# Table of Contents

*Preface to the Second Edition*  
*Preface to the First Edition*  

## 1 Introduction  

### 2 Stress and deprivation during growth and development and adulthood  

2.1 Introduction  
2.2 Measuring stress in human remains  
2.3 Growth and development: skeletal  
2.4 Growth and development: dental  
2.5 Skeletal and dental pathological markers of deprivation  
2.6 Adult stress  
2.7 Summary and conclusions  

## 3 Exposure to infectious pathogens  

3.1 Introduction  
3.2 Dental caries  
3.3 Periodontal disease (periodontitis) and tooth loss  
3.4 Nonspecific infection and disruption  
3.5 Specific infectious diseases: treponematosis, tuberculosis, and leprosy  
3.6 Specific infectious diseases: vectored infections  
3.7 Summary and conclusions  

## 4 Injury and violence  

4.1 Introduction  
4.2 Skeletal injury and lifestyle  
4.3 Intentional injury and interpersonal violence  
4.4 Medical care and surgical intervention  
4.5 Interpreting skeletal trauma  
4.6 Summary and conclusions  

## 5 Activity patterns: 1. Articular degenerative conditions and musculoskeletal modifications  

5.1 Introduction  
5.2 Articular joints and their function  
5.3 Articular joint pathology: osteoarthritis  
5.4 Nonpathological articular modifications  
5.5 Nonarticular pathological conditions relating to activity  
5.6 Summary and conclusions  

## 6 Activity patterns: 2. Structural adaptation  

6.1 Bone form, function, and behavioral inference  
6.2 Cross-sectional geometry
6.3 Histomorphometric biomechanical adaptation
6.4 Behavioral inference from external measurements
6.5 Summary and conclusions

7 Masticatory and nonmasticatory functions: craniofacial adaptation to mechanical loading
7.1 Introduction
7.2 Cranial form and functional adaptation
7.3 Dental and alveolar changes
7.4 Dental wear and function
7.5 Summary and conclusions

8 Isotopic and elemental signatures of diet, nutrition, and life history
8.1 Introduction
8.2 Isotopic analysis
8.3 Elemental analysis
8.4 Methodological issues in bioarchaeological chemistry
8.5 Summary and conclusions

9 Biological distance and historical dimensions of skeletal variation
9.1 Introduction
9.2 Classes of biodistance data
9.3 Biohistorical issues: temporal perspectives
9.4 Biohistorical issues: spatial perspectives
9.5 Summary and conclusions

10 Bioarchaeological paleodemography: interpreting age-at-death structures
10.1 Introduction
10.2 Reconstructing and interpreting age-at-death profiles: it has been mostly about mortality
10.3 Paleodemographers adopt the life table for age structure analysis
10.4 Addressing the assumptions of paleodemography
10.5 New solutions to interpreting age-at-death profiles in archaeological skeletal series: it is really mostly about fertility not mortality
10.6 The elephant in the room: age estimates in archaeological skeletons
10.7 Summary and conclusions

11 Bioarchaeology: skeletons in context
11.1 Framing the contextual record
11.2 Framing the problems and questions: it is all about the hypothesis
11.3 Ethics in bioarchaeology
11.4 Bioarchaeology looking forward
