## Subject Index

- activity, 3, 9, 14, 29, 193
- affect, *see* emotion
- age, 198–9, 200–1, 270
- aggression, *see also* anger, hostility  
 amygdala, 70  
 and augmenting-reducing, 194  
 and autonomic arousal, 223–5, 243  
 biochemistry of, 228–34  
 and cortical/subcortical arousal, 225–8, 243  
 and cortisol, 230  
 and dopamine, 114, 221–2, 230–4  
 and evolution, 257  
 and family environment, 220, 237, 240–2, genetics of, 216–23, 232, 242–3, 258  
 homicide, 132, 214, 229, 231, 235, 240  
 and monoamine oxidase (MAO), 201, 220–1, 223  
 neuropsychology of, 234–42, 244  
 and neurotransmitters, 230–4  
 and norepinephrine, 233  
 and pregnancy and birth complications, 237, 240–2, 244  
 psychophysiology of, 223–8  
 and sensation seeking, 234–5  
 and serotonin, 148, 206, 221–2, 230–4, 243–4  
 serotonin reuptake inhibitors, effect on, 232  
 and testosterone, 228–30, 243  
 types of, 213–15
- agreeableness, 21, 26–7, 134–5, 213–34, *see also* aggression
- alcohol/alcoholism, *see* drugs
- altruism, 215
- amygdala, 70–1, 120, 135, 140–1, 155, 157–64, 208, 226, 235–7, 273
- anger, 126–7, 135, 148, 214–15, 225, 230, 233–4, 236–7, 242  
*see also* aggression, and hostility
- animal models, 249–252  
 of aggression, 213, 220–21, 228, 230–1, 233–5, 238, 258  
 of anxiety (Gray's model, primarily rats), 155  
 augmenting-reducing (cats and rats), 192–195  
 intracranial self-stimulation (several species), 80  
 monoamine oxidase (monkeys), 201  
 natural observation (many species), 114, 117–8  
 novelty seeking (rats), 195–6  
 open-field test (mice & rats), 249–250
- antisocial personality disorder, *see* psychopathic personality
- anxiety, 11–12, 19–22  
*see also* anxiety disorders, and neuroticism  
 alarm system, 145–6  
 amygdala, 70, 157–164  
 anxiety dimension, 145  
 and depression (genetic covariation), 127  
 and norepinephrine, 146–7  
 and punishment (stimuli associated with), 144  
 and serotonin, 146–7  
 state and trait, 126–152
- anxiety disorders, 145, 148, 150, 164, 208, 224, 231, 265, 268, 273–4
- approach, 4, 6–7, 13–14, 119, 234, 250, 270  
*see also* novelty and sensation seeking  
 Behavioral Approach System (BAS), 21, 33–7  
 dopamine and, 114–5, 205, 269  
 evoked potentials and, 81  
 genetics of, 185  
 serotonin and, 81
- arousal, 21–22

