<i>Preface</i>	<i>page</i> vii
<i>Acknowledgements</i>	x
<i>Glossary</i>	xi
1 Introduction	1
1.1 Molecules in solution	4
1.2 Looking forward	16
1.3 Notation and the theory of molecular liquids	16
2 Statistical thermodynamic necessities	23
2.1 The free energy and chemical potentials	23
3 Potential distribution theorem	32
3.1 Derivation of the potential distribution theorem	39
3.2 Weak field limit	40
3.3 Potential distribution theorem view of averages	41
3.4 Ensemble dependence	43
3.5 Inhomogeneous systems	44
3.6 Reduced distribution functions	47
3.7 Activity coefficients and solution standard states	51
3.8 Quantum mechanical ingredients and generalizations	53
4 Models	61
4.1 Van der Waals model of dense liquids	61
4.2 Dielectric solvation – Born – models	67
4.3 Excluded volume interactions and packing in liquids	73
4.4 Flory–Huggins model of polymer mixtures	78
4.5 Electrolyte solutions and the Debye–Hückel theory	89
4.6 Clustering in dilute solutions and Pitzer models	94

Cambridge University Press

0521822157 - The Potential Distribution Theorem and Models of Molecular Solutions

Thomas L. Beck, Michael E. Paulaitis and Lawrence R. Pratt

Table of Contents

[More information](#)

vi	<i>Contents</i>	
5	Generalities	100
5.1	Reference systems and umbrella sampling	100
5.2	Overlap methods	104
5.3	Perturbation theory	105
5.4	Thermodynamic integration	116
5.5	Bias	118
5.6	Stratification	120
6	Statistical tentacles	123
6.1	The MM and KS expansions	123
6.2	Density functional and classic integral equation theories	132
6.3	Kirkwood–Buff theory	140
7	Quasi-chemical theory	142
7.1	Derivation of the basic quasi-chemical formula	143
7.2	Clustering in more detail	146
7.3	An example of a primitive quasi-chemical treatment: $\text{Be}^{2+}(\text{aq})$	149
7.4	Analysis of <i>ab initio</i> molecular dynamics	153
7.5	Packing in classical liquids	157
7.6	Self-consistent molecular field for packing	160
7.7	Historical quasi-chemical calculation	166
7.8	Explicit–implicit solvent models	168
8	Developed examples	172
8.1	Polymers	172
8.2	Primitive hydrophobic effects	180
8.3	Primitive hydrophilic phenomena: ion hydration	198
	<i>References</i>	214
	<i>Index</i>	229
