Beyond Communities of Practice

The concept of “communities of practice” has become an influential one in education, management and social sciences in recent years. This book consists of a series of studies by linguists and educational researchers, examining and developing aspects of the concept which have remained relatively unexplored. Framings provided by theories of language-in-use, literacy practices and discourse extend the concept, bringing to light issues around conflict, power and the significance of the broader social context which have been overlooked. Chapters assess the relationship between communities of practice and other theories, including literacy studies, critical language studies, the ethnography of communication, sociocultural activity theory and sociological theories of risk. Domains of empirical research reported include schools, police stations, adult basic education, higher education and multilingual settings. The book highlights the need to incorporate thinking around language-in-use, power and conflict and social context into communities of practice.

David Barton is Professor of Language and Literacy in the Department of Linguistics at Lancaster University. He is Director of the Lancaster Literacy Research Centre. His main work has been concerned with carrying out detailed studies of literacy practices in different domains of life and with rethinking the nature of literacy in contemporary society.

Karin Tusting is a Research Associate at the Literacy Research Centre at Lancaster University. She has recently worked on the Adult Learners’ Lives project, an ethnographic study of the relationship between learning and other aspects of people’s lives, working with adult literacy, numeracy and ESOL learners.
LEARNING IN DOING: 
Social, Cognitive and Computational Perspectives

Series Editor Emeritus
John Seely Brown, Xerox Palo Alto Research Center

General Editors
Roy Pea, Professor of Education and the Learning Sciences and Director, Stanford Center for Innovations in Learning, Stanford University
Christian Heath, The Management Centre, King’s College, London
Lucy A. Suchman, Centre for Science Studies and Department of Sociology, Lancaster University

Plans and Situated Actions: The Problem of Human–Machine Communication
Lucy A. Suchman

The Construction Zone: Working for Cognitive Change in Schools
Denis Newman, Peg Griffin and Michael Cole

Situated Learning: Legitimate Peripheral Participation
Jean Lave and Etienne Wenger

Street Mathematics and School Mathematics
Terezinha Nunes, David William Carraher and Analucia Dias Schliemann

Understanding Practice: Perspectives on Activity and Context
Seth Chaiklin and Jean Lave

Distributed Cognitions: Psychological and Educational Considerations
Gavriel Salomon

The Computer as Medium
Peter Bogh Andersen, Berit Holmqvist and Jens F. Jensen

Sociocultural Studies of Mind
James V. Wertsch, Pablo Del Rio and Amelia Alvarez

Sociocultural Psychology: Theory and Practice of Doing and Knowing
Laura M. W. Martin, Katherine Nelson and Ethel Tobach

Mind and Social Practice: Selected Writings of Sylvia Scribner
Ethel Tobach, Rachel Joffee Falmagne, Mary Brown Parlee, Laura M. W. Martin and Aggie Scribner Kapelman

List of Contributors

David Barton is Professor of Language and Literacy in the Department of Linguistics at Lancaster University and Director of the Lancaster Literacy Research Centre.

Angela Creese is Lecturer in Education at the School of Education, University of Birmingham.

James Paul Gee is the Tashia Morgridge Professor of Reading at the University of Wisconsin at Madison.

Mary Hamilton is Professor of Adult Learning and Literacy in the Department of Educational Research at Lancaster University.

Steven Robert Harris is a Researcher at the University of Glamorgan Centre for Astronomy and Science Education, School of Applied Sciences, and the Hypermedia Research Unit, School of Computing.

Maria Clara Keating is Lecturer in the Department of Linguistics at Coimbra University, Portugal.

Mary R. Lea is Lecturer in Teaching and Learning in the Institute of Educational Technology, Open University.

Deirdre Martin is Lecturer in the School of Education, University of Birmingham.

Greg Myers is Senior Lecturer in the Department of Linguistics, Lancaster University.
Contributors

Frances Rock is Lecturer in English Language and Linguistics at the University of Surrey Roehampton.

Nicola Shelswell is Head of School for Adult Basic Education and English for Speakers of Other Languages at Coleg Morgannwg, South Wales.

Karin Tusting is a Research Associate at the Literacy Research Centre, Lancaster University.
Series Foreword

This series for Cambridge University Press is becoming widely known as an international forum for studies of situated learning and cognition.

Innovative contributions are being made by anthropology; by cognitive, developmental and cultural psychology; by computer science; by education and by social theory. These contributions are providing the basis for new ways of understanding the social, historical and contextual nature of learning, thinking and practice that emerges from human activity. The empirical settings of these research enquiries range from the classroom to the workplace, to the high-technology office and to learning in the streets and in other communities of practice. The situated nature of learning and remembering through activity is a central fact. It may appear obvious that human minds develop in social situations and extend their sphere of activity and communicative competencies. But cognitive theories of knowledge representation and learning alone have not provided sufficient insight into these relationships. This series was born of the conviction that new and exciting interdisciplinary syntheses are under way as scholars and practitioners from diverse fields seek to develop theory and empirical investigations adequate for characterising the complex relations of social and mental life, and for understanding successful learning wherever it occurs. The series invites contributions that advance our understanding of these seminal issues.
