

INDEX

- ablation 175
- abrasion (glacial) 181
- acid-rock or acid-mine drainage 4, 33, 164
- active fault 337
- active layer (of permafrost) 190
- activity (ionic) 155
- adsorption edges 162
- advection (of groundwater) 280
- advection–diffusion process 282
- aggrading (stream) 139
- aggregate 30, 51, 101–106
- air-entry value 370
- alkalinity 157–158
- alluvial deposits 204–210
- alluvial fans 210–212
- amphibole 32
- Anderson's theory of faulting 60
- andesite 41
- angle of internal friction 12, 373
- angular unconformity 66
- anhydrite 33
- annual exceedance probability 142
- aquifer 245, 257–259, 266–271
 - alluvial 269
 - basin-fill 303
 - bedrock 269–271
 - vulnerability 297
 - water table vs. confined 256
- aquitard (integrity, drainage) 245, 271–272, 304–308
- architectural elements 204
- arenite 44
- argillaceous rocks 44
- arkose 44
- arsenopyrite 33
- asthenosphere 22
- augers 233
- avulsion 140

- b*-value curve 335
- back-diffusion 282
- bars (gravel) 204
- basal slip 178
- basalt 42
- baseflow 126, 265
- basement 28
- base-metal ore deposits 164
- batholiths 38
- Becker drill 222

- bed 53
- bedding-plane fractures 86, 270
- bedforms 204
- bed load and material 139, 197
- bed shear stress 137
- biochemical sediments 38
- biodegradation reaction 292–293
- bioturbation 214, 250
- Bishop's modified method 367–368
- borehole breakouts 78
- borehole geophysics 99, 231
- bottom-set beds 212
- breccia 42, 60, 62
- bridge scour 200
- brittle deformation 84
- Byerlee's law 337

- cable-tool drilling 222
- calcite 33
- calcrete (or caliche) 131, 317
- cap rock 47
- capillary barrier 284
- capillary fringe 261
- carbonate minerals 33, 151
- cataclastic flow 84, 336
- celerity 385–386
- cementation 216
- chalk 48
- channel (alluvial) 207
- chemical grains and sediments 38, 231
- chert 47
- chimneys 313
- circular failure of rock slopes 95
- clastic dike 349
- clasts and clastic sediments 38, 231
- clay minerals 32, 167–173
- clay weathering 134
- cleavage 31, 36
- climate change 301
- clinometer 57
- coal and coalification 48
- coastal cliffs and bluffs 193, 399–405
- cohesion 12, 15, 373
- compaction (mechanical) 215, 304
- compass 57
- competence 138, 199
- compressibility 251–252
- compressive strength 88
- connate water 277

- cone penetrometer testing (CPT) 227–228, 295, 366
- conglomerate 42
- congruent dissolution 151
- consolidation 30, 240–241
- contact 56 (between strata), 127 (lithic)
- contact metamorphism 39, 48
- core (of the Earth) 21
- core diskings 78
- core logs 101–103 (rock), 226–227 (soil)
- corestones 127
- corrosion mixing 317
- coseismic displacement 329, 359, 398
- creeps 356
- crest (of an anticline) 56
- critically stressed faults 337
- cross-bedding 44
- crown holes 313
- crust (of the Earth) 21
- cubic law 91, 108
- cut bank 206
- cutting and filling 207
- cyclic stress ratio (CSR) 350
- cyclothem 48

- debris or debris-avalanche flow (landslide) 133, 356, 358
- deformation modulus 83
- degrading (stream) 139
- deltaic deposits 212–214
- DEM (digital elevation models) 144
- detrital sediments 38, 231
- diabase 41
- diagenesis 42, 214–216
- diamicton 184
- diffusion 280
- diffusional profiling 277
- dikes 38
- diorite 41
- dip (true and apparent) 55
- disconformity 67
- discontinuities 6, 7, 86, 108
- disequilibrium compaction 81
- dispersal trains 183
- dispersion 280
- dissolution (during diagenesis) 216
- diurnal tide 388
- DNAPLs (dense non-aqueous-phase liquids) 283

