observing schedule 473–474
retirement 474
stellar chromospheric activity cycles 473
Wilson, Ralph Elmer 298, 315, 317
Astronomical Journal associate editor 355
convergent point extended region 349–350
Dudley Observatory 314
Geodell Observatory 333
high-velocity stars space motion
asymmetry 373
Lick Observatory 353
long-period variables 356–361

Index

RR Lyrae star velocities 271
Mills expedition to Chile 353–354
Mount Wilson Observatory 354–355
Popular Astronomy editor 355, 355–356
radial velocities
catalog 276–278, 355
southern stars 264
retirement 356
solar motion 350–351
statistical astronomy 360
Wilson Trail or Sierra Madre Trail
Wirtz, C. W. 396
Wolf, Max 483
Wolf-Rayet stars 253, 455
binary character 473
Wollaston, William 51–53
Woollery, Richard van der Riet 444–445
Wright, Thomas 221–222
Wright, Walter S. 24
Wright, William 264
Year Book (1902)
Astronomy Advisory Committee report
35–40
essays 35–40
preface 35–36
Year Book 2.41
Committee on Observatories complete
report 41
Yerkes, Charles T. 34
Yerkes Expedition 13

Yerkes Observatory 1, 7–8
40-inch lenses for telescope 25
dedication 92
Hale as director 34, 160
subgiants spectral classification 541
telescope 92
weather conditions 8
Young, Charles 58, 59
Zeeman, Pieter 72–73, 78
Zeeman effect 32, 66, 72–73, 77–79
anomalous 77–78
displacement curves 117–118, 120
deviation 119, 121
doublets 82
displacement of centers 117
Leighton’s magnetograph 445
patterns 77–79
problems with 115–112
separation measurement 112
doublets 82
solar global magnetic field 415
splitting determination 67
stellar magnetic fields 413
sunspots
magnetic fields 76, 83
spectral line displacement 117–118
Zimmer, Meade L. 344
zirconium oxide 272, 274
Zirin, Harold 467
Zwicky, Fritz 511
