The English Language in Canada
Status, History and Comparative Analysis

The English Language in Canada examines the current status, history and principal features of Canadian English, focusing on the “standard” variety heard across the country today. The discussion of the status of Canadian English considers the number and distribution of its speakers, its relation to French and other Canadian languages and to American English, its status as the expressive medium of English-Canadian culture and its treatment in previous research. The review of its history concentrates on the historical roots and patterns of English-speaking settlement that established Canadian English and influenced its character in each region of Canada. The analysis of its principal features compares the vocabulary, pronunciation and grammar of Canadian English to standard British and American English. Subsequent chapters examine variation and change in the vocabulary and pronunciation of Canadian English, while a final chapter briefly considers the future of Canadian English.

Charles Boberg is Associate Professor in the Department of Linguistics at McGill University, Montreal.
STUDIES IN ENGLISH LANGUAGE

General editor
Merja Kytö (Uppsala University)

Editorial Board
Bas Aarts (University College London), John Algeo (University of Georgia), Susan Fitzmaurice (University of Sheffield), Christian Mair (University of Freiburg), Charles F. Meyer (University of Massachusetts)

The aim of this series is to provide a framework for original studies of English, both present-day and past. All books are based securely on empirical research, and represent theoretical and descriptive contributions to our knowledge of national and international varieties of English, both written and spoken. The series covers a broad range of topics and approaches, including syntax, phonology, grammar, vocabulary, discourse, pragmatics and sociolinguistics, and is aimed at an international readership.

Already published in this series:

Charles F. Meyer: Apposition in Contemporary English
Jan Firbas: Functional Sentence Perspective in Written and Spoken Communication
Izchak M. Schlesinger: Cognitive Space and Linguistic Case
Katie Wales: Personal Pronouns in Present-Day English
Laura Wright: The Development of Standard English, 1300–1900: Theories, Descriptions, Conflicts
Charles F. Meyer: English Corpus Linguistics: Theory and Practice
Stephen J. Nagle and Sara L. Sanders (eds.): English in the Southern United States
Anne Curzan: Gender Shifts in the History of English
Kingsley Bolton: Chinese Englishes
Irm Taavitsainen and Paivi Pahta (eds.): Medical and Scientific Writing in Late Medieval English
Elizabeth Gordon, Lyle Campbell, Jennifer Hay, Margaret MacAlagan, Andrea Sudbury and Peter Trudgill: New Zealand English: Its Origins and Evolution
Raymond Hickey (ed.): Legacies of Colonial English
Merja Kytö, Mats Rydén and Erik Smitterberg (eds.): Nineteenth-Century English: Stability and Change
John Algeo: British or American English? A Handbook of Word and Grammar Patterns
Christian Mair: Twentieth-Century English: History, Variation and Standardization
Evelien Keizer: The English Noun Phrase: The Nature of Linguistic Categorization
Raymond Hickey: Irish English: History and Present-Day Forms
Günter Rohdenburg and Julia Schlüter (eds.): One Language, Two Grammars? Differences between British and American English
Laurel J. Brinton: The Comment Clause in English
Geoffrey Leech, Marianne Hundt, Christian Mair and Nicholas Smith: Change in Contemporary English: A Grammatical Study
Jonathan Culpeper and Merja Kytö: Early Modern English Dialogues: Spoken Interaction as Writing
Daniel Schreier, Peter Trudgill, Edgar Schneider and Jeffrey Williams: The Lesser-Known Varieties of English: An Introduction
Hilde Hasselgård: Adjunct Adverbials in English
Raymond Hickey: Eighteenth-Century English: Ideology and Change

2 The establishment and growth of Canada’s English-speaking population 55
   2.1 Origins: fishermen, fur traders and soldiers 55
   2.2 The United Empire Loyalists (and others) 60
   2.3 A growing majority: British settlement in the nineteenth century 67
   2.4 The Land Boom: the peopling of the West 82
   2.5 The world comes to Canada: modern Canadian English as a multi-ethnic language in a multilingual setting 95
   2.6 Immigration history and the development of Canadian English 99
### Contents