- DO (dissolved oxygen) 159
 dolerite 41
 dolomite 33, 44
 downstream accretion 207
 drawdown cone 257
 drift (glacial) 184
 drill cuttings 222
 drilling mud 100
 dual porosity 249
 ductile deformation 86
- earthflow (landslide slope material) 133, 356
 effective pressure 179
 effective solubility 290
 effective stress 15, 305, 348
 elastic dislocation model 330
 elastic rebound model 329
 electroneutrality 151
 eluviation 154
 EM (electromagnetic surveys) 242, 295, 324
 entry pressure (for NAPLs) 284
 environmental isotopes 277–280
 eolian deflation 131
 eolian deposits 184
 epicentre 331
 epikarst 320
 equilibrium reactions 150
 equivalent rock mass 120
 erodibility 200
 ERT (electrical resistance tomography or imaging) 99, 229, 242, 295, 324
 evaporite 33, 47
 extensometers 309, 311
 extrusive rock 38
- facies 204
 factor of safety 368
 failure envelope 12
 fault block 60
 fault zone 60
 faults 6, 54, 60, 86
 feldspars 32, 151–152
 felsic rocks 38
 ferric oxides 33, 152
 fissility 44
 fissures 64, 87, 296, 308–309
 flint 47
 fluid potential 251
 flysch 45
 focus or hypocentre 331
 folds 6, 54
 foliation 48
 foraminifera (forams) 176
 foreset-beds 212
 formation 54
 fossilized stresses 76
 fracking (see hydraulic fracturing)
 fractionation 177
 fracture (of mineral grains) 36
 fracture pressure 115
 fractures 6, 64, 102 (roughness), 369–372 (re rock mass strength)
 free phase (NAPL) 283
 free swell testing 113
 frost cracking 130
 frost heave 191
 frozen debris lobes 194
 fugitive gas 290
- gabbro 41
 gangue minerals 166
 gas hydrate 406
 geological map 55, 67
 geological strength index (GSI) 110–112
 geomechanics classification system (rock-mass rating RMR) 109
 geomodel 220
 geomorphic hazards 175
 geophysical processes 9
 georadar *see* GPR 99, 242
 geotechnical scour number ($m/(W/m)$) 202
 glacial isostatic adjustment (GIA) 26–27, 399
 glaciofluvial deposits 184, 187–190
 glaciolacustrine deposits 184
 glaciomarine deposits 184, 186–187
 glaciotectonic deformation 178–180
 global meteoric water line 177
 gneiss 49
 GNSS (global navigation satellite system) *see* GPS 117, 310
 GPR (ground-penetrating radar) 99, 229, 295, 324
 GPS (global positioning system) 117
 graded (texture) 43
 granite 40
 granodiorite 40
 granular flow 84, 336
 gravel bar 207
 gravity (geophysical) method 99
 greywacke 44
 ground model 220
 ground motion 341–344
 groundwater contamination 280–294
 groundwater discharge 126
 groundwater flow models 278
 groundwater flow system 126, 258–266
 groundwater recharge 126
 groundwater velocity 249
 groundwater vulnerability 278
 group (of formations) 54
 GSI (geological strength index) 110–112, 373
 GWQ (groundwater quality) 295
 gypsum 33, 151
- halite 33, 151
 hardness 36, 106
 hard rocks 29
 hiatus 65
 hornfels 34–35
 hue (soil colour) 154
 humus 154
 hydraulic conductivity 15, 238 (lab), 248–249; saturated vs. unsaturated 250, 261
 hydraulic diffusivity 255
 hydraulic fracturing 75, 77
 hydraulic geometry 138
 hydraulic gradient 17
 hydraulic head 16, 17
 errors in measurement 252
 in variable TDS waters 263
 hydraulic testing 113–115 (rocks), 256–258
 hydrochemical facies 275
 hydrofacies 210
 hydrophilic compounds 292
 hydrophobic compounds 292
 hydrostratigraphy 265
 hydrothermal brine 50
 hydrothermal ore deposits 164
 hyperconcentrated flow 358
 hypogenic karst 320
 hysteresis (soil-water) 261
- ion-activity product 156
 iceberg scouring 403–405
 igneous rocks 5
 ignimbrites 41
 immiscible contaminants 280
 inclinometers 363, 365
 index tests 106
 INSAR (interferometric synthetic aperture radar) 310
 intact rock 6
 interfacial tension 284
 interglacial event 176
 interseismic elastic strain 329
 interstadial event 176
 intraplate earthquakes 328, 351
 intrusive rock 38
 ion activity product 156
 ionic strength 155
 ironstone 47
 irreversible reactions 150
 isomorphous substitution 173
 isostasy 26
- jökulhlaups 183
 joint 64, 87, 136 (relict)
- kaolinite 152, 168, 173 (photo)
 kaolinization 40
 karst 316–325
 known unknowns 98
- lahars 24, 361–362
 laminated sand 207
 landfill leachate 293
 large igneous provinces 38
 Last Glacial Maximum (LGM) 175
 lateral accretion 207
 lateral spread 349, 356
 laterite 40

