

# CONTENTS

Contributors .....	vi
Introduction .....	ix
1. Control of Intermittency in Near-Wall Turbulent Flow <i>Peter N. Blossey &amp; John L. Lumley</i> .....	1
2. Sil'nikov Chaos in Fluid Flows <i>T. Mullin, A. Juel &amp; T. Peacock</i> .....	24
3. Phase Turbulence and Heteroclinic Cycles <i>F.H. Busse, O. Brausch, M. Jaletzky &amp; W. Pesch</i> .....	44
4. An ODE Approach for the Enstrophy of a Class of 3D Euler Flows <i>Koji Ohkitani</i> .....	64
5. Scale Separation and Regularity of the Navier–Stokes Equations <i>C.R. Doering &amp; J.D. Gibbon</i> .....	77
6. Turbulent Advection and Breakdown of the Lagrangian Flow <i>Krzysztof Gawędzki</i> .....	86
7. Growth of Magnetic Fluctuations in a Turbulent Flow <i>Gregory Falkovich</i> .....	105
8. Non-Homogeneous Scalings in Boundary Layer Turbulence <i>Sergio Ciliberto, Emmanuel Lévêque &amp; Gerardo Ruiz Chavarria</i> .....	118
9. Turbulent Wakes of 3D Fractal Grids <i>D. Queiros-Conde &amp; J.C. Vassilicos</i> .....	136
10. Vorticity Statistics in the 2D Enstrophy Cascade and Tracer Dispersion in the Batchelor Regime <i>Marie-Caroline Jullien, Patrizia Castiglione, Jérôme Paret &amp; Patrick Tabeling</i> .....	168
11. On the Origins of Intermittency in Real Turbulent Flows <i>Michael Kholmyansky &amp; Arkady Tsinober</i> .....	183
12. Scaling and Structure in Isotropic Turbulence <i>Javier Jiménez, F. Moisy, P. Tabeling &amp; H. Willaime</i> .....	193
13. Capturing Turbulent Intermittency <i>Willem van de Water, Adrian Staicu &amp; Marie-Christine Guegan</i> .....	213
14. The Exit-Time Approach for Lagrangian and Eulerian Turbulence <i>A. Vulpiani, L. Biferale, G. Boffetta, A. Celani, M. Cencini &amp; D. Vergni</i> .....	223
15. Statistical Geometry and Lagrangian Dynamics in Turbulence <i>Michael Chertkov, Alain Pumir &amp; Boris I. Shraiman</i> .....	243
16. Flow Structure Visualization by a Low-Pressure Vortex <i>Shigeo Kida, Hideaki Miura &amp; Takahiro Adachi</i> .....	262
