 Shalizi, Z. 190, 206
 Shatz, H. J. 224, 226
 Shleifer, A. 56n, 288n
 short-run equilibrium 100–3
 Simon, H. 209, 210
 simulation dynamics 275, 287–9; in multi-region
 setting 289–95; and real world issues 317
 Sinn, H.-W. 157
 Slaughter, M. J. 40
 Small, K. A. 24, 26, 31, 41, 169, 191
 Smith, A. 81, 131
 social physics 202n
 Solow, R. M. 52
 Soros, G. 183
 South Asia (SAS), classification and characteristics
 2–11, 19; HDD production 17; swings in
 economic prosperity 284–6
 spatial wage structure 128, 145–54, 165, 267–8; in
 Germany 154–64; in Mexico 146–8; in USA 160
 spatially-concentrated industries 239
 specialization 130–2, 200; in EU 135–8; in
 multinationals 238–9; patterns between countries
 40; in Ricardian-geographical economics
 framework 251, 262
 specific-factors model 40
 Spence, A. M. 69n
 spillovers 28–9, 178, 199–200
 spreading, definition of 65
 spreading equilibrium 90–1, 97; and transport
 costs 110–12, 126, 175
 Srinivasan, T. N. 37n, 320
 stability of equilibria 61–2, 94–5, 104, 124–6,
 278–80, 322
 stability properties of Baldwin-Forslid model
 299–300
 Stalker, P. 262, 264–5
 Stelder, D, and non-neutral space 171–4
 Stewart, J. Q. 266
 Stibora, J. 297
 Stiglitz, J. 31, 68, 69
- Stolper-Samuelson theorem 39
 Storper, M. 23
 structural analysis, in congestion model 214–6
 structural wage equation 151
 Sturm, J.-E. 140n
 Sub-Saharan Africa (SSA), Atlas method 3,
 classification and characteristics 2–6, 19; poor
 infrastructure and trade 83; swings in economic
 prosperity 284–6
 Sunley, P. 318
 sustain and break analysis 110–5, 117
 Swenson, D. 241
- Tabuchi, T. 29n
 technological externalities 26–8
 Thirlwall, T. 55
 Thisse, J.-F. 15, 18, 30, 31, 36, 59, 131n, 198n
 Thomas, A. 148, 152–3, 154n
 Thünen, J. H. von 23–6, 31, 40, 57
 Tinbergen, J. 266
 Tirole, J. 69
 Torstensson, J. 135
 trade, link with FDI 236; effects on innovation and
 growth 287; inter and intra-industry 246–8,
 253–4; by multinationals 226; volume 83
 trade barriers 226n, 229–30
 trade flows and agglomeration 61–2, 246–8; in
 congestion model 269–72
 trade theory, in future geographical economics
 models 324–5; role of geography 37–50; and
 multinationals 228–30; and specialization 131,
see comparative advantage
 traffic congestion 190
 transport costs 13, 30, 37, 45, 63, 82–4, 96; and
 agglomeration 150–2, 164; and bridge-building
 308–9, 312–13; and comparative advantage
 251–3; in congestion model 195–6, 269, 290–5;
 in core model 105–6; and core-periphery
 pattern 288; for food 64, 174–6; and home
 market effect 143; and horizontal
 multinationals, 231; iceberg type 49, 80–1,
 321–2; and location decisions 61–2, 179–80; and
 prices 86–7, 88; and relative wages 152–4; and
 space 167–77; and spreading equilibrium
 110–12, 187; and trade flows 12–15, 17; and
 vertical multinationals 233; and welfare 115–17,
 119; and world industry 48–9