3  The principal features of Canadian English in comparative perspective 106  
3.1  Canadian English vocabulary 108  
3.2  Canadian English pronunciation 123  
   3.2.1  Variation in phonemic inventory 124  
   3.2.2  Variation in phonemic incidence: systematic variables 131  
   3.2.3  Variation in phonemic incidence: lexically specific variables 137  
   3.2.4  Phonetic variation 143  
   3.2.5  Some remaining matters of pronunciation 157  
3.3  Canadian English grammar 160  

4  Variation and change in the vocabulary of Canadian English 167  
4.1  The *North American Regional Vocabulary Survey* (*NARVS*) 167  
4.2  Regional variation 170  
4.3  Changes in progress 188  

5  Variation and change in the phonetics of Canadian English 199  
5.1  Regional variation 199  
5.2  Social variation: sex and social class 209  
5.3  Ethnic variation 213  
5.4  Changes in progress 225  
5.5  Examples of individual vowel systems 232  

6  Summary and future directions 242  
6.1  The status, history and comparative analysis of English in Canada: a summary 242  
6.2  Future directions for research 248  
6.3  Future directions for Canadian English 250

Figures

2.1 Retained British immigration to Canada, 1815–1860

2.2 Ethnic composition of retained British immigration to Canada, 1815–1860

2.3 Ethnic origin of the Canadian population in 1871 (original four provinces of Ontario, Quebec, New Brunswick and Nova Scotia)

2.4 Ethnic origin of British-born population by province, 1860

2.5 Birthplaces of the populations of the western provinces and Ontario in 1911

2.6 Ethnic origin of the populations of Canada’s regions in 1931

2.7 Ethnic origin of the Canadian population in 1971

3.1 Mean F1 and F2 measurements for vowels and allophones of Standard Canadian English

3.2 Two diagnostic phonetic characteristics of SCE: the Canadian Shift (F2 of /æ/) and Canadian Raising of /awT/ for 86 Canadian and 22 American PCE participants

4.1 The replacement of *chesterfield* and *sofa* with *couch* in the Canadian NARVS data

4.2 The replacement of *pail* with *bucket* in the Canadian NARVS data

4.3 Convergence of Canadian with American English vocabulary in the NARVS data: the rise of four Americanisms in Canadian English

4.4 The decline of specific terms for furniture in the Canadian NARVS data

5.1 Sex differences in the phonetics of Canadian English: means for six vowels for female and male PCE participants

5.2 Ethnic differences in the phonetics of Montreal English: mean formant values for PME participants of British, Italian and Jewish ethnic origin, from Table 5.9

5.3 Age differences in the phonetics of Canadian English: mean formant values for older and younger speakers from Vancouver, Montreal and Halifax, from Table 5.12

5.4 Vowel measurements for PCE2 VVM58: a man from Vancouver, BC, born in 1958

5.5 Canadian Raising of /awT/ in the vowel system of PCE2 VVM58 (Figure 5.4)  234
5.6 Vowel measurements for PCE PRF79: a woman from Swift Current, SK, born in 1979  235
5.7 Vowel measurements for PCE SOF83: a woman from Woodstock, ON, born in 1983  236
5.8 Vowel measurements for PME JWM49N: a Jewish man from Montreal, QC, born in 1949  237
5.9 Vowel measurements for PCE2 NSM46: a man from Liverpool, NS, born in 1946  238
5.10 Vowel measurements for PCE NLF812: a woman from St. John’s, NL, born in 1981  240
Tables

