# Contents

	<i>Preface</i>	<i>page xi</i>
<b>1</b>	<b>Foundations</b>	<b>1</b>
	1.1 Signals: time and frequency analysis	1
	1.2 A more general notion of bandwidth	5
	1.3 Physical media	5
	1.4 Network classification	8
	1.4.1 The obvious starting example	8
	1.4.2 Circuit-switched versus packet-switched networks	9
	1.4.3 Distance-based classification	11
	1.4.4 Topology-based and further classifications	12
	1.4.5 Channel-based classification	14
	1.5 Transmission options	14
	1.6 Network delay	15
	1.7 A last miscellanea of concepts	18
	1.7.1 Traffic sources	18
	1.7.2 Service taxonomy	18
	1.7.3 Performance metrics	20
	1.7.4 Congestion and QoS	21
	1.8 A few bibliographical notes	22
	1.9 Practice: determining the RTT	22
	1.10 Exercises	26
<b>2</b>	<b>Architectures and protocols</b>	<b>29</b>
	2.1 Who's who in the telecommunication world	29
	2.2 OSI Model: the seven-layer approach	31
	2.3 TCP/IP protocol suite	37
	2.4 IP: Internet protocol	40
	2.4.1 Public and private IP addressing	42
	2.4.2 Classless IP addressing	46
	2.4.3 Subnetting and supernetting	48
	2.4.4 The delivery of IP packets	52
	2.5 TCP: transmission-control protocol	54

Table of Contents

[More information](#)

viii	<b>Contents</b>	
	2.6	UDP: user datagram protocol 58
	2.7	Exercises 58
<b>3</b>	<b>Ethernet networks</b>	<b>61</b>
	3.1	Multiple access 61
	3.1.1	Carrier sense multiple access strategies 65
	3.2	IEEE 802.3 and the IEEE 802 project 67
	3.2.1	Reference topologies 68
	3.2.2	MAC sublayer 70
	3.2.3	Physical layer 75
	3.3	Twisted-pair cabling standards 80
	3.4	Practice: address resolution protocol 87
	3.5	Practice: NIC configuration 92
	3.6	Practice: a campus network layout 95
<b>4</b>	<b>Wireless networks</b>	<b>97</b>
	4.1	Wireless LAN 97
	4.1.1	The basket of 802.11 standards 97
	4.1.2	Physical layer evolution 98
	4.1.3	Architecture and MAC basic mechanisms 101
	4.1.4	The need for quality of service and the 802.11e document 107
	4.1.5	IEEE 802.11 frame format 110
	4.1.6	Recent enhancements: the 802.11n document 112
	4.1.7	The Wi-Fi Alliance 113
	4.2	Wireless MAN 113
	4.2.1	Physical layer 114
	4.2.2	MAC features 118
	4.2.3	IEEE 802.16 frame format 122
	4.2.4	Scheduling services 123
	4.2.5	WiMAX Forum 124
	4.3	WPAN: wireless personal area networks 124
	4.4	A glimpse of wireless mesh networks 125
	4.5	Practice: capturing 802.11 data and control frames 127
	4.6	Practice: inspecting 802.11 management frames 131
	4.7	Practice: cracking the 802.11 WPA2-PSK keys, perhaps . . . 132
	4.8	Exercises 134
<b>5</b>	<b>LAN devices and virtual LANs</b>	<b>136</b>
	5.1	Repeaters and bridges 136
	5.2	Main features of bridges 138
	5.3	Switches 139
	5.4	Virtual LAN 139

Table of Contents

[More information](#)

<b>Contents</b>	<b>ix</b>
5.5 Overview: VLAN definition and benefits	140
5.6 VLAN classification	141
5.7 VLAN on a single switch	143
5.8 VLAN on multiple switches	145
5.8.1 The need for tagging and virtual topology	145
5.8.2 IEEE 802.1Q frame tagging	147
5.9 Inter-VLAN communications	148
5.10 Practice: switch management and VLAN configuration	151
5.10.1 Switch management	151
5.10.2 VLAN configuration	155
5.10.3 Inter-VLAN communication	157
5.11 Exercises	159
<b>6 Routers</b>	<b>161</b>
6.1 What is a router?	161
6.2 Functions and architectures	162
6.3 Table look-up implementation	165
6.4 From routers to middleboxes: firewalls and NATs	168
6.5 Practice: routing and forwarding table	173
6.6 Practice: firewalls and packet filtering	176
6.7 Practice: network address translation	182
<b>7 Routing fundamentals and protocols</b>	<b>187</b>
7.1 Routing algorithms	187
7.1.1 The Bellman–Ford algorithm	189
7.1.2 The Dijkstra algorithm	192
7.2 Routing protocols	193
7.2.1 Distance vector protocols	193
7.2.2 Link state protocols	194
7.2.3 Distance vector, path vector or link state?	195
7.3 Routing in the Internet	196
7.3.1 Routing information protocol	198
7.3.2 Open shortest path first	200
7.4 Practice: RIP configuration	203
7.5 Practice: OSPF configuration	210
<b>8 Wide area networks and user access</b>	<b>220</b>
8.1 The xDSL family	220
8.2 The X.25 network	222
8.3 Integrated services digital network	225
8.4 The frame relay service	227
8.5 B-ISDN and ATM	231
