## Index

---

- actuarial fairness 128, 137, 146
  - economic factors outweighing 129
  - justice according to 128–9
  - premium calculated according to 137
  - withholding genetic information and 130–1
- actuarial implications, genetics of 33
- actuarial risk, calculation factors 128–9
- adverse selection
  - asymmetric information and 40, 55–6, 104
  - continuous accentuation 78–9
  - empirical evidence for effect of 147
  - future significance of 40–1, 74
  - HIV 105
  - increasing 75
  - insurance companies and 4, 5, 7, 24–5, 104
  - insurance market, risk to 39–40, 46, 104, 136
  - partial regulation ameliorating effect of 106, 147
  - private insurance, threat to 105
  - total regulation, accentuating effect of 149
  - value limited total regulation and 108
- Akerlof, G. 4
- alleles 14
- anti-discrimination legislation
  - homosexuals 95
  - media, promotion by 95
  - political basis for 94–5
  - women 95
- Arrow, Kenneth 55, 56
- asymmetric information
  - adverse selection, effect on 40, 55–6
  - insurance companies, use by 4, 7, 24
  - insurance contract based on 46
  - total regulation and 39
- autonomy
  - definition of 109–10
  - deontic status of 110
- differing ideals of 110–12
- genetic information and 109, 115
- genetic testing, case studies 112–13, 114–15
- Kantian view of 109, 111
- Millian view of 112, 113–14, 116, 117, 132
- modern liberal viewpoint 115
- right to privacy and 117, 144
- self-determination, relationship with 109, 110, 117
- self-realisation and 113–14
- banking secrecy 70, 72
- benefit and burden
  - distributive justice 122
  - insurance considerations 122
  - priority principle 127
- Berge, A.
  - Sweden, social insurance coverage in 53
- biochemical gene tests 21
- biological inheritance, significance of 12
- Bismarck, Otto von 52
- Bolkestein, Frits 70
- BRCA1, gene mutation 16
- cancer 14
  - hereditary factors 15–16
  - negligible risk, insurance and 44
  - preventive measures 107
- chromosomes 14
- cloning 11, 20
  - US prohibition on 68
- collective insurance, inherent deficiencies of 142
- communitarian justice 134–7
- compensation
  - high-risk individuals 130
  - private health insurance provision 105
  - right to 133
  - social insurance, level provided by 150

- competition
  - insurance companies, genetic testing and 78
  - social insurance systems, exposure to 49
- confidentiality, genetic testing results 43
- consequentialism 102–4, 108–9
  - criticism of 102–3
  - self-realisation, instrumental value of 115
- contraception 96
- contracts, right to discriminate in 82
- cystic fibrosis 16
  - testing 120
- Denmark
  - diagnostic genetic testing 32
  - genetic information, prohibited use of 31
  - total regulation 37
- deoxyribonucleic acid *see* DNA
- deregulation, globalisation and 65
- desert, principle of 123, 124, 135, 137
  - equal opportunities, relationship with 125–6
  - total regulation favouring 125
- deterrence
  - genetic testing, to 107–8
  - value limited total regulation and 107–8
- diabetes 19
- differentiated insurance premiums
  - genetic information 4, 25–6, 41–2, 49, 73–5, 132
  - genetic insights 73
  - individual risk assessment 63, 129
- disclosure, policy holder's duty of 27–8
  - see also* genetic information
- discrimination
  - economic effects 89–91
  - employment, in 92–3
  - freedom of contract 82
  - genetics 5, 29, 30, 41, 80–1
  - health 92
  - HIV testing, US legislation on 120
  - legislation, political foundation 94–5
  - private sphere 82, 84, 94–5
  - prohibition, characteristics of 81, 86, 88–9, 91–3, 94; EC law 83–5
  - 87–8; international law 83, 86–7
  - public sphere 82, 84
  - unacceptable grounds for 85–6
- distribution, basic principles of 134–7
- distribution of goods, desert principle as basis for 122–3
- DNA 13, 20
- dominant alleles 14
- Dworkin, Richard
  - justice as equality 121; criticism of 121–2
- e-commerce 65
  - VAT implications of 70
- EC Treaty
  - anti-discrimination provisions 83–4, 85
  - equal pay 84
- employment, discrimination protection 92–3
- environmental factors 12, 13
  - genes, effect on 17–18
  - homogenised 20
  - multifactorial diseases 16, 17
  - polygenetic diseases 16
- equal opportunity
  - genetic information and 116
  - insurance, access to 145
  - principle of desert and 125–6
- equality
  - complex, theory of 123
  - definition of 121
  - discrimination, elimination of 145
  - increased social insurance provision 152
  - principles of 123, 137
- ethical considerations, genetic information, access to 100
- European Union
  - anti-discrimination measures 85, 87–8
  - direct tax harmonisation 69–70
  - EC Treaty, discrimination prohibited by 83–5
  - indirect racial discrimination prohibition 84
- expressivity 14
- family information, insurance company use of 21, 29
- financial services, cross-border marketing 66
- foreign insurance products, marketing 72
- free exchange principle 135
- free market theory 122, 131–2
- freedom of contract 82, 83, 85
- functional genomics project 21
- GATT, liberalisation of services under 66–7
- gene mutation
  - BRCA1 16
  - disease caused by 14
- genetic carrier detection 14
- Genetic Catch-22 106

