Algebra of Communicating Processes (ACP), 173
timed, 173
action, 22
action prefixing, 8
Algebra for Timed Processes (ATP), 173
alternating-bit protocol, 261
Alur, Rajeev, 160, 258
Andersen, Henrik R., xiii

Baeten Jos, 66
basic parallel processes (BPP), 73
basic process algebra (BPA), 74
Bergstra, Jan, 74
binary decision diagrams, xiii
Bouyer, Patricia, 191
branching
  bisimilarity, 64
timed, 218
  bisimulation, 64
Bryant, Randel, xiv

Calculaus of Communicating Systems (CCS), 7–30
semantics, 24
syntax, 22
value-passing, 28–30

channel name, 21
characteristic formula, 130
  for timed automata, 241
choice operator, 9
Christensen, Søren, 73
clock, 176
clock constraints, 176
diagonal, 215
equivalence of, 178
evaluation of, 177
extended, 215
clock updates, 191
clock valuation, 177
delay operation, 177
equivalence, 208
reset operation, 177
CMC, 190
complementary name, 21
complete lattice, 77
computation tree logic (CTL), 139
Concurrency Workbench, xiv, 2, 63, 100, 101, 148, 261
count-free grammars, 74
Cospan, 139, 259
Communicating Sequential Processes (CSP), 6
timed (TCSP), 173
deadlines, 191
deadlock, 4, 262
difference bound matrix (DBM), 218
Dijkstra, Edsger, 63
Dill, David, 160
dining philosophers problem, 63
equational system
  mutually recursive, 121
event-clock automata, 218
extended state, 224
Fischer, Michael, 250
function
  fixed point of, 79
  monotonic, 79
  partial, 3
  relabelling, 22
Glabbeek, Rob van, 33
greatest lower bound (glb), 77
Greibach normal form, 74
guard, see clock constraint
guarded expression, 166
Hamming, Richard, 249
hand-shake communication, 15
Harel, David, 4
Hennessy, Matthew, xv
Hennessy–Milner logic (HML)
  negation in, 96
  recursive
    game characterization for, 115–117
    semantics of, 110–112
    syntax for, 109
  semantics of, 91, 96
  syntax for, 90
  with time
    recursive, 239–241
    semantics of, 224
symbolic semantics of, 230
  syntax for, 223
Hirshfeld, Yoram, 73
Hoare, Tony, 6
Hüttel, Hans, 74
HyTech, 191
image-finite process, 98
Jančar, Petr, 74
