Part I The building blocks of the soil	1
1 Introduction	3
Pioneers of soil science, soil survey and soil geography	4
Things we hold self-evident ...	6
The framework for this book	7
2 Basic concepts: soil morphology	9
Texture	9
Color	14
Pores, voids and bulk density	17
Structure	18
Consistence	20
Presentation of soil profile data	22
Soil micromorphology	22
3 Basic concepts: soil horizonation ... the alphabet of soils	32
Regolith, residuum and the weathering profile	32
The soil profile, pedon, polypedon and map unit	33
Soil horizons and the solum	36
Types of soil horizons	36
Buried soils	52
4 Basic concepts: soil mineralogy	54
Bonding and crystal structures	54
Oxides	55
Chlorides, carbonates, sulfates, sulfides, and phosphates	60
Silicates	61
Identification of phyllosilicates by X-ray diffraction	73
Identification of iron and aluminum oxides	80
5 Basic concepts: soil physics	82
Soil water retention and energy	82
Soil water movement	85
Soil temperature	87
Soil gas composition and transport	91

6	Basic concepts: soil organisms	93
	Primary producers	93
	Soil fauna	96
7	Soil classification, mapping and maps	106
	Soil geography, mapping and classification	106
	The system of Soil Taxonomy	107
	The Canadian system of soil classification	146
	Soil mapping and soil maps	146
	Soil landscape analysis	158
Part II Soil genesis: from parent material to soil		165
8	Soil parent materials	167
	Effects of parent material on soils	167
	The mutability of time _{e,zero}	169
	A classification of parent materials	170
	Lithologic discontinuities in soil parent materials	215
9	Weathering	226
	Physical weathering	227
	Chemical and biotic weathering	231
	Products of weathering	236
	Controls on physical and chemical weathering	236
	Assessing weathering intensity	238
10	Pedoturbation	239
	Classifying pedoturbation: proisotropic vs. proanisotropiC	239
	Expressions of pedoturbation	244
	Forms of pedoturbation	245
	Lesser-studied forms of pedoturbation	293
11	Models and concepts of soil formation	295
	Dokuchaev and Jenny: functional-factorial models	296
	Simonson's process-systems model	320
	Runge's energy model	323
	Johnson's soil thickness model	324
	Johnson and Watson-Stegner's soil evolution model	325
	Phillips' deterministic chaos and uncertainty concepts	339
	Other models	342
	The geologic timescale and paleoclimates as applied to soils	342
12	Soil genesis and profile differentiation	347
	Eluviation-illuviation	353
	Process bundles	354

Surface additions and losses	456
Mass balance analysis, strain and self-weight collapse	460
<hr/>	
Part III Soil geomorphology	463
13 Soil geomorphology and hydrology	465
The geomorphic surface	466
Surface morphometry	468
The catena concept	469
Soil geomorphology case studies, models and paradigms	514
14 Soil development and surface exposure dating	547
Stratigraphic terminology, principles and geomorphic surfaces	547
Numerical dating	549
Relative dating	550
Principles of surface exposure dating (SED)	554
SED methods based on geomorphology, geology and biology	555
SED methods based on soil development	567
Chronosequences	587
Numerical dating techniques applicable to soils	596
15 Soils, paleosols and paleoenvironmental reconstruction	619
Paleosols and paleopedology	620
Environmental pedo-signatures	632
16 Conclusions and Perspectives	653
<i>References</i>	657
<i>Glossary</i>	741
<i>Index</i>	791