1.1a Mother tongues in Canada, 2006 (single responses by province and territory, with percentage of total populations)  
1.1b Mother tongues in Canada, 2006 (proportion of total population and of each language group living in each province)  
1.2 Number and proportion of mother-tongue anglophones, francophones and allophones in Canada’s ten largest metropolitan areas (single responses, 2006)  
1.3 Number of mother-tongue speakers of most common non-official languages in Canada’s six largest metropolitan areas (single responses, 2006)  
2.1 Population of Canada by province and territory, 1871, with proportion of British-born  
2.2 Population of Canada’s ten largest cities, 1871  
2.3 Population of Canada by province and territory, 1931, with proportion of foreign-born (including British-born)  
2.4 Populations of Canada’s ten largest cities, 1931  
3.1 Some lexical correspondences between Standard British and American English  
3.2 Proportions of British and American variants of three lexical variables in Canada, from the Survey of Canadian English and the North American Regional Vocabulary Survey (NARVS)  
3.3 A selection of lexical transfers from Aboriginal languages to Canadian (and American) English  
3.4 Canadianisms in the NARVS questionnaire, with nationwide frequencies of use and non-Canadian equivalents  
3.5 Status of five phonemic distinctions in Standard British, American and Canadian English  
3.6 The fourteen stressed vowel phonemes of Standard Canadian English, with subclasses and broad transcriptional symbols of Labov, Ash and Boberg (2006) and lexical sets of Wells (1982)  
3.7 Prerhotic vowel mergers in Standard Canadian English  
3.8 The six prerhotic vowels of Standard Canadian English
List of tables

