

INDEX

- acentric factor
 - definition, 439
- activity, 333
- adiabatic wall, 10
- Amagat's law, 249
- ammonia, *PH* diagram, 176
- Anderko–Pitzer equation of state, 447–450
- Antoine equation, 128
- Avogadro's number, 37, 468

- balance, macroscopic, *see* macroscopic balance
- balance, microscopic, *see* microscopic balance
- Benedict–Webb–Rubin
 - equation of state, 44, 446–447
 - general
 - fundamental Helmholtz relation, 98
- binodal curve, 112, 127
 - global stability criteria, 121
 - van der Waals fluid, 122–126
- binomial coefficient, 434
- binomial theorem, 434
- block copolymer, 383
- Boltzmann constant, 20, 87, 88, 468

- calculus, fundamental theorem of, 431
- calorimeter, differential scanning, 70
- canonical independent variable, 55
- Carnahan–Starling
 - critical compressibility factor, 442
 - critical point, 144
 - equation of state, 44, 441–442
 - general
 - fundamental Helmholtz relation, 98
- chain rule, 428
- chemical potential
 - and mass flows, 37
 - definition, 23
 - definition, alternative, 24
- Clapeyron equation, 127
- closed system, 11
- coefficient of thermal expansion
 - definition, 70
 - van der Waals, simple, 101
- combinatorics, 434
- compressibility
 - isentropic, 102
- compressibility factor, 121, 136
- constant-pressure heat capacity
 - definition, 70
 - ideal gas, general, 71
 - stability criteria, 117
- constant-volume heat capacity
 - definition, 80
 - ideal gas, 132
 - ideal gas, simple, 102
 - stability criteria, 116, 117, 141
 - van der Waals, simple, 101
- contact angle, 401, 403
- continuity equation, 452
- continuity equation for a species, 453
- cooperativity, 345
- copolymer, block, 383
- corresponding states, 121, 222
- Coulombic forces, 213
- critical
 - compressibility factor
 - Carnahan–Starling, 442
 - definition, 121
 - Martin's generalized cubic, 446
 - Peng–Robinson, 444
 - Redlich–Kwong, 443
 - van der Waals fluid, 121
 - isotherm, 120
 - point, 120, 126
