Preface		page ix
Acknowledgements		x
Chapter 1	Morphology and electroresponsive properties of thalamic neurons	1
1.1	Nuclear systematization, morphology and immunoreactivity of thalamic cells	1
1.2	Intrathalamic and thalamocortical neuronal networks	9
1.3	Intrinsic neuronal properties and their modulation by synaptic activity	17
Chapter 2	Morphology and electroresponsive properties of neocortical cells	27
2.1	Varieties, immunoreactivity and connectivity of neocortical neuronal classes	27
2.2	Intracortical, corticothalamic and other long-axon projections	35
2.3	Intrinsic properties of cortical cells and their changes by synaptic activity	40
Chapter 3	The amygdala	54
3.1	Is the amygdala a valid anatomical concept?	54
3.2	Cell types and physiological properties	58
3.3	Intrinsic and extrinsic connections	69
Chapter 4	Rhinal and medial prefrontal cortices	75
4.1	Cytoarchitectural organization and cell types	75
4.2	Connections	82
4.3	Interactions between the rhinal and medial prefrontal cortices and amygdala	86
Chapter 5	Neuromodulation and state-dependent activities in forebrain neuronal circuits	99
5.1	Multiple modulatory systems in the brainstem core, hypothalamus and basal forebrain: connectivity and properties	100
5.2	The effects of different neuromodulatory systems on thalamic and cortical cells: state-dependent changes in thalamocortical systems	113
5.3	Neuromodulation of amygdala, perirhinal and medial prefrontal neurons	123

Chapter 6	Gating of signals in slow-wave sleep	127
6.1	Brain oscillations during slow-wave sleep and anaesthesia in animals and humans	127
6.2	Neuronal firing and responses during the disconnected state of slow-wave sleep	152
6.3	Synaptic plasticity leading to memory-like events	161
6.4	Memory consolidation and dreaming mentation during slow-wave sleep	178
Chapter 7	Neuronal processes and cognitive functions in brain-active states of waking and REM sleep	181
7.1	Similarities and basic differences between waking and REM sleep	181
7.2	Theta and fast rhythms during brain-active states	201
7.3	Phasic events in waking and REM sleep	210
Chapter 8	Comparison of state-dependent activity patterns in the thalamocortical, hippocampal and amygdalocortical systems	218
8.1	The significance of neuronal oscillations in the amygdala and related cortices	218
8.2	Overview of major thalamocortical and hippocampal electroencephalographic events	219
8.3	State-dependent patterns of activity observed in the amygdala	221
Chapter 9	Neuronal substrates of some mental disorders	228
9.1	Alterations in brainstem-thalamic and thalamocortical neuronal circuits, with emphasis on hallucinations and schizophrenia	228
9.2	Amygdalo-prefrontal interactions in anxiety disorders	231
