Introduction: The geometry of sound	I
1 Hearing numbers, seeing sounds: the role of instruments and diagrams in Greek harmonic science	22
1 Hearing numbers: arithmetic, geometry and canonic division	23
2 Seeing sounds: instruments, diagrams and tables	50
2 Mathematical harmonics before the monochord	81
1 The demonstration of the concord ratios	93
2 The first appearance of the monochord	97
3 Philolaus	104
4 Archytas	117
3 The monochord in context	131
1 Demonstration, harmonics and the <i>Sectio canonis</i>	136
2 Finding a harmonic syntax: the ‘ditonic’ division	156
3 Acoustics and the <i>Sectio canonis</i>	164
4 The <i>kanōn</i> and the <i>Sectio canonis</i>	171
4 Eratosthenes	178
5 Canonic theory	210
1 The language of canonic	214
2 The practice of canonic	226