## Subject Index

319

- and aggression, 223–8
- behavioral in infants, 199
- and extraversion, 103–13, 137, 265–66
- and neuroticism, 137–9, 141–5, 155
- optimal level of, 102–103
- in psychopathic personality, 208–9, 224
- and sensation seeking, 187–97, 268–9
- assortative mating, 257
- attention deficit hyperactivity disorder (ADHD), 30, 184, 200, 224
- augmenting-reducing, 210
  - biochemical correlates of, 196–7
  - of the cortical evoked potential (EP), 191–6, 267
  - kinesthetic after-effect (KAE), 191
  - and sensation seeking, 191–5
- autonomic nervous system (ANS) and ANS arousal, 56–63, 207–9
- basal ganglia, 66, 108, 203
- Behavioral Approach System (BAS), *see* approach
- Behavioral Inhibition System (BIS) *see* inhibition
- bipolar mood disorder (manic-depression), 199–200
- boldness, 250–1, 269–70
- borderline personality disorder, 200, 206
- boredom, 175, 214, 258
- brain (*see* separate headings for specific parts and cerebral hemispheres and cerebral cortex)
  - evolution of, 64–6
  - triune brain, 155, 247–8
  - volume, 272
- brain imaging, 40–1, 272–3
  - computed axial tomography (CAT), 72–4
  - extraversion and, 106–9, 117
  - functional magnetic resonance imaging (fMRI), 74
  - magnetic resonance imaging (MRI), 72–4
  - positron emission tomography (PET), 54–6
- brain self-stimulation (electrical), 194–5, 209, 234
- brainstem auditory evoked potential, 109
- catechol-O-methyltransferase (COMT), 76–8, 222
- cerebral cortex, *see also* brain and cerebral hemispheres
  - cortical arousal, 103–9
  - cortical arousability (evoked potentials) 109–13
  - prefrontal, 115, 120, 156, 158–9, 161–2
  - sensory areas of, 159–61, 194–5, 207–9, 226, 234–6, 271
  - temporal, 236
- cerebral hemispheres, 65–69
  - see also* brain and cerebral cortex
  - frontal lobe, 66, 68, 140–1, 161–2
  - lateralization of, 69, 138–40, 162, 208, 227, 273
  - temporal lobe, 140–1, 208
- cholecystokinin (CCK), 85
- cingulum/cingulotomy, 70, 108, 121, 273
- comparative trait psychology, 249–252, 267
- competition, 228–30
- conditioning, 102, 121, 246
- conscientiousness
  - definition of, 26–27, 169, 172
  - evolution and, 257
  - genetics of, 172–3, 209
- consilience 245
- consistency of traits, 5–6, 18–19, 28, 169
- constraint, *see* control
- control (self)/constraint, 11–12, 22–3, 114, 116, 118, 168–9, 176, 179, 201, 206, 209
- corpus callosum, 226–7
- cortisol, *see* hormones
- criminality, *see* psychopathic personality
- defensive reflex (DR), 60–1, 143
  - see also* orienting reflex and startle reflex
- delay of gratification, 12
- delinquency, *see* psychopathic personality
- depression/mood disorders
  - and anxiety, genetic covariation
  - dopamine and, 115
  - and serotonin, 148–9, 231–3
  - state and trait, 126
  - and testosterone, 228
- dexamethasone suppression test, *see* hormones
- disinhibition, 191–3, 197, 201, 203–6, 214, 263–4, 267
  - see also* inhibition
- dominance, 114, 116, 228–30, 251–2, 257
- dopamine and dopamine systems
  - and aggression, 221–222
  - and emotions, 116–17
  - and extraversion, 114–17
  - genes, 100–2
  - mesolimbic dopamine system, 119, 194–5
  - and novelty seeking (in rats), 195–6, 271
  - Parkinson's disease, 115–16
  - and psychoticism, 205
  - receptors, 79, 204, 210, 221–2
  - and sensation seeking, 203–5
  - systems, 80–1, 119, 271
- drugs/substance abuse, 186, 200, 210, 214–15
  - alcohol, 185–6, 194, 199–200, 214, 225, 229
  - amphetamines, 80, 186, 195, 202–3, 209
  - benzodiazepines, 82
  - cocaine, 80, 186, 214

