responses and then answer these questions.
   1 How might the factors in question 2 of the questionnaire increase or decrease patient anxiety? Make a list.
   2 How might the age, gender or physical appearance of a new patient affect a doctor’s relationship with that patient?
Think about

... how you would feel about establishing rapport with a patient in English.

3a Take a couple of minutes to think about this and then rate your ability to do the following from 1 (lacking in confidence) to 5 (highly competent).

1. I can make the patient feel relaxed.
2. I can greet the patient appropriately.
3. I can set the agenda for the interview.
4. I can use an appropriate, welcoming tone of voice.

b Discuss your thoughts with the rest of the group and talk about the language you would use to do these things.

Establishing initial contact

The setting for the patient encounter is very important.

4a You're going to hear a communications expert talk about the importance of seating arrangements in a consulting room. Listen and choose the best seating arrangement: 1, 2 or 3.

b Listen again and answer these questions.

1. Why does the expert suggest this arrangement is the best option?
2. According to the expert, how far should you sit from your patient in the UK?
   a. 3 feet (1 metre)     b. 9 feet (3 metres)     c. 5 feet (1.5 metres)
3. What reason does the expert give for this?

c Discuss these questions with a partner.

1. What do you think about the expert's suggestion regarding the distance between doctor and patient during an encounter?
2. Why might a doctor draw his/her chair closer to a patient?
3. What should a doctor consider when interviewing a patient in bed?
5a 1.2 You are going to hear two patients talking to friends about a recent encounter with their consultants. Listen and tick the relevant column (Competent, Fairly competent or Needs improvement) to show to what extent the consultants are successful in establishing rapport with their patients.

<table>
<thead>
<tr>
<th>Consultant 1 (outpatients)</th>
<th>Competent</th>
<th>Fairly competent</th>
<th>Needs improvement</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 He was able to make the patient feel relaxed and comfortable.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2 He was able to greet the patient appropriately.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3 He was able to use an appropriate, welcoming tone of voice.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Consultant 2 (ward round)

<table>
<thead>
<tr>
<th>Consultant 2 (ward round)</th>
<th>Competent</th>
<th>Fairly competent</th>
<th>Needs improvement</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 He was able to make the patient feel relaxed and comfortable.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2 He was able to greet the patient appropriately.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3 He was able to use an appropriate, welcoming tone of voice.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

b 1.2 Listen again and note examples (positive or negative) in the fourth column.

c In small groups, compare your findings and compile a list of points for the two consultants about how they could improve their technique. Share these with the group.

Greeting and putting your patient at ease

6 1.3 You are going to hear three doctors welcoming their patients. Where does each take place: in a GP’s surgery, a hospital ward or a specialist’s office? How do you know?

1 (US English) doctors
2 (US English) hospital department

Bickley (2003)
7a A doctor’s initial contact with a patient should include four main objectives. Look at these phrases and give each set of objectives a heading.

<table>
<thead>
<tr>
<th>Objective 1</th>
<th>Objective 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Good morning, [Jenny], come in, take a seat …</td>
<td>• I’m a student doctor working with Mr [Donaldson].</td>
</tr>
<tr>
<td>• Good afternoon, Mr [Hanks], isn’t it?</td>
<td>• My name is Dr [da Silva], I’m one of the registrars on the ward this evening.</td>
</tr>
<tr>
<td>• Hello, can I just check it’s [Mr Wang]? We’ve not met before …</td>
<td>• I’m Dr Janowicz. My colleague, Dr [Taylor], has asked me to come and see you about …</td>
</tr>
<tr>
<td>• [William Denby]? Hello. What would you prefer me to call you?</td>
<td>• Dr [Murad] has referred you to me for further investigations. My name is Dr Lozano and I’m …</td>
</tr>
<tr>
<td>• Hello, Ms [Kavanagh] … Am I pronouncing it correctly?</td>
<td>• Hello, I’m Dr [May], the locum with this practice.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Objective 3</th>
<th>Objective 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>• I’ve come to have a little chat with you about …</td>
<td>• If you don’t mind, I’d like to take some notes as we talk.</td>
</tr>
<tr>
<td>• I’d like to spend five minutes with you to ask some questions if that’s OK?</td>
<td>• Do you mind if [our student doctor] is present during our chat?</td>
</tr>
<tr>
<td>• I wonder if we can chat for a few minutes about …</td>
<td>• If it’s all right with you, I’d like to have a listen to your heart.</td>
</tr>
</tbody>
</table>

b Compare your ideas with the rest of the group.

8 Look back at the first sentence in Objective 3.

1 What effect might the phrase have a little chat have on the situation?

2 In which situation(s) might you avoid using this verb when greeting a patient?

9a You are going to hear the beginning of a patient encounter. Listen and number the objectives in Exercise 7a in the order you hear them.

b What else does the doctor do to make the patient comfortable?

10 With a partner, practise greeting and introducing yourself to your patient.

---

1 (US English) medical student
2 (US English) residents
3 (US English) Dr [May], covering for Dr [Franklin]
Conveying warmth

11a 1.5 You are going to hear two versions of two different patient encounters. Decide if the doctors sound welcoming or unwelcoming.

<table>
<thead>
<tr>
<th></th>
<th>Encounter 1</th>
<th>Encounter 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Version A</td>
<td>Version B</td>
</tr>
<tr>
<td>welcoming</td>
<td></td>
<td></td>
</tr>
<tr>
<td>unwelcoming</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

b Compare your ideas with a partner. What helps you distinguish between a welcoming and an unwelcoming voice in English / in your own language?