- lateritic weathering profiles 165
 law of faunal succession 29
 law of mass action 154
 law of original continuity 29
 law of original horizontality 29
 law of superposition 29
 LiDAR (light detection and ranging) 116,
 144–146
 limestone 47, 48
 liquefaction 348–352, 358, 406
 liquefaction susceptibility 350
 lithic grains 45
 lithic rocks 60
 lithification 39
 lithified 29
 lithofacies 208, 210
 lithosphere 21
 LNAPLs (light non-aqueous-phase liquids) 283
 load–deformation curve 82–83
 longwall mining 313–316
- macropores 128, 250
 mafic rocks 38, 60
 magma 38
 magnetic (geophysical) method 99, 295
 mantle 21
 marl 44
 massive ground ice 191
 MASW (multi-channel analysis of surface
 waves) 231, 324
 matric suction 358, 366
 member 54
 metamorphic rocks 5
 meteoric water 177
 micas 32
 micro-granite 40
 microgravity 324
 microstructure 83
 mid-ocean ridges 24
 migmatite 49
 mineral 30
 mineralogy 4
 mine water 314
 miscible contaminants 280
 mixed tide 388
 modified Mercalli intensity scale 331, 333
 Mohr–Coulomb criterion 10, 13
 Moh's scale of hardness 102
 moment magnitude 334
 MSL (mean sea level) 388
 mylonite 50, 62
 mudstones 44
- NAPLs (non-aqueous phase liquids) 283
 natural attenuation 290
 neotectonics 398
 Newmark displacement 359
 nonconformity 67
 normal fault 60, 76, 328
- obsidian 41
 offset beds 60
- olivine 32
 oolitic limestone 48
 ore deposits 50
 orthoquartzite 44
 outcrop 6, 54
 overbank fines 207
 overcoring 77
 overland flow 126
 overpressured systems 81
 oxidation reaction 158
 oxyanions 162
- P (primary) waves 331–332
 paleokarst 320
 paleoseismology 337–340
 paleostage indicator 142
 paleotempestology 397
 Patton's principle 373
 peak horizontal acceleration 341
 peatlands 312
 pegmatite 40, 102
 percussion drilling 100
 peridotite 42
 periglacial 190, 191–193
 permafrost 190–194
 permeability 15, 107–108, 249
 secondary 250
 petrography 4
 petrology 4
 petrophysical testing 108
 phenocrysts 40
 phyllite 49
 pillar collapses 313
 pitchstone 41
 plane failure of rock slopes 94, 403
 plate tectonics 23
 ploughing (glacial) 180
 plucking (hydraulic) 202
 plunge (of a fold) 56
 plutonism 50
 point bars 206
 Poisson effect 82
 Poisson's ratio 14, 79
 point-load strength testing 85, 106–107
 pop-ups 78
 pore ice 191
 pore pressure 14–15, 305, 350, 366
 porosity (total) 15, 248
 effective 108, 249
 preconsolidation stress 306
 predisposing factors (landslides) 356
 principal stress 11
 probable maximum flood 143
 provenance (origin) 231, 277
 pyrite 33, 152, 166–167, 170 (oxidation)
 pyroxene 32
- Q (or NGI) system 109
 quarrying (glacial or hydraulic)
 181, 202
- quartz 32
 Quaternary period 29, 175
 quick clays 187
- radioisotopes 278–280
 radiometric methods 21
 rainout 177
 Raoult's law 290
 recurrence interval (of an earthquake)
 red beds 33, 270
 redox boundary 277
 redox reaction 153, 158–161
 reduction reaction 161
 regional metamorphism 39, 48
 regolith 127, 172
 relative permeability 285
 relict structural features 133
 reopening pressure 116
 reserves and resources 165
 residual saturation 283, 370
 REV (representative elementary volume) 8
 reverse fault 60, 77
 reworking (by bioturbation) 214
 rhyolite 40, 41
 rippability 44, 99
 rock fall 93, 356, 373–374
 rock-forming minerals 38
 rockhead (top of rock) 40, 49, 127, 222
 rock mass 6, 75, 83
 rock-mass rating (RMR) 109
 rock material 75
 rock quality designation (RQD) index 101
 rotary drilling 100, 223
 rotational slide 356
 runout distance 358, 406
- S (shear) waves 331–332
 Saffir–Simpson hurricane wind scale
 381, 392
 sand bed form 207
 sand boils 349
 sandstone 43
 saprock 127
 saprolite 127, 172
 saturation index 156
 scale (of a map) 67
 scale effect (of dispersion) 281–282
 scan line 108
 scarp, main 133, 354
 schist and schistosity 49
 scour, critical 200
 seafloor spreading 24
 sea-level rise (SLR) 389
 seawater intrusion 294
 sediment replenishment
 sediment gravity flow 207
 sedimentary rocks 5
 sedimentation in reservoirs 202–203
 segregation ice 191
 seismic faulting 327

