Subject Index

- acoustic gravity waves 69, 84, 361
- adaptive optics 319
- advection 36, 48, 242
- airborne sampling of temperature and refractivity 63
- Allan deviation 295
- Allan variance 273, 290, 309
- amplitude, signal 118
 - gain loss for large apertures 158
 - geometrical optics expression 119
 - ionospheric effects 85
 - logarithmic amplitude fluctuation 120, 389
 - plane waves 120
 - spherical waves 120
- angle-of-arrival errors 33, 121, 317
- angular correlation for adjacent stars 344
- anisotropy, influence of 349
- anomalous refraction 62, 362
- aperture averaging 326, 337, 358, 361
- astronomical signals 333
- autocorrelation 363
- beam waves 328
- centroid-tracker measurements 321
- collimated beams 331, 333
- components
 - cross correlation 320
 - in the ray plane 121, 320
 - normal to the ray path 121
 - normal to the ray plane 320
 - distance scaling 323
 - distribution of angular errors 379
 - energy-loss region, influence of 363
 - focused beams 333
- frequency variation, relation to 381, 382
- geometrical optics expression 123
- interferometric measurements 319
- ionospheric influences 357
- long-baseline interferometry 362
- measurement considerations 318
- microwave tracking of satellites 352
- plane waves 322
- power spectrum 363
- radio astronomy 356
- scaling with aperture size 337, 361
- source averaging 346
 - wavenumber-weighting function 348
- spatial correlation 338, 342
- spatial covariance of bearing errors 365
- spherical atmosphere 364
- spherical waves 323
- tropospheric influences 362
- variance 324
 - ionosphere 357
- wave-front tilt 319
- wavenumber-weighting functions 340, 345
- zenith-angle scaling 336, 360
- angular resolution
 - interferometry 202–4
 - radio astronomy 356
- anisotropic irregularities 47
 - angle-of-arrival 349
- axial ratio 97
- composite model of atmosphere 83
- ellipsoidal model 49, 84, 349
- elongated irregularities 84, 167

- anisotropic irregularities (*cont.*)
