Index

- Betti number, 219
- bifurcation for nonlinear problems on \mathbb{R}^n , 262
 - for variational operators, 224
 - from infinity, 65
 - from the essential spectrum, 269, 273
- bifurcation point, 16
 - subcritical, 22
 - supercritical, 22
 - transcritical, 22
- boundary operator, 209
- Brezis–Lieb lemma, 182
- Brezis–Nirenberg theorem, 180
- Brouwer fixed point theorem, 30

- Caratheodory function, 5
 - category, 143
 - properties, 145
- Cauchy problem, 102
- characteristic value, 20
 - maximal interval of existence, 102
- coercive functional, 81
- compact perturbation of the identity, 38
- concave-convex nonlinearity, 198
- concentration compactness, 252
- constrained critical point, 93
- constrained gradient, 93
- constrained maximum, 94, 109
- constrained minimum, 94, 109
- contractible, 143
- critical exponent, 138
- critical groups, 223
- critical level, 77
- critical manifold, 286
- critical points, 77
 - and weak solutions of differential equations, 77
 - multiple, 164
- deformation, 100
- deformation lemma, 118, 151
- deformation retract, 206
- degree, main properties, 26
- differential of a map on manifolds, 91
- dual variational principle, 191, 277

- elliptic problems, sublinear, on \mathbb{R}^n , 268
- essential spectrum, 269
- Euler–Poincaré characteristic, 219
- exact sequence, 204
- exponential decay, 179
- extension property, 146

- \mathbb{F}_p , 6
- Fréchet derivative, 1
- functional, 77

- general boundary conditions, 222
- genus, 157
 - and category, 160
 - of the unit sphere, 159
 - properties, 158
- Gidas–Ni–Nirenberg, 241
- Gidas–Spruck theorem, 246
- global bifurcation, 60
 - for problems on \mathbb{R}^n , 267
 - from infinity, 66
 - in vortex theory, 284
- global existence in the vortex theory, 276
- gradient flow, 100

- Handle body decomposition, 215
- Heaviside function, 275
- higher derivatives, 2
- Hill vortex, 276, 283, 284
- homology axioms, 205
- homology groups, 205
- homology
 - of (B^n, S^{n-1}) , 208
 - of spheres, 207
- homotopy invariance, 55

- implicit function theorem, 3
- index, 29
- Jacobian, 27
- jumping nonlinearity, 233
- Kelvin transform, 246
- Krasnoselski bifurcation theorem, 52
- Lagrange multiplier, 96
- linear eigenvalue problem, 86
- linear eigenvalues, 8
- linear elliptic equations, 7
- linking, 129, 167
 - example, 129–131
 - for even functionals, 167
 - level, 132
- local inversion theorem, 3
- local parametrization, 90
- manifolds, 89
 - of codimension one, 95
- maximum, 80
- Mayer–Vietoris sequence, 206
- minimum, 80
- Morse index of MP critical points, 229
- Morse inequalities, 222
- Morse lemma, 213
- mountain pass critical point, 118
 - Morse index, 229
- mountain pass level, 118
- mountain pass solution in vortex theory, 278
- mountain pass theorem, 118, 199
- mountain pass, for even functionals, 164
- mountain pass, multiplicity results, 169
- moving plane method, 241
- multiplicity of an eigenvalue, 9
- natural constraint, 97
- Nehari manifold, 97
- Nemitski operators, 5
- nondegenerate critical manifold, 287
- nonlinear eigenvalue problem, 85, 163
- nonlinear problem with discontinuous nonlinearity, 188
- nonlinear problems on \mathbb{R}^n , 177
- nonlinear schrödinger equations, 293
- pair of maps, 205
- pair of spaces, 205
- Palais–Smale condition, 107
- partial derivative, 2
- perturbation methods, 286
- Pohozaev identity, 136
- Poincaré Inequality, 4, 9
- problems at resonance, 46
- problems with critical exponent, 180
- pseudogradient, 120, 122
- Rabinowitz global bifurcation theorem, 62
- rank of a group, 219
- reduced functional, 288
- regular value, 27
- relative homology groups, 210
- Riemannian manifold, 93
- Sard theorem, 27
- scalar curvature problem, 305
- Schwarz symmetrization, 197
- singular homology groups, 209
- singularly perturbed Neumann problems, 296
- Sobolev best constant, 181
- Sobolev embedding theorem, 4, 5
- Sobolev embedding, in the radial case, 178
- solitary wave, 177
- stationary point, 77
- Strauss radial lemma, 178
- sublinear problem, 170, 232
- sublinear problems, 45, 83
- sub-solution, 46, 57, 198
- superlinear problem, 109, 123, 135, 172
- super-solution, 46, 57, 198
- symmetric criticality principle, 175
- tangent space, 90
- variational characterizations of eigenvalues, 9
- vortex in an ideal fluid, 274
- Whyburn lemma, 263, 285
- Yamabe problem, 302
- Z_c , the set critical points, 77
