Contents

<i>List of contributors</i>	<i>page</i> x
<i>Preface</i>	xv
Part I Fundamental ideas and general formalisms	1
1 Unfinished revolution	3
<i>C. Rovelli</i>	
2 The fundamental nature of space and time	13
<i>G. 't Hooft</i>	
3 Does locality fail at intermediate length scales?	26
<i>R. D. Sorkin</i>	
4 Prolegomena to any future Quantum Gravity	44
<i>J. Stachel</i>	
5 Spacetime symmetries in histories canonical gravity	68
<i>N. Savvidou</i>	
6 Categorical geometry and the mathematical foundations of Quantum Gravity	84
<i>L. Crane</i>	
7 Emergent relativity	99
<i>O. Dreyer</i>	
8 Asymptotic safety	111
<i>R. Percacci</i>	
9 New directions in background independent Quantum Gravity	129
<i>F. Markopoulou</i>	
<i>Questions and answers</i>	150
Part II String/M-theory	167
10 Gauge/gravity duality	169
<i>G. Horowitz and J. Polchinski</i>	

viii	<i>Contents</i>	
11	String theory, holography and Quantum Gravity <i>T. Banks</i>	187
12	String field theory <i>W. Taylor</i>	210
	<i>Questions and answers</i>	229
	Part III Loop quantum gravity and spin foam models	233
13	Loop quantum gravity <i>T. Thiemann</i>	235
14	Covariant loop quantum gravity? <i>E. Livine</i>	253
15	The spin foam representation of loop quantum gravity <i>A. Perez</i>	272
16	Three-dimensional spin foam Quantum Gravity <i>L. Freidel</i>	290
17	The group field theory approach to Quantum Gravity <i>D. Oriti</i>	310
	<i>Questions and answers</i>	332
	Part IV Discrete Quantum Gravity	339
18	Quantum Gravity: the art of building spacetime <i>J. Ambjørn, J. Jurkiewicz and R. Loll</i>	341
19	Quantum Regge calculus <i>R. Williams</i>	360
20	Consistent discretizations as a road to Quantum Gravity <i>R. Gambini and J. Pullin</i>	378
21	The causal set approach to Quantum Gravity <i>J. Henson</i>	393
	<i>Questions and answers</i>	414
	Part V Effective models and Quantum Gravity phenomenology	425
22	Quantum Gravity phenomenology <i>G. Amelino-Camelia</i>	427
23	Quantum Gravity and precision tests <i>C. Burgess</i>	450
24	Algebraic approach to Quantum Gravity II: noncommutative spacetime <i>S. Majid</i>	466

Table of Contents

[More information](#)

<i>Contents</i>		ix
25	Doubly special relativity <i>J. Kowalski-Glikman</i>	493
26	From quantum reference frames to deformed special relativity <i>F. Girelli</i>	509
27	Lorentz invariance violation and its role in Quantum Gravity phenomenology <i>J. Collins, A. Perez and D. Sudarsky</i>	528
28	Generic predictions of quantum theories of gravity <i>L. Smolin</i>	548
	<i>Questions and answers</i>	571
	<i>Index</i>	580
