- answers (*cont.*)  
 and survey questions, 62  
 testing assumptions of, 76
- antegrade amnesia, 98–99
- anxiety, 200
- APA (American Psychological Association)  
 member familiarity with Ethics Code, 271  
 recommendations on hypotheses testing, 146  
 work-related standards enforcement, 273
- APA Ethical Principles and Code of  
 Conduct, 271, 272, 273–274, 275  
 in ethical decision-making, 277, 279
- APA Publication Manual, 162, 184, 188
- APA Standards  
 1.08 Unfair Discrimination Against  
 Complainants and Respondents, as  
 justice, 274  
 2.01 Standards of Competence;  
 reasonable efforts and, 277  
 training requirement, 276  
 3.04 Avoiding Harm;  
 and disclosure standards, 282  
 ethical dilemma example, 282  
 research design example, 285  
 3.05 Multiple Relationships, as  
 beneficence and nonmaleficence,  
 273  
 4.01 Confidentiality, ethical dilemma  
 example, 282  
 4.05 Disclosures, conflict example, 282  
 4.01 Maintaining Confidentiality, conflict  
 example, 282  
 7.03 Accuracy in Teaching, as fidelity and  
 responsibility, 274  
 8.07 Deception in Research, justification  
 example, 285–286  
 8.08 a Debriefing, and deception, 286  
 8.08 b and c, debriefing and post-  
 experiment harm, 286  
 8.10 Reporting Research Results, as  
 integrity, 274  
 8.11 Plagiarism, as integrity, 274  
 9.02 Use of Assessments, as respect for  
 rights and dignity, 274  
 10.10 Terminating Therapy, client benefit  
 requirement example, 277
- aphasics, 95–96
- applied research, 5
- arguments. *See also* fallacy(ies); informal  
 logic; informal logical fallacy(ies)  
 analysis and critical thinking, 181  
 based on sources, 116  
 content and experiment meaning, 162  
 persuasiveness in, 161–162  
 self-persuasion and self-generated, 240  
 structure and persuasiveness, 162
- arithmetic, 6, 80
- articles, 87, 163. *See also* manuscripts; papers;  
 reports; research reports
- aspirational principles  
 APA Ethics Code as moral backbone of  
 profession, 273  
 description, 273–274  
 as beneficence and nonmaleficence,  
 273  
 as fidelity and responsibility, 273–274  
 as integrity, 274  
 as justice, 274  
 as respect for people's rights and  
 dignity, 274
- assessment methods  
 in clinical psychology, 203–204  
 projective methods of clinical, 204  
 self-report questionnaires as, 126  
 semi-structured interviews as, 204  
 structured interviews, 204  
 validity, 205
- assessments. *See also* alternative clinical  
 assessments; clinical assessments;  
 Likert scale rating; Minnesota  
 Multiphase Personality Inventory  
 (MMPI); Rorschach Inkblot Test;  
 self-assessments  
 enforceable ethics standard, 274  
 of evidence, 197  
 types of alternative clinical, 204  
 validity of evidence in, 197
- assimilation bias, 113, 114
- assimilation effect, 67
- associated connections, 124
- association  
 covariance weakening of, 140  
 dataset overfitting and, 140  
 as potential alternative explanations, 137  
 subject cohort significance and, 138  
 and third-variable problem, 137
- associative system, 124
- assumptions  
 anomalous beliefs and cultural, 256  
 of causality and explanation, 121  
 of clients and randomized control studies,  
 209  
 of clinical categories, 95