- seismic hazard analysis 343–345
 seismic moment 333–334
 seismic refraction and reflection 99, 230, 242, 295, 324–325
 seismogenic zone 336
 seismology 23
 semi-diurnal tide 388
 sensitivity (of clays) 187
 serpentinite 42
 settling velocity 198
 shale 44, 134 (weathering)
 shear fractures 87
 shear strength 15, 89, 107, 239, 366, (of discontinuities) 372–373
 shear testing 86, 239 (lab)
 shear zone 60
 Shields parameter 198
 siderite 33
 silicate minerals 31, 152
 sills 38
 siltstone 44
 sinkholes 319–323
 site characterization model 220–222
 slackwater flood deposits 142
 slake durability testing 106
 slaking 44
 slate 49
 slickensides 60, 102
 slip (of a fault) 60
 slip or failure surface of a landslide 133, 354
 slip rate (of a fault) 340
 slug tests 256
 smear zone 287
 smectite 168
 softcopy photogrammetry 146
 soft rocks 29
 soil 127
 soil behavior type index (for CPT) 228
 soil-water characteristic curve (SWCC) 264, 369–370
 solifluction 131
 solubility (mineral) 155–156
 soluble rock 316
 solutes 154
 sonic drilling 223
 sorption, sorbent, sorbate 161–164
 sorting 15, 43, 210, 232
 specific discharge 16
 specific retention 254
 specific storage 252–253, 305–306
 specific yield 254
 spherical projection 72
 standard penetration test 222
 stereogram 72–73
 stereographic projection 72
 stick-slip process 330, 336
 stiffness 13, 82
 stochastic method (prediction of ground motion) 343–345
 stockwork 136
 storativity 254–258
 storm surge 392–397
 strain 83
 strata (*sing.* stratum) 28, 53
 strata-bound ore deposits 165
 stream power 138
 strength 11
 strike 55
 strike-slip fault 60, 77, 327
 structural geology 5, 23
 subduction 24
 subglacial deposits 178, 184
 subsidence 305 (land), 398–399 (coastal)
 subsidence troughs (or bowls) 310, 314
 subsurface storm flow 126
 supergene ore deposits 165
 supraglacial deposits 184
 surface of rupture 133
 surface waves (seismic) 331, 332
 suspended load and suspended bed-material load 197
 swash 394
 syenite 40
 taliks 191
 tectonic forces 6
 tectonics 23
 tensile failure 84
 tensile strength 88, 107, 116
 terrain analysis 143–147
 terrestrial laser scanning 116
 terrigenous sediments 231
 thaw flows 193
 thermokarst 190, 193
 thrust fault 328, 337
 tidal range and period 388
 till 184–186
 toe (of landslide) 133, 354
 toppling failure of rock slopes 95, 356, 401–403
 top-set beds 212
 TDS (total dissolved solids) 155
 transform fault 24
 translational slide 356
 transmissivity 115, 253–258
 travertine 44
 triaxial compression test 86
 triggering mechanisms (landslides) 356–362
 trough (of a syncline) 56
 tsunami 397–398
 tuff 40
 tunnel support 110
 turbidites 45
 turbidity current 406–407
 Udden–Wentworth scale 232–233
 ultrasonic pulse velocities 106–107
 unconfined compression test 86, 88
 unconformity 65–66
 underpressured systems 81
 uniaxial compressive strength 88
 Unified Engineering Geology Mapping System (UEGMS) 67
 uniformitarian principle 67
 unknown unknowns 98
 Unified Soil Classification System (USCS) 226–227
 vadose zone 261
 varves 184
 velocity (groundwater) 249
 vermiculite 168
 vesicle 102
 volcanic rocks and hazards 24, 136
 vugs 36
 wall (of a fault) 60
 wash material or load 139, 197
 water–rock interaction 277
 wave energy and wave power 387
 wave runup and setup 394
 weak layer (as cause of submarine landslide) 406
 weak rocks 45, 106–107, 112–113, 401
 weathering 6, 21, 127–136, 150–154, (chemical), 186
 wedge failure of rock slopes 89, 95, 356, 403
 well completion 80 (oilfield)
 wellhead protection areas 297
 wells (water) 255–256
 wettability 283
 Wisconsin glacial stage 175
 whole rock analysis 37
 yield strength (of debris flow) 358–360
 yielding (stress-induced) 89
 Young's modulus 13, 79
 zeolites 46
