Index

A-type elements, 4–7, 18, 31, 168, 198, 202, 219, 220, 222, 225
A-type variables. See Across variable
ac current, 172, 251
ac induction motor, 251
Acceleration
  rotational, 30
  translational, 16
Accumulator, 219
Across variable, 4–7, 31, 65, 170, 198, 213, 220, 222, 250, 254
Aliasing, 399
Amplifier
  operational, 179–186
  pneumatic, 239–243
Amplitude
  complex, 303
  Real, 303
Analytical solution, 81–111
Angle, shaft, 30
Antialiasing filter, 399
Asymptotic Bode diagrams, 309–311
Asymptotic frequency characteristics, 309–311
Asymptotic stability, 332
Automobile
  motion, 17–18
  steering, 330
  suspension system, 48
Backward-difference approximation, 391, 422
Bandwidth, 310
Bilinear transformation, 417
Biot number, 203
Block diagrams
  simulation, 143–147, 463
  system, 2
  transfer function, 286–293
Bode diagrams, 307–314
  asymptotic, 309–311
Break frequency, 310
Capacitance
  electrical, 170–171, 310
  fluid, 219–222
  pneumatic, 236
  thermal, 202
  time-varying, 186
Capillary resistor, 223
Centrifugal pump, 253
Characteristic equation and roots, 83, 84, 93–98, 106–109
Charge. See Electrical capacitor
Classical solutions. See Analytical solution
Closed-loop control system, 356–357
Coefficient block, 143
Compatibility law, 23, 225
Compensation, 378–382
  feedback, 379–382
  feedforward, 379
  series, 379–382
Compensator
  lag, 380–382
  lag–lead, 381–382
  lead, 380–382
Complex number, 93
Complex plane, 274
Complex roots, 93–98
Complex variable
Conduction, 199–200
Conduction law, 199–200
Continuity law, 225
Control laws
  on-off control, 366–367
  proportional (P) control, 367
  proportional–derivative (PD) control, 368
  proportional–integral (PI) control, 367
  proportional–integral–derivative (PID) control, 273, 368, 421
Controllers
  analog, 365–382
  digital, 421–423
Convection, 200–201
Convective heat transfer coefficient, 200
Corner frequency, 170–171, 310
Coulomb friction, 131, 154
Coupling coefficient, 249, 253
Critical damping, 96, 100
Current source, 169
D-type elements, 4, 7, 22, 33, 168, 173, 198, 219, 223
  Damped natural frequency, 96, 415
482  Index

Damper, 4
   rotational, 32, 39
   translational, 22
Damping ratio, 94–104, 415
Decay ratio, 103
