Preface  page vii
Douglas K. Lilly: a biography                                   1
    Katharine M. Kanak
    with recollections from K. Bryan, J. Deardorff,
    K. Droegemeier, J. Kimpel, P. Lamb, D. Lenschow, and
    J. Smagorinsky

Part I Atmospheric turbulence 15
1 Changing the face of small-scale meteorology                  17
    John C. Wyngaard
2 Phenomenological hunts in two-dimensional and stably         35
    stratified turbulence
    James C. McWilliams
3 Energy dissipation in large-eddy simulation: dependence      51
    on flow structure and effects of eigenvector alignments
    Chad Higgins, Marc Parlange, and Charles Meneveau
4 Dreams of a stratocumulus sleeper                            71
    David A. Randall and Wayne H. Schubert
5 Large-eddy simulations of cloud-topped mixed layers          95
    Chin-Hoh Moeng, Peter P. Sullivan, and Bjorn Stevens

Part II Mesoscale meteorology 115
6 Model numerics for convective-storm simulation               117
    Joseph B. Klemp and William C. Skamarock
7 Numerical prediction of thunderstorms: fourteen years later 139
    Juianzhen Sun
8 Tropical cyclone energetics and structure                   165
    Kerry Emanuel
9 Mountain meteorology and regional climates                  193
    Ronald B. Smith

© Cambridge University Press www.cambridge.org
Contents

10 Dynamic processes contributing to the mesoscale spectrum of atmospheric motions 223
   Kenneth S. Gage

Appendix A  Douglas K. Lilly: positions, awards, and students 265
   Compiled by Katharine M. Kanak

Appendix B  List of publications by Douglas K. Lilly 268
   Compiled by Katharine M. Kanak

Index 279

The color plates are situated between pages 118 and 119.
