EMERGENCY SEDATION AND PAIN MANAGEMENT

Procedural sedation and analgesia represents one of the great advances in the maturation of emergency medicine as a discrete specialty within medicine. Once the exclusive domain of the anesthesiologist, sedation and pain management procedures are now a routine part of all emergency department practices.

Emergency Sedation and Pain Management is a comprehensive medical text addressing emergency sedation and analgesia with specific emphasis on treatment of the emergency department patient. The easily accessible, clinically oriented format allows the reader fast and efficient access to the key points in each chapter.

The text presents a clinical approach to the treatment of pain in emergency patients, including pediatric and adult populations. Analgesia, sedation, and anesthetic techniques are presented in an informative, authoritative, and concise format – written and edited by physicians with extensive research as well as clinical emergency medicine expertise. The chapters are richly supplemented with tables, photographs, and step-by-step illustrations.

JOHN H. BURTON, MD, has been the Residency Program Director in Emergency Medicine and a Professor of Emergency Medicine at Albany Medical College in Albany, NY, since 2006. From 1999 to 2003, Dr. Burton was the Medical Director for Maine Emergency Medical Services and, from 1995 to 2006, he worked in the Department of Emergency Medicine at the Maine Medical Center in Portland. He was the founding Research Director in the Department of Emergency Medicine at Maine Medical Center.

Dr. Burton’s areas of research interest are procedural sedation and analgesia, emergency medical services, and management of cardiovascular emergencies. He has published extensively in the emergency medicine literature on these and related topics. He has received awards and peer recognition throughout his academic career noting a commitment to the specialty of emergency medicine.

Dr. Burton completed medical school at the University of North Carolina at Chapel Hill in 1992 and residency training at the University of Pittsburgh Affiliated Residency in Emergency Medicine in 1995.

JAMES MINER, MD, FACEP, has been the Director of Performance Improvement and the Associate Research Director in the Department of Emergency Medicine at Hennepin County Medical Center since 1999 and is an Associate Professor of Emergency Medicine at the University of Minnesota Medical School.

Dr. Miner has performed extensive research in the areas of pain management and procedural sedation in the Emergency Department and has published numerous manuscripts on these topics. He is an associate editor of Academic Emergency Medicine.

Dr. Miner completed medical school at Mayo Medical School in 1996 and residency training at the Hennepin County Medical Center in Emergency Medicine in 1999.

Acknowledgments

I am indebted to many professional and life mentors, including Darrell Sechrest; Gerry Unks, PhD; Fred Hansen, MD; Abby Wolfson, MD; Don Yealy, MD; Herb Garrison, MD, MPH; Bud Higgins, MD; Mara McErlean, MD; and Vince Verdile, MD. I stand on the shoulders of mentors and friends (there have been many others). Thank you.

This effort could not have transpired without the inspiration and constant support of the most important people of my life: Phyllis Burton-Sechrest, Allison Burton, Caroline Burton, and Tracy Burton. To you, I dedicate my efforts.

John H. Burton

I am grateful for the guidance and support of the mentors who have shaped my career, especially Kenneth Watanabe, PHD, and Michelle Biros, MS, MD. I dedicate this work to my loving family, Stephanie Miner, Isaac Miner, Natalie Miner, and Stella Miner, whose support made this possible.

James Miner

The editors gratefully acknowledge the efforts of Tim Sweeney, MD, Maine Medical Center, Portland, for his contribution of a number of outstanding medical illustrations for this text. These illustrations are displayed as figures and color plates throughout the text.