## 166 Index

- genetic circumstances, definition of 151
- genetic conditions, immigration
  - restrictions, analogy with 119
- genetic constitution, individual's right to
  - ignorance of 109
- genetic determinism 12, 17–18
- genetic discrimination 5, 29, 30, 41
  - future trends 96
- genetic disorders 14
  - preventive measures 107
- genetic essentialism 12, 17
  - counteracting belief in 121
- genetic information
  - access to; ethical considerations 100, 144; justice
  - considerations 121, 145; voluntariness principles and 123
  - autonomy of individual and 109, 115, 149
  - disclosure, sensitive individuals 146
  - equal opportunity of individuals 116
  - insurance premium differentiation 4, 25–6, 41–2, 49, 73–5, 132
  - insurers' access to 6, 44–5, 71–3, 99–100, 143
  - medical information, difference between 118–19
  - personal and intimate nature of 118, 119
  - privacy of 23, 149
  - regulation, problems caused by 127, 146, 148
  - restricted use 5, 23–4, 28, 31, 32–3, 71, 152
  - right to privacy for 118–19
  - third party access to 119
  - treatment of 41, 43, 45
  - US prohibition on use of 32–3, 120
  - withholding, actuarial fairness and 130–1
- genetic inheritance
  - abnormality 14
  - constitution 125
- genetic insights 2, 3
  - future use by insurers 77–8, 143
  - premium differentiation 73
  - prohibition on use of 78, 79
  - restricting access to 3, 72
  - risk analysis 4
- genetic integrity, right to 42
- genetic markers 25–6
- genetic privacy 117
  - protection of 121
  - total regulation 120–1
  - utilitarianism and 119
- genetic risk
  - high-risk individuals withholding 127–8
  - reduction in insurers' costs 79
- genetic science, risk assessment tool 143
- genetic testing 11
  - carrier detection 14
  - case studies 112–13, 114–15
  - confidentiality 43
  - deterrence 107–8
  - development of 1
  - diagnostic purposes 32
  - differentiated insurance premiums 75
  - health insurance 75
  - higher income groups 76
  - individual risk assessment 148
  - insurance companies, use by 11–12, 44–5
  - insurance cover denial and 45–6, 107–8
  - insurance risks revealed by 22
  - negative welfare consequences of 144
  - pensions and 75
  - predictive 14, 19, 28–9
  - premature death insurance and 75
  - presymptomatic 14, 28–9
  - private individuals by 23
  - problem of defining 120
  - prohibition on use by insurer 28–9, 30–1, 32–3, 152
  - risk analysis 11–12
  - risk group classification 76–7
  - self-determination and 43
  - self-realisation and 114
  - voluntary agreements 33–4
  - see also* Swedish Insurance Federation
- genetics
  - actuarial implications of 33
  - basic doctrine of 20
  - insurance premiums, effect on 49
- genome 11
- Germany
  - social insurance, development and reform in 52–3, 62–3
- globalisation
  - deregulation, consequence of 65
  - financial services marketing 66
  - foreign direct investment facilitated by 65
  - insurance industry 40
  - multinational companies and 65
  - trade barriers, reduction of 65
- health, discrimination on basis of 92
- health care
  - high-risk individuals excluded from 130
  - need based distribution of 136