12a 1.6 Listen to and read these greetings. With a partner, decide what the context is for each one. How do you know?

1 Good morning, Mr Barker, isn’t it? Your consultant asked me to come and see you.
2 Anya Kaplinski? You’ve come for your six-month check-up, I see.
3 [patient knocks] Hello? Come in? Sorry for the wait, Miss Staples, we’re running a little late this morning.
4 [doctor enters waiting room] Mrs Khan?

b Repeat each phrase until you are satisfied that your voice sounds welcoming and has the right intonation. Your voice should rise on the underlined words.

c Take turns to read the greetings. Listen and decide if your partner sounds welcoming or unwelcoming.

13 Role-play these situations with a partner.

Student A: Turn to page 122.
Student B: Turn to page 128.

Think about

... how you would ask the opening question in a patient interview in English.

14a Look at this opening question. Think of two more ways of posing the opening question. Compare your questions with a partner.

What brings you here today?

b Why is the opening question so important in the patient interview? Discuss in small groups.

c Would you use these opening questions? Why (not)?

1 So, what’s the problem?
2 What’s up?
Asking the opening question

15a Choose the most appropriate opening question(s) (1–10) for each scenario (a–e). (There may be more than one answer in each case.)

1 Your GP has explained the situation, but I wonder if you could tell me in your own words?
2 What would you like to discuss today?
3 Am I right in thinking you’ve come for baby [Killian’s] routine check-up?
4 How are things with the [new tablets]?
5 What brings you here today?
6 Has there been any improvement since I saw you last?
7 How are you feeling today?
8 I have your notes from your doctor, but could you tell me what’s been happening?
9 So, what have you come to see me about today?
10 So, how is [little Rhana] doing?

b Discuss your choices with a partner. Why are some questions more appropriate than others for each of the scenarios?

16a You are going to hear more of the encounter with Mr Mahoney (see Exercise 11). Listen to the interview and answer these questions.

1 Which opening question does Dr Patel use?
2 What is Mr Mahoney’s presenting complaint?
3 Was Dr Patel’s opening question the most appropriate for this interview? Why (not)?

b As a group, rewrite Dr Patel’s opening question to ensure a more appropriate line of questioning.

Am I right in thinking ____________________________ ?

Note that Dr Patel could ask a follow-up question to ensure Mr Mahoney is able to express himself fully:

Is there anything else you would like to discuss today / while you’re here today?
Is anything else bothering you at the moment?
Do you have any other issues you’d like to address today?

It is easy to assume the patient has come for their routine check-up ... when in fact the patient has a more pressing or at least a second agenda to discuss.

Silverman et al. (2005)
Other opening questions might also limit the patient’s contribution. Look back at the opening questions in Exercise 15a and circle those which require a follow-up question.

Some doctors use body language instead of an opening question. Demonstrate to your group how you might open a session using body language only. Would this technique be appropriate in your country? Would you use this technique? Why (not)?

Setting the agenda

The patient’s opening statement is possibly the most important part of the interview.

Dr Patel refers Mr Mahoney to a consultant, Mr Swift. Read the opening statement that Mr Mahoney gives to the consultant, underline the important points and explain your choices to a partner.

Mr Swift I wonder if you could tell me in your own words what’s been happening.

Mr Mahoney Well, yes, I’m sure you’ve got all this information, but ... my arthritis has been playing me up¹ a bit as usual - I’m having difficulty sleeping and I’m in some pain first thing in the morning. But it’s the headaches that are really getting me down, they’re so painful. Sometimes I’ve been sick² with them ... literally. I’m starting to have time off³ work now because of them. My wife’s really worried. She’s the one that insisted I go see Dr Patel.

With a partner, list the benefits of allowing the patient to make an opening statement.

Examples: Enables doctor to hear patient’s story.
Signals the doctor’s interest in the patient.

Compare your findings with the rest of the group.

Listen and complete the consultant’s next phrase to set the agenda for the rest of the interview with Mr Mahoney.

Mr Swift ___________________ the headaches that are really bothering you, ____________ looking at those.
_________________________ the arthritis later, if that’s ____________, . Is there ____________ you want to discuss today?

¹ (US English) acting up, giving me trouble
² (US English and UK English) I’ve thrown up, I’ve vomited

Unit 1 Receiving the patient
Language for setting the agenda

Shall we / Let’s start with [the headaches]?
Shall we start by discussing / looking at [the headaches]?
We’ll come back to [the arthritis] later / after that.
We’ll talk about [the arthritis] later / after that.
If that’s all right / OK with you?
Does that sound all right / OK?

22    With a partner, choose a set of symptoms (a or b) and practise setting
      the agenda with the patient.

   a  Recurrent headaches, ingrown toenail

   b  Eczema, diarrhoea

Piecing it all together

23a  Choose one of the situations from Exercise 13 and role-play the first part
      of the encounter with your partner.

      Student A:  Turn to page 123.
      Student B:  Turn to page 129.

b  Swap roles. Choose a different situation and role-play the first part of the
encounter as before.

Progress check

Complete the Progress check for this unit.
(1 = I need more work on this, 5 = I feel confident in this area)

Greeting the patient appropriately by:
- introducing myself and explaining my role  1  2  3  4  5
- obtaining the patient’s preferred form of address  1  2  3  4  5

Establishing rapport by:
- using a welcoming tone of voice  1  2  3  4  5
- making the patient feel relaxed  1  2  3  4  5
- using appropriate eye contact  1  2  3  4  5

Posing an opening question that is suitable for the
encounter  1  2  3  4  5

Setting the agenda for the interview  1  2  3  4  5

1 (US English) diarrhea
