1	Research methods and democratization	1
	Rationale	1
	Overview	4
2	Defining and measuring democracy	11
	Operationalizing concepts	14
	Measurement	23
	Consequences for analysis	33
	Thickening thin concepts	44
	Conclusion	47
3	Criteria for evaluating causal theories	49
	Three fundamental criteria for good theory	52
	Multiple paths to theory	62
	Toward theoretical perfection	74
4	Checklists, frameworks, and Boolean analysis	76
	Conventional wisdoms	77
	What checklists tell us	92
	Moving beyond checklists: Inductive theoretical frameworks	95
	Boolean analysis	108
	Appendix: Coding criteria and sources for checklist demonstration	113
5	Case studies and comparative history	115
	Histories and case studies	116
	The nature of comparative histories	129

	Evaluation of the comparative-historical approach	140
	Appendix	151
6	Formal models and theories	158
	Integration	159
	Positional models of liberalization	165
	Positional models of transition and survival	170
	Economic models of transition and survival	176
	Evaluating formal theories and models	182
	Conclusion	192
7	Rigor in extensive and intensive testing	194
	Degrees and kinds of rigor	204
	Trade-offs between extensive and intensive testing	206
	Toward testing that is extensive and intensive	214
	Prospects	220
8	Political culture and survey research	222
	Versions of political culture	223
	Macro-macro studies	228
	A comprehensive framework	237
	Political culture and mass-led regime change or consolidation	242
	Conclusion	255
9	Quantitative testing	257
	Assumptions of quantitative analysis	259
	Tests with cross-sectional data	268
	The complications and advantages of time-series	
	cross-sectional data	275
	Other dependent variables	286
	Other explanatory variables	289
	Conclusion	304
10	An agenda for future research	310
	Concepts and indicators	311
	Case studies and comparative histories	315
	Formal models and theories	318
	Political culture	321