## 168 Index

- justice (*cont.*)
  - inherited genetic constitution and 125, 127
  - libertarian theory of 131, 137
  - theories of 122, 123, 126, 137
- Kant, Immanuel
  - autonomous duty of individual 109, 111
- Kotlikoff, L. J. 61, 62
- libertarian theory of justice 131
  - free market system, advocating 131–2
- libertarianism 131–2, 137
  - unacceptable consequences of 132
- life insurance, higher risk insured 39, 114–15
- Locke's proviso 132, 133
- low-risk groups
  - estimated future insurance costs 77
  - offshore insurance provision 74, 76, 78–9
- low-risk individuals 7
  - subsidising high risk 130
- media, anti-discrimination legislation and 95
- Mill, John Stewart
  - autonomy, ideal of 112, 113–14, 116, 117, 132
- modern liberals, autonomy, view of 115
- multifactorial disease 16
  - diabetes 19
  - environmental factors 16
  - genetic testing and 19
  - insurance considerations 17
  - prediction 19
  - predictive gene testing for 20, 22
  - reducing risk of 25
- multifactorial inheritance 16
- natural advantages, benefits gained from 129, 130
- natural law
  - discrimination prohibitions derived from 93–4
  - equal value of persons under 94
  - human rights, basis of 93–4
  - Nazi war crimes 93
- new species, creation of 1
- non-contributory state pension 51
- Norway
  - diagnostic genetic testing 32
  - genetic testing, prohibited use of 30–1, 146
  - medical information, prohibition on use by insurance companies 118
  - total regulation 37
- Nozick, Robert
  - criticism of 131, 133
  - entitlement, theory of 131
  - free market, unforced trade on 122
  - justice, theory of 122
  - Locke's proviso, interpretation of 133
  - no support for less fortunate 133
  - property, just acquisition theory 132
  - regulation, absence of 137
  - self-ownership, principle of 133
- offshore insurance companies
  - genetic testing, use by 74
  - higher income groups using 76
  - low-risk groups 74, 76, 77
  - regulatory advantages obtained by 5
- offshore insurance, purchase of 101
- overcompensation, problem of 127
- partial regulation
  - adverse selection countered by 106, 147
  - balance of information in 39, 146
  - economic consequences of 148
  - insurance industry 3, 7, 36, 100
  - limiting uninsured population 106
  - negative consequences of 106–8
  - replacing total 78
- penetrance 14
  - single gene disorders 16–17
- pension funds
  - inflation, effect of 57
  - shareholdings 66
- pensions, genetic testing and 75
- personal information, right to privacy 117
- personal insurance
  - forms of 7
  - genetic information, restricted access to 71
  - growth of 63
  - premium differentiation 63
  - social meaning of 135–6
  - total regulation, ultimate effect of 147
- phenotype 13, 18
- polygenetic diseases 16
- predictive genetic testing 14, 20, 22;
  - high-risk individuals 103; prohibition on 30–1
- premature death insurance, genetic testing and 75
- presymptomatic genetic testing 14
  - individuals, differentiation 103
  - prohibition on use of 30–1
  - single gene disorders 16–17, 19, 20
- principle of need *see* priority principle

169

- priority principle
  - access to genetic information opposing 127
  - principle of need, relationship with 127, 135
  - total regulation favouring 127
- privacy
  - control of personal information 117
  - genetic information 118–19, 144–5, 149
  - protection of 117–18
  - right to 100–1, 117
  - self-determination and 117
  - total regulation and 118
- private insurance
  - adverse selection, threat posed by 105
  - basic welfare provision 142
  - efficient production and distribution 146
  - expanding demand for 148
  - genetic information, prohibition on
    - access to 127, 146
  - reduced dependence on 149–50
  - vital goods, status of 134
  - welfare provision of 104
- private sphere
  - discrimination in 82, 84, 94
  - equal value principle 94
- privatisation 65, 142
- property acquisition, Locke's proviso as to 132
- prophylactic treatment 11, 79
  - cancer 15–16
  - future development of 103–4
- proteomics project 21
- public sphere, discrimination in 82, 84
- Rawls, John 56
  - criticism of 126
  - difference principle 126
  - Theory of Justice, A* 116
- recessive alleles 14
- redistributive justice 127
- regulation
  - absence of 100
  - consistent foundation for 80
  - ethical basis for 101
  - European Union, by 38
  - future trends 37–8
  - genetic discrimination prevention 80–1, 95–6
  - genetic information; insurance company
    - access to 99–100; restricted use 5, 23–4, 28
  - genetic testing 28–9, 30
  - insurance industry 3, 5, 23–4
  - justification for 5
  - longer term consequences of 148
  - Millian view of 116
  - personal integrity protected by 42
  - welfare consequences 103
- risk analysis, genetic insights, use of 4, 44
- risk assessment
  - genetic defects 2
  - genetic testing 22, 76–7, 143, 148
  - private insurance systems, use by 2, 142–3
- RNA testing 21, 22
- Rutherford, Ernest 19
- Sandberg, P., autonomy, principle of 109
- self-determination *see* autonomy
- self-ownership principle 133
- self-realisation 113–14; consequentialism and 115; equal opportunity 116
- sickle-cell anaemia 14, 44
- single gene disorders 14, 16
  - future identification of 21
  - Huntington's disease 14, 112, 114
