## Part I  Methods to study primate–parasite interactions  

1. Collection methods and diagnostic procedures for primate parasitology  
   *Ellis C. Greiner and Antoinette McIntosh*
   
2. Methods of collection and identification of minute nematodes from the feces of primates, with special application to coevolutionary study of pinworms  
   *Hideo Hasegawa*
   
3. The utility of molecular methods for elucidating primate–pathogen relationships – the *Oesophagostomum bifurcum* example  
   *Robin B. Gasser, Johanna M. de Grujier, and Anton M. Polderman*
   
4. The application of endocrine measures in primate parasite ecology  
   *Michael P. Muehlenbein*
   
5. Using agent-based models to investigate primate disease ecology  
   *Charles L. Nunn*
Contents

Part II  The natural history of primate–parasite interactions

6  What does a parasite see when it looks at a chimpanzee? 113
  Michael V. K. Sukhdeo and Suzanne C. Sukhdeo

7  Primate malarias: evolution, adaptation, and species jumping 141
  Anthony Di Fiore, Todd Disotell, Pascal Gagneux, and Francisco J. Ayala

8  Disease avoidance and the evolution of primate social connectivity: Ebola, bats, gorillas, and chimpanzees 183
  Peter D. Walsh, Magdalena Bermejo, and José Domingo Rodríguez-Teijeiro

9  Primate–parasitic zoonoses and anthropozoonoses: a literature review 199
  Taranjit Kaur and Jatinder Singh

10  Lice and other parasites as markers of primate evolutionary history 231
  David L. Reed, Melissa A. Toups, Jessica E. Light, Julie M. Allen, and Shelly Flannigan

11  Cryptic species and biodiversity of lice from primates 251
  Natalie P. Leo

12  Prevalence of Clostridium perfringens in intestinal microflora of non-human primates 271
  Shiho Fujita, Asami Ogasawara, and Takashi Kageyama

13  Intestinal bacteria of chimpanzees in the wild and in captivity: an application of molecular ecological methodologies 283
  Kazunari Ushida

14  Gastrointestinal parasites of bonobos in the Lomako Forest, Democratic Republic of Congo 297
  Jozef Dupain, Carlos Nell, Klára Judita Petrželková, Paola Garcia, David Modrý, and Francisco Ponce Gordo

23 Host–parasite dynamics: connecting primate field data to theory
   Colin A. Chapman, Stacey A. M. Hodder, and Jessica M. Rothman 463

Part IV Conclusions 485

24 Ways forward in the study of primate parasite ecology
   Colin A. Chapman, Michael A. Huffman, Sadie J. Ryan, Raja Sengupta, and Tony L. Goldberg 487

25 Useful diagnostic references and images of protozoans, helminths, and nematodes commonly found in wild primates
   Hideo Hasegawa, Colin A. Chapman, and Michael A. Huffman 507
