- Rademacher theorem, 41
- Randol collar theorem, 244, 245, 276
- Rayleigh
 - conjecture, 303
 - theorem, 173
- real projective space of constant curvature, 196
- Riccati equation, 131
 - geometric interpretation, 166
- Ricci transformation
 - normal, 169
- Riemannian
 - covering, 189
 - harmonic, manifold, 158
 - immersion, 16
 - manifold, 16
 - ϵ -separated subset of, 212
 - geodesically complete, 26
 - Levi-Civita connection on, 16
 - nonpositive curvature, 223
 - metric, 16
 - pull-back, 16
 - Newton's equation in, geometry, 313
 - product metric, 44
 - submanifold, 60
 - connections in normal bundles of, 101
 - first fundamental form, 62
 - mean curvature function, 100
 - mean curvature vector, 98
 - minimal, 98
 - principal curvatures, 62
 - principal directions, 62
 - second fundamental form, 61, 97
 - totally geodesic, 96, 97
 - umbilic point, 98
 - submersion, 44
- ruled surface, 104
- Santaló formula, 339
- Sasaki metric, 345
- Schur theorem, 95
- second-order ordinary differential equation on a manifold, 10
- smooth region, 247
- Sobolev constant, 363, 383
- sphere theorems, 419
 - diameter, 420
- spheres, 66
- spherical and hyperbolic geometry, 103
 - law of cosines, 103
 - law of sines, 103
- Stokes theorem, 148, 149
- surface, 229
 - Riemann, 244
- symmetric space
 - locally, 154
 - Riemannian, 154
- symmetrization, 300
 - spherical, 288
 - Steiner
 - elementary version, 301
- symplectic form, 309
 - canonical, 309
- Synge lemma, 226
- systole, 230
- systolic inequalities, 230, 274
- systolic length, 230
- tori, 196, 221
- torsion tensor, 13
- transformation groups, 221
- transverse vector field, 141
- Umlaufsatz, 238
 - applications, 239
- variation of a path, 73
- variation of arc length
 - first, 74
 - second, 76
- variation of area
 - first, 161
 - second, 169
- vector field along a map, 7
 - derivative of, 7
- vector field along a path, 6
 - derivative of, 6
 - parallel, 7
- volume, 121
 - growth of graph, 214
 - growth of Riemannian manifolds, 200, 205
 - of disks, 165
 - of tubes, 166
 - Riemannian, form, 148
- Weingarten map, 62
- Weyl asymptotic formula, 184
- wiedersehnsraum, 328
- Wirtinger's inequality, 185
