 American option, 11, 240, 245
 anticipative decision variables, 255
 arbitrage, 63
 arbitrage pricing, 318
 arbitrage-free scenario trees, 268
 Armijo–Goldstein condition, 91
 ARO, 300
 asset allocation, 9
 asset/liability management, 13, 279
 autoregressive model, 264
- backward recursion in DP, 229
 basic feasible solution, 27
 basic solution, 25
 basic variable, 27
 basis matrix, 26, 27
 basis partition, 26
 Bellman equation, 235
 Bellman’s principle of optimality, 225
 benchmark, 178
 Benders decomposition, 260
 beta of a security, 147
 binary integer linear program, 193
 binary search, 82
 binomial distribution, 243
 binomial lattice, 243
 Black–Scholes–Merton option pricing formula, 116, 288
 Black–Litterman model, 148
 branch and bound, 200
 branch and cut, 210
 branching, 198, 202
 Brownian motion, 116
 BSM equation, 116
- CAL, 156
 call option, 11
 callable debt, 282
 capital allocation line, 156
 capital budgeting, 193, 226
 cash-flow matching, 50
 centered direction, 129
 central path, 127
 CMO, 248
 collateralized mortgage obligation, 248
 combinatorial auction, 212
 complementary slackness, 22
 concave function, 320
 conditional prepayment model, 251
 Conditional Value-at-Risk, 273
 cone, 322
 conic optimization, 4, 168
 constrained optimization, 100
 constraint robustness, 7, 295
 constructing an index fund, 216
 constructing scenario trees, 265
 contingent claim, 62
 convex combination, 320
 convex function, 320
 convex set, 320
 convexity of bond portfolio, 50
 corporate debt management, 282
 correlation, 326
 covariance, 326
 covariance matrix approximation, 181
 credit migration, 277
 credit rating, 249
 credit risk, 276
 credit spread, 252
 cubic spline, 162
 cutting plane, 206
 CVaR, 273
- decision variables, 42
 dedicated portfolio, 50
 dedication, 50
 default risk, 249
 density function, 324

- derivative security, 62
- deterministic DP, 226
- deterministic equivalent of an SP, 257
- diffusion model, 117
- discrete probability measure, 324
- distribution function, 324
- diversified portfolio, 145
- dual cone, 322
- dual of an LP, 19
- dual QP, 122
- dual simplex method, 37
- duality gap, 20, 130
- duration, 50
- dynamic program, 5, 225

- efficient frontier, 9
- efficient portfolio, 9
- ellipsoidal uncertainty set, 294
- entering variable, 33
- European option, 11
- exercise price of an option, 11
- expectation, 325
- expected portfolio return, 9
- expected value, 325
- expiration date of an option, 11
- extreme point, 27

- feasibility cut, 262
- feasible solution of an LP, 17
- first-order necessary conditions for NLP, 101
- formulating an LP, 44
- forward recursion in DP, 231
- forward start option, 187
- Frobenius norm, 182
- Fundamental Theorem of Asset Pricing, 67

- GARCH model, 112
- generalized reduced gradient, 103
- geometric mean, 142
- global optimum, 2
- GMI cut, 207
- golden section search, 85
- Gomory mixed integer cut, 207
- gradient, 93

- hedge, 11
- Hessian matrix, 98
- heuristic for MILP, 204

- idiosyncratic risk, 147
- implied volatility, 116
- independent random variables, 325
- index fund, 216
- index tracking, 178
- infeasible problem, 2
- insurance company ALM problem, 280
- integer linear program, 5
- integer program, 192
- interior-point method, 124
