Arratibel, O., 247

Arrow-Debreu economy, monetary policy and, xiv

Askoy, T., 268–269, 271–277

asset acquisition, monetary policy and, 85–86

asset returns monetary neutrality and, 293

volatility (banks), inflation and, 289–292

Atkeson, A., 53

attitude and opinion data, bank credit availability and inflation, 278–279

autoregressive moving average (ARMA) method, inflation and interest rate tests, 270–277

Azariadis, Costas, xii, xiv–xix, 61–78, 81–83, 262–263

Azerbaijan, disinflation and transition economics in, 219–221

B

Backus, David K., 52–53

Bailey, M., 2, 18, 119

balance-sheet effects, deflation and, 128n.1

Balassa-Samuelson effect

Estonian transition economics, 241

transition economics and, 221, 230, 245–251

Balcerowicz Plan, 235–237

Baltic States, disinflation in, 217–221

Bank of Japan, xiv

bank reserve subsidy, hazards of, 293

banks and banking markets

absence in macroeconomic models of, 260

asset return volatility, interest rates and, 289–292

concentration of banking and crisis probability, 280n.12

credit availability and inflation, attitude and opinion data on, 278–280

crises and economic volatility and, 263–264, 280–282

development indicators, inflation and, 277–278

inflation and performance of, 259–260, 277–312

inflation tax on legal reserves, 283–287

profits and margins, interest rates and, 282–289

reserves, Fed interest payments on, 86–87

bargaining inflation costs and, xvii–xviii

search equilibrium and, 107–111

trading friction model, 90–91, 97–99

Barnes, M. 262, 267n.4, 269–270, 289–292
