 simulated annealing 166, 170
 single-ion anisotropy 152, 153, 191, 389
 SiO₂ 386
 slithering snake algorithm 123, 124, 242
 smart Monte Carlo 250
 sociophysics 410
 soft spheres 198
 solid-on-solid model 184, 341
 solitons 158
 special purpose processor 168
 specific heat 12, 13, 17, 18, 68, 78, 84, 87, 175, 264, 285, 292
 spin dynamics method 388, 389, 390
 spin exchange 44, 115, 116, 339, 345
 spin-flip 44, 71, 106, 131, 137, 138, 150, 152, 333, 344
 spin glasses 113, 166, 168, 169, 170, 278
 spinless fermions 306
 spinodal decomposition 40, 41, 42, 116, 240
 spinodal points 41, 42
 spin wave 158, 392
 spiral growth 343
 sponge phases 114, 231
 staggered fermions 315
 star polymer 65, 130
 statistical errors 31, 91, 143, 189, 251, 262, 264
 statistical inefficiency 92
 stiff rods 131
 Stillinger–Weber potential 174
 stochastic series expansions 314
 structure factor 43, 116, 339, 345, 390
 SU(*N*) group 366, 369
 subsystems 86, 210
 superantiferromagnet 109
 superconductivity 278
 superfluidity 285, 293
 surface effects 76, 176, 178
 surface field 76, 88, 176, 178
 surfactants 231, 232
 susceptibility 12, 17, 68, 77, 81, 83, 93, 94, 143, 154, 168, 174, 179, 182
 Swendsen’s MCRG 332, 333
 Swendsen–Wang algorithm 138, 139, 140, 141, 144, 156, 190