3.9 Status of six variables of phonemic incidence involving conditioned neutralizations in Standard British, American and Canadian English 137
3.10 Foreign (a) words in Canadian and American English: frequency of /ah/ nativizations by word 140
3.11 Ten miscellaneous variables of phonemic incidence in Canadian English, with their usual variants in Standard British and American English and their status in four surveys 142
3.12 Data for Figure 3.1: mean F1 and F2 measurements (and standard deviations) for vowels and allophones of Standard Canadian English 145
3.13 Phonetic effects on the advancement of /uw/ in SCE: mean F1 and F2 measurements of ten tokens of /uw/ from the PCE word list 152
3.14 IPA notation of approximate phonetic values of Wells’ (1982) lexical sets in SCE, based on data in Figure 3.1 153
3.15 Comparison of phonetic values of Canadian and American PCE participants: mean formant values for the Canadian Shift and Canadian Raising 155
3.16 Data from 63 Canadian and 22 American PCE participants on retention of [h] in /hw/, retention of [j] in /iw/, and retention of [t] in /VtV/ 158
3.17 A selection of grammatical variables from Scargill and Warkentyne (1972: 72–85), with nationwide frequencies of each variant for male and female parents and students 161
4.1 Regional breakdown of NARVS respondents. Mean and standard deviation of number of responses per question per region and country 169
4.2 NARVS variables that produced total regional variation of more than 65 percent 171
4.3 A simplified view of regional lexical variation among six Canadian regions: the most common NARVS lexical variants in British Columbia, the Prairies, Ontario, Quebec, the Maritimes and Newfoundland 178
4.4 Regional frequencies of major lexical variants in NARVS data 179
4.5 Strength of lexical boundaries within Canada: mean variant frequency difference and number of frequency differences of greater than 50 percent between neighboring Canadian regions 184
4.6 Strength of lexical boundaries between the US and Canada: mean variant frequency difference and number of frequency differences of greater than 50 percent between neighboring Canadian and US regions 187
4.7 Lexical change in progress: largest increases in word frequency in Canadian NARVS data 190
4.8 Lexical change in progress: largest decreases in word frequency in Canadian NARVS data
4.9 Real-time comparison of data from Avis’ study of speech differences along the Ontario–United States border, Scargill and Warkentyne’s Survey of Canadian English and the four generations of NARVS respondents
5.1 Phonetics of Canadian English (PCE) participants by region and sex
5.2 Effects of region and sex on sets of phonetic measures in data from PCE project: results of MANCOVA
5.3 Significant effects of region on PCE phonetic measures: results of tests of between-subjects effects
5.4 Regional means for PCE phonetic measures showing significant effect of region (from Table 5.3)
5.5 Establishment of six dialect regions of Canada using seven phonetic variables, based on regional divisions in PCE data
5.6 Significant effects of speaker sex on PCE phonetic measures: results of tests of between-subjects effects, with female and male means and standard deviations and sex difference
5.7 Phonetics of Montreal English (PME) participants by ethnic origin, age and sex
5.8 Effects of ethnic origin on sets of phonetic measures in data from PME project: results of MANCOVA
5.9 Significant effects of ethnic origin on PME phonetic measures: results of tests of between-subjects effects, means and standard deviations for each ethnic group, and results of pairwise comparisons testing significance of each ethnic contrast
5.10 Sample for analysis of age differences: PCE participants from Vancouver and Halifax and British-origin PME participants from Montreal, by age and sex
5.11 Effects of age on sets of phonetic measures from Vancouver, Montreal and Halifax: results of MANCOVA
5.12 Significant effects of age on phonetic measures from Vancouver, Montreal and Halifax: results of tests of between-subjects effects, with means and standard deviations for each age group and age difference
I would like to acknowledge the contributions of many people who aided in the production of this book in one way or another. First, I was greatly assisted by many students at McGill University who helped to carry out the research on which it is based. In addition to the several hundred students in my undergraduate sociolinguistics classes who collected responses to the vocabulary survey reported in Chapter 4, these include many who worked for me as research assistants: Robin Anderson, Antonia Aphantitis, Aileen Bach, Krista Byers-Heinlein, Rachel Corber, Leetal Cuperman, Anicka Fast, Deena Fogle, Hillary Ganek, Rebecca Green, Ulana Harasymowicz, Tracy Higgs, Ivana Iulianella, Ellen House Kogut, Katherine Lanman, Erika Lawrance, Tasha Lewis, Jennifer MacDonald, Corrine McCarthy, Jason McDevitt, Ryan Mullins, Kelly O’Connor, Anne Robitaille, Marie-Catherine Savoie, Sam Shooklyn, Carol Sisson, Kristina Supinski, Carolyn Trengrove, Eva Villalba, Michael Wakahe and Eliza Ycas. Among this group, Bach, Fast, Fogle, Kogut, Lawrance, MacDonald, Shooklyn and Wakahe made particularly important contributions as computer consultants, data analysts, lab administrators and participant interviewers. Equally important, of course, were the members of the public, both McGill students and others, who agreed to be interviewed or who filled out questionnaires, thereby providing the data that underlie many of the analyses in this book. Administrative support was also offered by several members of the secretarial staff in the Department of Linguistics, especially Andria De Luca, Connie Digiuseppe, Mercini McCollum, Linda Suen and Lise Vinet, while the book would never have reached publication without the active encouragement, able assistance and expertise of the staff at Cambridge University Press, particularly Helen Barton, David Cox, Sarah Green, Kay McKechnie and Christina Sarigianidou, as well as the series editor, Merja Kytö.

The research that went into this book received financial support from three granting agencies: the Canadian Foundation for Innovation; the Fonds québécois pour la recherche en société et culture (Grant no. 2003-NC-81927); and the Social Sciences and Humanities Research Council of Canada (Standard Research Grants nos. 410–02–1391 and 410–2005–1924).
Acknowledgments xv

Next, I would like to thank people who had a less direct but no less important role in making the book possible. These would include Lydia White and Glyne Piggott, who were Chairs of Linguistics at McGill during much of the period in which the research was carried out; Shari Baum, who made her lab available to me for acoustic analysis when I first arrived at McGill; Jack Chambers, who helped me get started in research on Canadian English as a collaborator on his Dialect Topography project; Bill Labov, who, as my doctoral supervisor at the University of Pennsylvania, taught me most of what I know about sociolinguistics, dialectology and North American English; and my parents, Einer and Julia Boberg, who gave me all the instruction, support, encouragement and love any son could want.

Finally, I would like to thank my wife, Myrtis, without whose heroic efforts and selfless dedication as wife and mother my own work would be impossible.
