ENVIRONMENTAL PROTECTION AND HUMAN RIGHTS

With unique scholarly analysis and practical discussion, this book provides a comprehensive introduction to the relationship between environmental protection and human rights that is being formalized into law in many legal systems. By illuminating human rights theory and the institutions that can be employed to meet environmental goals, this book instructs on environmental techniques and procedures that assist in the protection of human rights. The text provides cogent guidance on a growing international jurisprudence on the promotion and protection of human rights in relation to the environment that has been developed by international and regional human rights bodies and tribunals. It explores a rich body of case law that continues to develop within states on the environmental dimension of the rights to life, to health, and to public participation and access to information. Five compelling contemporary case studies are included online that implicate human rights and the environment, ranging from large dam projects to the creation of a new human right to a clean environment.

Donald K. Anton has been practicing and teaching international law and environmental law since 1988. Since 2000, he has been a member of the faculty of the Australian National University College of Law, where he teaches international environmental law, international law, marine and coastal law, international climate law, and environmental law. He is the author or coauthor of International Environmental Law: Cases, Materials, and Problems (2007); International Law: Cases and Materials (2005); International Law: Politics, Values, and Functions (1998); and A Question of Justice Challenge: Global Environmental Protection (1996).

Dinah L. Shelton is the Manatt/Ahn Professor of International Law at the George Washington University Law School and a member of the Inter-American Commission on Human Rights of the Organization of American States. Shelton is the author or editor of three prize-winning books, Protecting Human Rights in the Americas (coauthored with Thomas Buergenthal, 1982), Remedies in International Human Rights Law (2006), and the three-volume Encyclopedia of Genocide and Crimes Against Humanity (2004) as well as author of International Environmental Law (2004) and other publications in the fields of human rights and environmental law. She was awarded the Elisabeth Haub Prize for Environmental Law.

Index .................................................. 977
Acknowledgments

As with all publications, this text could not have been produced without the assistance and support of many individuals and institutions. It rests on the shoulders of our students, our colleagues, our able research assistants, and the law schools that are our place of work and in which we have taught these materials in preparing the text. Most important in the later stages of preparing the manuscript, we must thank Nick Bryner, George Washington University class of 2012, for his invaluable assistance in copyediting, obtaining permissions, and chasing down citations. His work was exemplary in promptness and quality, for which we are boundlessly grateful.

The materials herein have been used in teaching courses involving human rights and the environment at the University of Alabama School of Law, the Australian National University College of Law (ANU), the George Washington University Law School, the University of Auckland Faculty of Law, the University of Michigan Law School, the United Nations Institute for Training and Research, and the Vermont Law School. We are grateful to all these institutions for the opportunity to teach the subject matter and to our students in all of the courses for lessons about the material and sound feedback.

Don Anton is deeply grateful to the following colleagues for invaluable input and feedback: John Bonine, Hilary Charlesworth, Eileen Gauana, Svitlana Kravchenko, Bob Kuehn, Penelope Mathew, Cliff Rechtschaffen, and Matthew Zagor. Don particularly benefited from extensive collaboration with John Bonine and Svitlana Kravchenko on many of the issues raised by this text and the experience of coteaching a course on environmental justice and human rights with Bob Kuehn at the University of Alabama and the ANU, in which many of these materials were employed. Over many years, Pena Mathew has generously provided Don with important human rights insights.

Dinah Shelton is extremely grateful to Klaus Bosselmann and Prue Taylor for their hospitality and always-helpful discussions during her visit to the University of Auckland. She would also like to express deep appreciation to Daniel Taillant, Stephen Humphreys, Astrid Puentes, Dan Magraw, and other colleagues for their questions, comments, and contributions during this work in progress, especially on the issue of climate change and human rights. Special thanks to Günther Handl and Alan Boyle for their stimulating and insightful skepticism of some of the issues raised in these materials. She also derived great benefits from talks and seminars on the environment and human rights given at the University of Chicago, Harvard Law School, Universidad Nacional Autónoma de México, and Northwestern University.

We are grateful for the institutional support we have received from our home law schools, the Australian National University College of Law and the George Washington University Law School. Don Anton thanks Evan Caminker, dean of the University of Michigan, for generously supporting this project and for providing the resources to employ three impressive
Acknowledgments

and able research assistants: Thomas Carter Seabaugh, Cara Wulf, and Ashley Tan. All three performed at a very high professional level. Don Anton is also thankful to his friends and colleagues at his home institution, the ANU College of Law, for their generous support and for the collegial, intellectual atmosphere that is always present.

Finally, we express our gratitude to our families. Don would like to thank his parents, Don and Aurora Anton, for being first and best teachers, and his family, Pene Mathew and Tom Anton, for their support and understanding. Dinah would like to thank her mother for providing the early freedom to roam outdoors and her children and grandchildren for ensuring that she still gets outside every so often.

We are grateful to the following authors and publishers for permission to reprint the extracts found herein. Any errors that may appear in the extracts are the responsibility of the editors of the present volume.
