Contents

Preface xi

M. Blagrove
Introduction xi

1 J. A. Hobson, E. F. Pace-Schott, and R. Stickgold
Dreaming and the brain: Toward a cognitive neuroscience of conscious states 1

2 M. Solms
Dreaming and REM sleep are controlled by different brain mechanisms 51

3 T. A. Nielsen
A review of mentation in REM and NREM sleep: “Covert” REM sleep as a possible reconciliation of two opposing models 59

4 R. P. Vertes and K. E. Eastman
The case against memory consolidation in REM sleep 75

5 A. Revonsuo
The reinterpretation of dreams: An evolutionary hypothesis of the function of dreaming 85

Open Peer Commentary and Authors’ Responses 112

Table of Commentators

Antrobus, J. S. How does the dreaming brain explain the dreaming mind? 115

Ardito, R. B. Dreaming as an active construction of meaning 118

Bednar, J. A. Internally-generated activity, non-episodic memory, and emotional salience in sleep 119

Blagrove, M. Dreams have meaning but no function 121

Borbély, A. A. & Wittmann, L. Sleep, not REM sleep, is the royal road to dreams 122

Born, J. & Gaia, S. REM sleep deprivation: The wrong paradigm leading to wrong conclusions 123

Bosinelli, M. & Cicolina, P. C. REM and NREM mentation: Nielsen’s model once again supports the supremacy of REM 124

Cartwright, R. How and why the brain makes dreams: A report card on current research on dreaming 125

Cavallero, C. REM sleep = dreaming: The never-ending story 127

Chapman, P. & Underwood, G. Mental states during dreaming and daydreaming: Some methodological loopholes 128

Cheyne, J. A. Play, dreams, and simulation 129

Cipolli, C. Iterative processing of information during sleep may improve consolidation 130

Clancey, W. J. Conceptual coordination bridges information processing and neuropsychology 130

Coenen, A. The divorce of REM sleep and dreaming 133

Conduit, R., Crewe, S. G. & Coleman, G. Shedding old assumptions and consolidating what we know: Toward an attention-based model of dreaming 135

Domhoff, G. W. Needed: A new theory 139

Doricchi, F. & Violani, C. Mesolimbic dopamine and the neuropsychology of dreaming Some caution and reconsiderations 141

Feinberg, I. REM sleep. Desperately seeking isomorphism 142

Fischbein, W. The case against memory consolidation in REM sleep: Balderdash! 145

Flanagan, O. Dreaming is not an adaptation 147

Frantzini, C. Sleep, dreaming, and brain activation 150

Contents

Germain, A., Nielsen, T. A., Zadra, A. & Montplaisir, J. The prevalence of typical dream themes challenges the specificity of the threat simulation theory 151

Gottesmann, C. Each distinct type of mental state is supported by specific brain functions 152

Greenberg, R. Where is the forest? Where is the dream? 154

Greene, R. W. State-dependent modulation of cognitive function 156

Gunderson, K. The dramaturgy of dreams in Pleistocene minds and our own 157

Hartmann, E. The waking-to-dreaming continuum, and the effects of emotion 158

Herman, J. Reflexive and orienting properties of REM sleep dreaming and eye movements 161

Hobson, J. A. The ghost of Sigmund Freud haunts Mark Solms’s dream theory 162

Humphrey, N. Dreaming as play 164

Hunter, H. T. New multiplicities of dreaming and REMing 164

Jones, B. E. The interpretation of physiology 166

Kahan, T. L. The “problem” of dreaming in NREM sleep continues to challenge reductionist (two generator) models of dream generation 167

Kambalia, A. & Shapiro, C. M. A new approach for explaining dreaming and REM sleep mechanisms 169

Kramer, M. Dreaming has content and meaning not just form 170

Krieckhaus, F. E. Papel dreams: Mechanism and phenomenology of dreaming 172

LaBerge, S. Lucid dreaming. Evidence and methodology 173

Lehmann, D. & Koukkou, M. All brain work – including recall – is state-dependent 176

Levin, B. Nightmares: Friend or foe? 177

Lydte, R. & Bagby, H. A. Koch’s postulates confirm cholinergic modulation of REM sleep 178

Lynch, G., Colgin, L. L. & Palmer, L. “Spandrels of the night?” 178

Maneia, M. Dream production is not chaotic 179

Marczynski, T. J. Novel concepts of sleep-wakefulness and neuronal information coding 180

Marroni, G. Sleep can be related to memory, even if REM sleep is not 183

Mealey, L. The illusory function of dreams: Another example of cognitive bias 183

Montauro, J. A more general evolutionary hypothesis about dream function 184

Moorecroft, W. H. Sorting out additions to the understanding of cognition during sleep 185

Morgane, P. J. & Mokler, D. J. Dreams and sleep: Are new schemas revealing? 188

Morrisson, A. R. & Sanford, L. D. Critical brain characteristics to consider in developing dream and memory theories 189

Nielsen, T. A. & Germain, A. Post-traumatic nightmares as a dysfunctional state 190

Nofzinger, E. A. Insights from functional neuroimaging studies of behavioral state regulation in healthy and depressed subjects 191

Occhionero, M. & Esposito, M. J. Toward a new neuropsychological isomorphism 192

Ogilvie, B. D., Takeuchi, T. & Murphy, T. I. Expanding Nielsen’s covert REM model, questioning Solms’s approach to dreaming and REM sleep, and re-interpreting the Vertes & Eastman view of REM sleep and memory 193

Pace-Schott, E. F. Nielsen’s concept of covert REM sleep is a path toward a more realistic view of sleep psychophysics 195

Palie, J. F. Dreaming is not a non-conscious electrophysiologic state 196

Panksepp, J. “The dream of reason creates monsters” . . . especially when we neglect the role of emotions in REM-states 200

Perry, E. K. & Piggott, M. A. Neurotransmitter mechanisms of dreaming: Implication of modulatory systems based on dream intensity 202

Peterson, J. B. & DeYoung, C. C. Metaphoric threat is more real than real threat 204

Porras, C. M. One machinery, multiple cognitive states: The value of the AIM model 205

Porte, H. S. Neural constraints on cognition in sleep 206

Revenue, A. The contents of consciousness during sleep: Some theoretical problems 207

Rotenberg, V. S. Search activity: A key to resolving contradictions in sleep/dream investigation 208

Salin-Paseval, R., Geraetschenko, D. & Shiromani, P. J. Some myths are slow to die 211

Saltararo, P. Time course of dreaming and sleep organization 212

Scherdl, M. Dream research: Integration of physiological and psychological models 213

Shackelford, T. K. & Weekes-Shackelford, V. A. Threat simulation, dreams, and domain-specificity 216

Shevlin, H. & Eiser, A. S. Continued vitality of the Freudian theory of dreaming 216

Siegel, J. M. Phylogenetic date bearing on the REM sleep learning connection 219

Smith, C. & Rose, G. M. Evaluating the relationship between REM and memory consolidation: A need for scholarship and hypothesis testing 219

Solms, M. The mechanism of the REM state is more than a sum of its parts 220

Steriade, M. Neural basis of dreaming and mentation during slow-wave (non-REM) sleep 221