- drugs/substance abuse (*cont.*)  
 ecstasy, 197  
 heroin, 80, 186, 214  
 nicotine, 184–5, 200, 203  
 opiates, 84, 120, 186–7, 209, 214  
 stimulants, 120
- emotion/affect  
 affect traits, 22–3, 34–7, 274  
 and the autonomic nervous system, 39  
 dopamine and positive emotions, 114, 116  
 emotion recognition, 121  
 emotionality (temperament type), 3, 5–9,  
 125–6, 132, 185, 208, 231  
 and laterality (brain), 138, 141  
 and serotonin, 81  
 theories of (Cannon-Bard, James Lange),  
 153–4
- empathy, 121, 166–7
- endorphins, 84, 120, 196
- environment, 210  
*see also* rearing  
 non-shared (specific) 44, 127, 129–30, 209,  
 216, 219, 263  
 parental influences, 263–4  
 parental maltreatment/rejection, 237,  
 240–2, 264  
 peer influences, 263  
 shared, 43–5, 176–7, 180–4, 187, 209, 220,  
 222, 227, 263–4
- evolution, 64–6, 155, 245–48, 256–62, 267,  
 273–4
- evolutionary psychology, critique, 259–61
- exploration, 193–94, 210, 269, 271
- extraversion  
 extraversion-introversion, 19–20, 88–124  
 brain imaging, 106–9  
 and conditioning  
 and cortical arousal/arousability, 103–13,  
 137, 265–6  
 definition of, 16–17, 26–7, 89–90  
 genetics of, 90–102  
 goals of, 3  
 history of the trait concept, 88  
 and monoamine neurotransmitters, 114–17  
 and monoamine oxidase (MAO), 117–18  
 neuropsychology of, 119–21  
 and neuroticism, 89–90  
 psychophysiology of, 102–13  
 and testosterone, 118
- fear, *see* anxiety
- gamma-aminobutyric acid (GABA), 82, 84,  
 134, 150, 270  
 genetics, 41–51, 247  
*see also* heredity  
 of aggression, 216–23, 232, 242–3, 258
- behavior genetics, 262–5  
 of conscientiousness, 172–3  
 deoxyribonucleic acid (DNA), 48–9  
 endophenotypes, 265  
 of extraversion, 90–102  
 gene interaction, 264–5  
 of impulsivity, 170–2, 179  
 molecular genetics, 48–51, 264–5  
 of neuroticism, 127–37, 164–5  
 of psychopathy and criminality, 177–84,  
 187  
 of psychoticism, 169–70  
 of sensation seeking, 174–77, 184–5, 187
- harm avoidance, 23–5  
*see also* anxiety
- heredity/heritability, 3–4  
*also see* genetics  
 adoption studies, 45–7  
 of cardiovascular measures, 62  
 gene-environment correlation, 44–5  
 heritability, 42–8
- hippocampus, 155, 156, 159, 163–4, 208, 226,  
 272
- homicide, *see* aggression
- hormones and hormone systems, 82–4  
*see also*, testosterone  
 cortisol, 151–2, 163–4, 197–8, 210, 230,  
 270–1  
 dexamethasone suppression test, 151–2  
 hypothalamic-pituitary-adrenal cortex  
 (HYPAC) system, 83, 150–3, 157, 160,  
 162–3, 194–6, 231
- hostility, 126–7, 134, 148, 242  
*see also* aggression and anger
- hypothalamus, 70–1, 83–4, 157, 163, 194, 209,  
 234–5
- impulsivity, *see also* control  
 and arousal/arousability, cortical, 190–1,  
 210, 267  
 and augmenting-reducing, 192–3  
 definition of, 18, 29, 102, 113–14, 170–2,  
 252–6  
 and frontal lobes, 208, 235  
 genetics of, 170–2, 179, 209  
 and monoamine oxidase (MAO) 201  
 and serotonin, 206, 231  
 types of, 254–6
- inhibition, 10–12  
*see also*, disinhibition  
 Behavioral Inhibition System (BIS), 21–2,  
 33–7, 156–9  
 and cortisol, 151  
 and frontal lobes, 208  
 genetics of inhibited temperament,  
 185  
 genetics of avoidance behavior, 185

