

## INSTITUTIONAL CORRUPTION

In this book, Seumas Miller develops distinctive philosophical analyses of corruption, collective responsibility, and integrity systems, and applies them to cases in both the public and the private sectors. Using numerous well-known examples of institutional corruption, he explores a variety of actual and potential anti-corruption measures. The result is a wide-ranging, theoretically sophisticated, and empirically informed work on institutional corruption and how to combat it. Part I defines the key concepts of corruption, power, collective responsibility, bribery, abuse of authority, and nepotism; Part II discusses anti-corruption and integrity systems, corruption investigations, and whistleblowing; and Part III focuses on corruption and anti-corruption in specific institutional settings, namely policing, finance, business, and government. Integrating theory with practical approaches, this book will be important for those interested in the philosophy and ethics of corruption as well as for those who work to combat it.

SEUMAS MILLER has research appointments at Charles Sturt University, Delft University of Technology, and the University of Oxford. His publications include *The Moral Foundations of Social Institutions* (Cambridge University Press, 2010), *Shooting to Kill: The Ethics of Police and Military Use of Lethal Force* (2016), and *Corruption and Anti-Corruption in Policing* (2016).
