Clinical Uses of Botulinum Toxins

Botulinum toxins now play a very significant role in the management of a wide variety of medical conditions; from headaches to hypersalivation, and from spasticity to sweating. In this book, a strong, international team of experts outline the basic neurochemistry of botulinum toxins and chart the progress of the drug from laboratory to clinic. Then individual chapters summarize their use for the main clinical indications in the context of other available treatments.

This book will be of interest to neuroscientists and practising clinicians working in a wide range of specialties, from neurology and dermatology to pediatrics, plastic surgery and rehabilitation medicine.

Anthony B. Ward is Director of the University Hospital of North Staffordshire Rehabilitation Centre in Stoke-on-Trent, and Senior Lecturer in Rehabilitation Medicine at the University of Keele. He is the President of the European Union of Medical Specialists (UEMS) Section of Physical and Rehabilitation Medicine.

Michael P. Barnes is Professor of Neurological Rehabilitation in the Academic Unit of Neurological Rehabilitation, University of Newcastle-upon-Tyne, and Consultant Neurologist and Consultant in Rehabilitation Medicine at Walkergate Park International Centre for Neurorehabilitation and Neuropsychiatry in Newcastle-upon-Tyne. He is President of the World Federation for Neurorehabilitation.
Clinical Uses of Botulinum Toxins

Edited by

Anthony B. Ward  BSc, MB ChB, FRCP(Ed), FRCP
Consultant in Rehabilitation Medicine

and

Michael P. Barnes  MD FRCP
Professor of Neurological Rehabilitation
## Contents

**List of Contributors**  
page vii

1  Introduction  
   Michael P. Barnes and Anthony B. Ward  
   page 1

2  Mechanistic basis for the therapeutic effectiveness of botulinum toxin A on over-active cholinergic nerves  
   J. Oliver Dolly and Gary Lawrence  
   page 9

3  Botulinum toxin: from menace to medicine  
   Peter Hambleton, Andrew M. Pickett and Clifford C. Shone  
   page 27

4  Botulinum toxin: primary and secondary resistance  
   Benjamin Anyanwu, Philip A. Hanna and Joseph Jankovic  
   page 45

5  Introduction to botulinum toxin in clinical practice  
   Anthony B. Ward  
   page 58

6  Cervical dystonia  
   Khalid Anwar  
   page 80

7  The use of botulinum toxin in otolaryngology  
   Maurice Hawthorne and Khalid Anwar  
   page 111

8  Spasticity  
   Anthony B. Ward  
   page 122

9  Hyperhidrosis  
   DeeAnna Glaser and Stephanie Benson  
   page 175

10 Hypersalivation  
    M. Fiorella Contarino and Alberto Albanese  
    page 201