## Subject Index

321

- reactive inhibition, 102  
 and serotonin, 146, 269  
 introversion, *see* extraversion
- lateralization, *see* cerebral hemispheres.
- limbic brain (system), 65, 104, 108, 154–5  
 lobotomy, 68–9, 207  
 locus coeruleus (LC), 79, 145–6, 157, 208, 212  
 love, 260
- maternal behavior, rats, 194  
*see also* environment for human maternal behavior
- medial forebrain bundle (MFB), 80, 120, 209  
 monoamine oxidase (MAO)  
   A type and aggression, 187, 198, 201–2, 220–1, 243, 270  
   B type and augmenting-reducing, 196  
   B type and extraversion, 117–18  
   B type and sensation seeking, 196, 198–202, 211, 269
- monoamine systems, 74–82, 202, 206–7  
*see also* dopamine, epinephrine, norepinephrine, and serotonin  
 enzymes and metabolites, 77–9  
 and extraversion, 114–17  
 and neuroticism, 147–50  
 receptors, 78–9, 207  
 reliabilities, 150  
 receptors, 78–9, 207
- neuropsychology, 64–74, 272–3  
   of aggression, 234–42, 244  
   of extraversion, 119–21  
   of neuroticism, 119–21  
   of sensation seeking, 207–212
- neurosis, 125–6  
*see also* anxiety disorders
- neuroticism, 11, 125–67, 215  
 and autonomic arousal, 142–5  
 and cortisol, 152  
 definition of, 17, 27, 126  
 and evoked potentials, 141–2  
 genetics of, 127–37, 164–5  
 goals of, 3  
 and hormones, 150–3  
 and introversion, 89–90  
 neuropsychology of, 153–64  
 and norepinephrine, 146–9  
 and Parkinson's disease, 116  
 psychopharmacology of, 145–53, 165–6  
 psychophysiology of, 137–45, 165  
 and serotonin, 132–5, 148–9  
 as a temperament, 125
- neurotransmitters, 40, 85, 74–5  
 noradrenaline, *see* norepinephrine  
 norepinephrine (NE)/noradrenergic systems, 75–77, 213  
 and aggression, 233  
 as an alarm system, 145–6, 208  
 and anxiety/neuroticism, 147–8, 208  
 as a behavioral inhibition system (BIS), 146  
 receptors, 79, 146–7  
 and sensation seeking, 202–3, 212  
 and separation stress, 149–150  
 systems, 77, 79
- novelty (novel stimuli or environments), 11, 209, 268, 271
- novelty seeking, *see* sensation seeking
- nucleus accumbens, 80–1, 115, 119, 195–6, 209, 271–2
- optimal level of arousal (OLA), *see* arousal
- oxytocin, 84, 118
- openness to experience, 26–27, 30
- orienting reflex (OR), 60–1, 185  
*see also* defensive reflex, startle reflex  
 and antisocial (psychopathic) personality/criminality, 187–90, 210, 224  
 and neuroticism, 143  
 and sensation seeking, 188–90, 268
- panic disorder, 58, 273
- Papez circuit, 69–70, 154–5, 158–9
- Parkinson's Disease, 115–16, 205
- personality traits  
   in animals (non-human), 249–252  
   basic factors, definition of, 15–38  
   classification systems, 15–38  
   lexical analyses of, 26–7  
   and types, 1–2, 259
- phrenology, 72–3
- post-traumatic stress disorder (PTSD), 164, 197, 272
- psychopathic personality/antisocial personality, 17, 20, 121, 168–9  
 arousal/arousability, autonomic, 189–90, 207–8, 224  
 arousal/arousability, cortical, 192  
 brain injury in, 207,  
 and cortisol, 197  
 and emotional responsivity, 208  
 genetics of, 177–80, 187–8, 242  
 genetics of criminality, 180–4, 187–8, 210, 264  
 and homicide, 214  
 and monoamine oxidase (MAO), 200  
 and norepinephrine, 202
- psychopharmacology methods, 74–85  
 psychophysiology methods, 51–54, 63, 265  
*see also* brain imaging  
 cardiovascular activity, 58–63  
 cortical evoked potentials, 52–4  
 electrodermal activity, 57–8  
 electroencephalogram (EEG), 51–2

- psychoticism, *see also*, psychopathic personality  
 and aggression, 215, 234  
 definition of, 17–19, 121, 168–9  
 and dopamine, 205  
 genetics of, 169–70  
 reliability of, 169  
 and serotonin, 206  
 punishment/nonreward, 21–3, 102–13, 156–7, 208, 212, 224, 272
- rearing (monkeys), 133, 149–50  
 reductionism, 245, 247  
 reticular formation, 72  
 reticular activating system (RAS) 102–4, 156  
 reward, 21–3, 113, 193, 201  
 dependence, 23–5  
 and extraversion, 90, 119  
 and sensation seeking, 212
- sensation seeking/novelty seeking  
 and aggression, 224, 235  
 assortative mating for, 257  
 and autonomic arousal/arousability, 187–90, 268  
 biochemistry of, 197–207  
 and cortical arousal/arousability, 190–6, 210  
 definition of, 23–4, 27, 29, 168–9  
 and dopamine, 114–5, 203–5, 211  
 and dopamine-beta-hydroxylase (DBH), 202  
 evolution of, 256–8  
 genetics of, 174–7, 184, 187, 209, 263–4  
 and hormones, 197–8  
 and monoamine oxidase (MAO), 198–202, 269–70  
 and monoamines, 202–7  
 neuropsychology of, 207–12  
 and norepinephrine, 202–3, 212  
 optimal levels of stimulation (OLS) and arousal (OLA), 103, 113, 173  
 and the orienting reflex (OR), 188–90, 268  
 psychophysiology of, 187–97  
 and serotonin, 205–6, 211–12  
 and testosterone, 198
- schizophrenia, 164, 200, 208  
 septo-hippocampal system, 119–20, 156–9, 235  
 serotonin (5-HT) and serotonergic systems  
 and aggression, 221–2, 230–4, 243  
 and antisocial personality disorder, 208  
 and anxiety/harm avoidance, 146–8  
 and augmenting-reducing, 196–7  
 genetic interaction with dopamine and norepinephrine, 206  
 genetics of, 132–4, 185  
 and monoamine oxidase (MAO), 199  
 and neuroticism/anxiety, 147–8  
 receptors, 79  
 reuptake inhibitors, 132, 134–5, 148, 232
