## *Building a Dynamic Europe*

This succinct book provides a broad panorama of the key economic policy challenges facing the European Union today. The enlargement of the EU and its lacklustre performance over the last decade in terms of employment and productivity growth have prompted wide-ranging calls for economic reform, both at the EU level and within member states. This volume brings together several leading thinkers in the key areas of policy under discussion, ranging from the institutional design of the enlarged EU for efficient policy-making, to the extent and nature of the integration process in markets such as those of energy and financial services. It includes analyses of the problems of macro-economic policy co-ordination in the EU and analyses of the reforms in the labour markets and welfare state institutions. Timely and authoritative, this book is accessibly written and will appeal to a wide policy audience.

JORDI GUAL is Professor and Departmental Chair of Economics at IESE Business School (University of Navarra, Barcelona–Madrid). He is editor and co-author of *The Social Dimensions of Employment* (2002), *Europe's Network Industries: Conflicting Priorities. Telecommunications* (1998) and *The Social Challenge of Job Creation: Combating Unemployment in Europe* (1996).

The Public–Private Sector Research Center was created in October 2001. Its mission is to foster co-operation between the private sector and public administrations, as well as the exchange of ideas and initiatives, through dialogue, research and education.

The sponsors of the Center are: Accenture, Barcelona's City Council, BBVA, Diputació de Barcelona, Garrigues Abogados y Asesores Tributarios, the Catalan Government (Generalitat de Catalunya), Merck Sharp & Dohme, the Official Barcelona Chamber of Commerce Industry and Navigation, Patronat Català Pro-Europa, Swiss Life (Spain), Telefónica, S.A. and T-Systems.

## *Acknowledgements*

The idea of this book grew out of an international conference on economic reforms in Europe which took place at the IESE Business School in the autumn of 2001, a few months before the Barcelona European Council of 2002. The support provided for that conference by the Fundación Ramón Areces and the Fundación ICO and in particular the impulse provided by Roman Escolano are gratefully acknowledged. Several of the chapters in this book were first presented at that conference and benefited from the contributions of leading experts and practitioners attending the meeting.

I would like to acknowledge also the support of the Public–Private Sector Research Center at the IESE Business School, which has made possible the publication of the revised conference papers, adding contributions with the goal of providing a broad analysis of the key policy debates in the European Union. The support of Jordi Canals, dean of the IESE Business School, has been fundamental for the completion of this project. Teresa Sanjaume and Susana Minguell also provided invaluable support at different stages in the preparation of the conference and the volume.
