Introduction	1
0.1 The chaos game	1
0.2 Attractors of iterated function systems	2
0.3 Another chaos game	5
1 Codes, metrics and topologies	8
1.1 Introduction	8
1.2 Points and spaces	10
1.3 Functions, mappings and transformations	13
1.4 Addresses and code spaces	16
1.5 Metric spaces	23
1.6 Metrics on code space	28
1.7 Cauchy sequences, limits and continuity	33
1.8 Topological spaces	37
1.9 Important basic topologies	41
1.10 Some key topological invariants	49
1.11 Compact sets and spaces	54
1.12 The Hausdorff metric	57
1.13 The metric spaces $(\mathbb{H}(\mathbb{X}), d_{\mathbb{H}})$, $(\mathbb{H}(\mathbb{H}(\mathbb{X})), d_{\mathbb{H}(\mathbb{H})})$, ...	78
1.14 Fractal dimensions	87
2 Transformations of points, sets, pictures and measures	89
2.1 Introduction	89
2.2 Transformations of pictures	92
2.3 Transformations of measures	101
2.4 Fixed points and fractals	115
2.5 Linear and affine transformations in two and three dimensions	129
2.6 Möbius transformations	140
2.7 Projective transformations	149
2.8 Transformations on code spaces	183
3 Semigroups on sets, measures and pictures	190
3.1 Introduction	190
3.2 Semigroups	197
3.3 Semigroups of transformations	206
3.4 Orbits of sets under IFS semigroups	214
3.5 Orbits of pictures under IFS semigroups	223

<i>viii</i>	<i>Contents</i>	
3.6	Orbits of measures under IFS semigroups	279
3.7	Groups of transformations	288
4	Hyperbolic IFSs, attractors and fractal tops	313
4.1	Introduction	313
4.2	Hyperbolic IFSs	314
4.3	The set attractor and the measure attractor	316
4.4	IFS codes	319
4.5	The chaos game	323
4.6	IFS colouring of set attractors	325
4.7	The collage theorem	327
4.8	Deterministic calculation of attractors	330
4.9	Fractal tops	336
4.10	Pictures of tops: colour-stealing	341
4.11	The tops dynamical system	346
4.12	The fractal top is the fixed point of \mathcal{F}_{TOP}	352
4.13	Relationship between fractal tops and some orbital pictures	354
4.14	The fractal homeomorphism theorem	357
4.15	Fractal transformations	365
4.16	Directed IFSs and general deterministic fractals	370
4.17	The top of a directed IFS	380
4.18	A very special case: $S : \Omega \rightarrow \Omega$ is open	382
4.19	Invariant measures for tops dynamical systems	383
5	Superfractals	385
5.1	Introduction	385
5.2	Computational experiment: glimpse of a superfractal	386
5.3	SuperIFSs and superfractals	391
5.4	1-variable IFSs	392
5.5	The set attractor $A^{(1)}$ of the 1-variable IFS $\mathcal{F}^{(1)}$	393
5.6	Chaos game reveals 1-variable fractal sets	394
5.7	Hausdorff dimension of some 1-variable fractal sets	396
5.8	The underlying IFS of a superIFS	398
5.9	Tops of 1-variable fractal sets	399
5.10	Homeomorphisms between 1-variable fractal sets and between their tops	403
5.11	Other sets of 1-variable fractal objects	407
5.12	V -variable IFSs	415
5.13	V -variable pictures with stolen colours, and V -variable orbital pictures	421
5.14	V -variable fractal interpolation	426
5.15	V -variable space-filling curves	430
5.16	Fractal transformations between the elements of V -variable superfractals of ‘maybe-not-tops’	431
5.17	The superfractal of V -variable fractal measures	433
5.18	Code trees and (general) V -variability	434
5.19	V -variability and what happens as $V \rightarrow \infty$	440
5.20	Final section	442
