Hyperbole in English

Non-literal language is ubiquitous in everyday life, and while hyperbole is a major part of this, it has so far remained relatively unexplored. This volume provides the first investigation of hyperbole in English, drawing on data from genres such as spoken conversation, TV, newspapers and literary works from Chaucer to Monty Python. Combining quantitative and qualitative analyses, it uses approaches from semantics, pragmatics, discourse analysis and classical rhetoric, to investigate in detail both speaker-centred and emotive aspects of hyperbole, and also addressee-related aspects such as interpretation and interactional uptake. Illustrated with a range of diachronic case studies, hyperbole is also shown to be a main means of linguistic creativity and an important contributor to language change. The book concludes with an exploration of the role of hyperbole in political speaking, humour and literature. Original and in-depth, it will be invaluable to all those working on meaning, discourse and historical linguistics.

CLAUDIA CLARIDGE is Chair in English Linguistics at the Universität Duisburg-Essen, Germany. She is one of the compilers of the *Lampeter Corpus of Early Modern English Tracts* and is the author of *Multi-word Verbs in Early Modern English* (2000), based on the above corpus. Her main research interests lie in the fields of historical linguistics, pragmatics, discourse studies and corpus linguistics. Within these fields, she has published articles on such diverse topics as irony, similes/comparison, superlatives, questions, conditionals and discourse deixis. She has also contributed articles to various recent handbooks, such as the *Handbook of Corpus Linguistics* (2008) and the *Handbook of Historical Pragmatics* (2010).

Editorial Board

Bas Aarts (University College London), John Algeo (University of Georgia), Susan Fitzmaurice (University of Sheffield), Christian Mair (University of Freiburg), Charles F. Meyer (University of Massachusetts)

The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics and sociolinguistics, and is aimed at an international readership.

Already published in this series:

Hyperbole is still a largely under-researched field, in particular in contrast to the wealth of material available on other figures of speech such as metaphor and irony. This book aims to shed new light on a number of interesting aspects of hyperbole.

While researching and writing the book, I have received generous assistance, which it is my pleasure to acknowledge here. Many conversations with colleagues at the Universities of Greifswald and Kiel (both linguists and literary scholars) have helped me to clarify my ideas on the topic of hyperbole and also to get ideas I might never have had without their input. I would also like to thank my students at Kiel University for being patient while I tried out my ideas on them and for their constructive criticism. A few people need to be mentioned explicitly: I thank Thomas Kohnen not only for his always helpful comments but especially also for his moral support. Lucia Kornexl provided constructive questions and ideas during the early stages of the project, while I was trying to get a grip on the topic. Ursula Lenker and Merja Kytö read draft chapters of the book, which helped to improve these considerably. Raymond Hickey carefully read the whole manuscript and added many helpful suggestions. I am also grateful to two anonymous readers for their very valuable feedback. Needless to say, all remaining shortcomings and errors are my own.

Finally, I thank Helen Barton, the linguistics editor at Cambridge University Press, for her support during the final stages of this project.
